

LISTA CATALOGUE

WORKSPACE AND STORAGE EQUIPMENT

LISTA AS A PARTNER

LISTA offers organisation. With success, experience and a systemic approach. For more than 75 years, we have offered our customers concepts for more organised and efficient working. Because we offer more than just a high-quality product, competent advice and

a wide range of services: the LISTA system creates perfect interlocking solutions for smooth work processes. And this makes us a leading partner in the area of workspace and storage equipment worldwide.

BENEFITS AT A GLANCE

- + Comprehensive range**
from A for access control to W for workstation systems
- + Modular system**
all products can be freely combined
- + Maximum flexibility**
with a choice of colours, configuration options and more
- + Tailor-made solutions**
for customers with specific needs
- + Expert planning**
including visualisation with LISTA Draw
- + 10-year guarantee**
unique in the industry
- + Wide range of services**
such as training, assembly, labelling etc.
- + Worldwide distribution and service network**
for customer service without borders
- + First-class references**
from more than 100,000 prestigious companies worldwide

WELCOME TO THE NO. 1

As varied as your challenges in modern storage and workspace equipment are, so too are the industries we provide with suitable solutions. Bet that your business is also on our customer list?

This gives you the certainty that we are experts and know how different the requirements are in the different areas.

Automotive

Banking and administration

Careers, education and leisure

Fire brigades and police

Healthcare

Aviation

Mechanical engineering

Metalworking

Motor sport

SYSTEMATIC WORK

The system-based approach is a LISTA trademark. To help you set up your business in the best way possible, we offer you a comprehensive range for all functional areas. Combine individual modules freely as required, from the warehouse, workshop, production and assembly to the office.

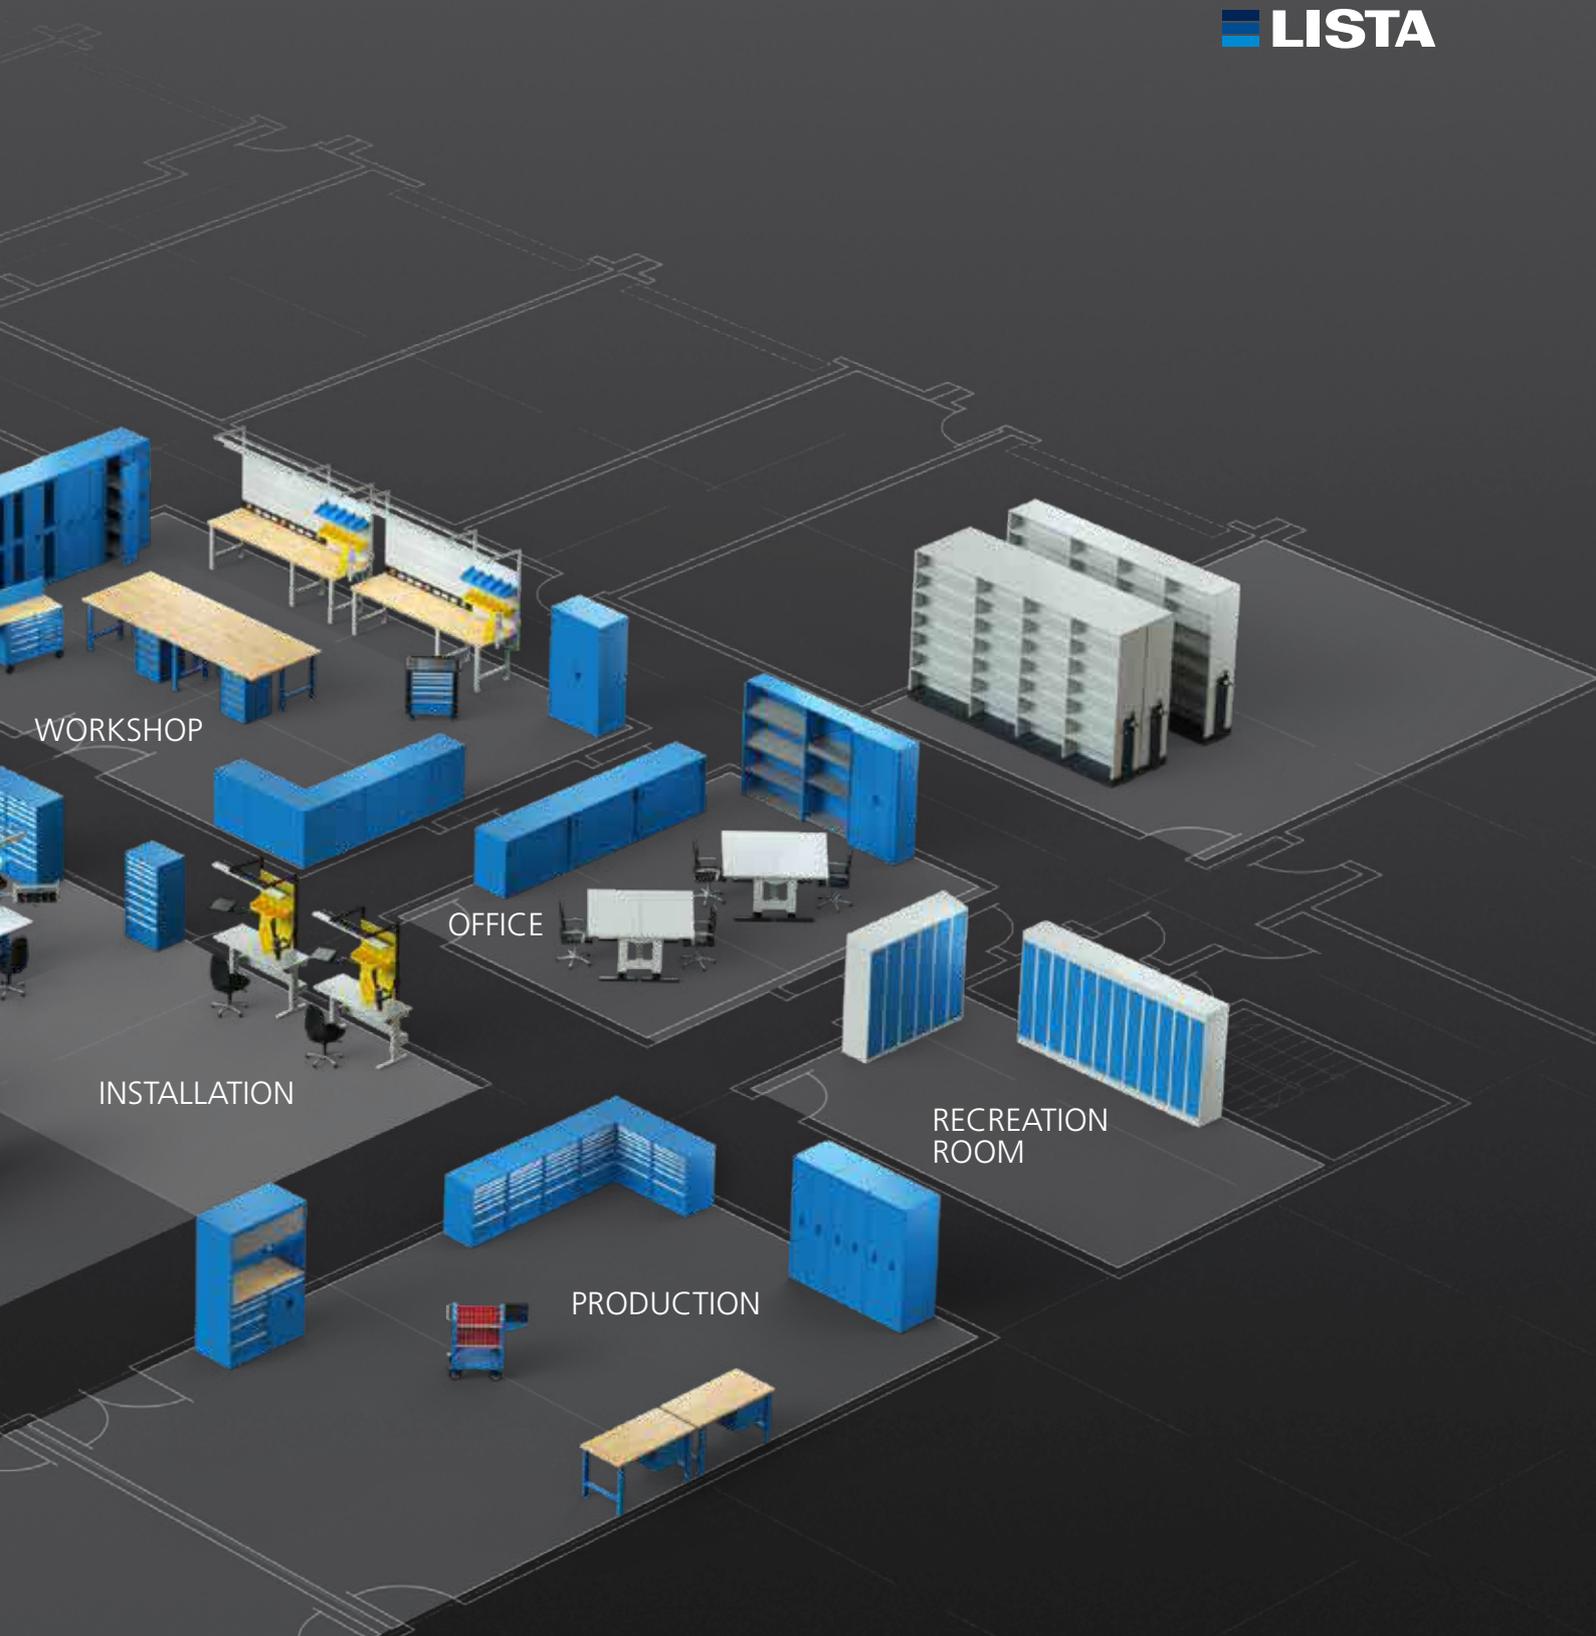

Yet the LISTA system cannot only fit in any space. Our products can be individually configured, equipped with matching doors, countertops, variable interior layouts and accessories. And if this still does not lead to the optimal solution, our engineers will develop a special solution for you.

In this way, the LISTA system combines a consistent look and feel with individual functionality, thereby creating the basis for efficient processes in your company. In other words, LISTA allows you to work faster, more productively or simply better.

OPTIMUM MATERIAL FLOW

In addition to ergonomic workplace design and storage, the fast and easy transport of goods and material is a decisive criterion for efficiency and productivity in a company. LISTA solutions ensure a smooth material flow and thus make a valuable contribution to further optimising your intralogistics. More on this starting on page 36.

LISTA SYSTEM SOLUTIONS AT A GLANCE

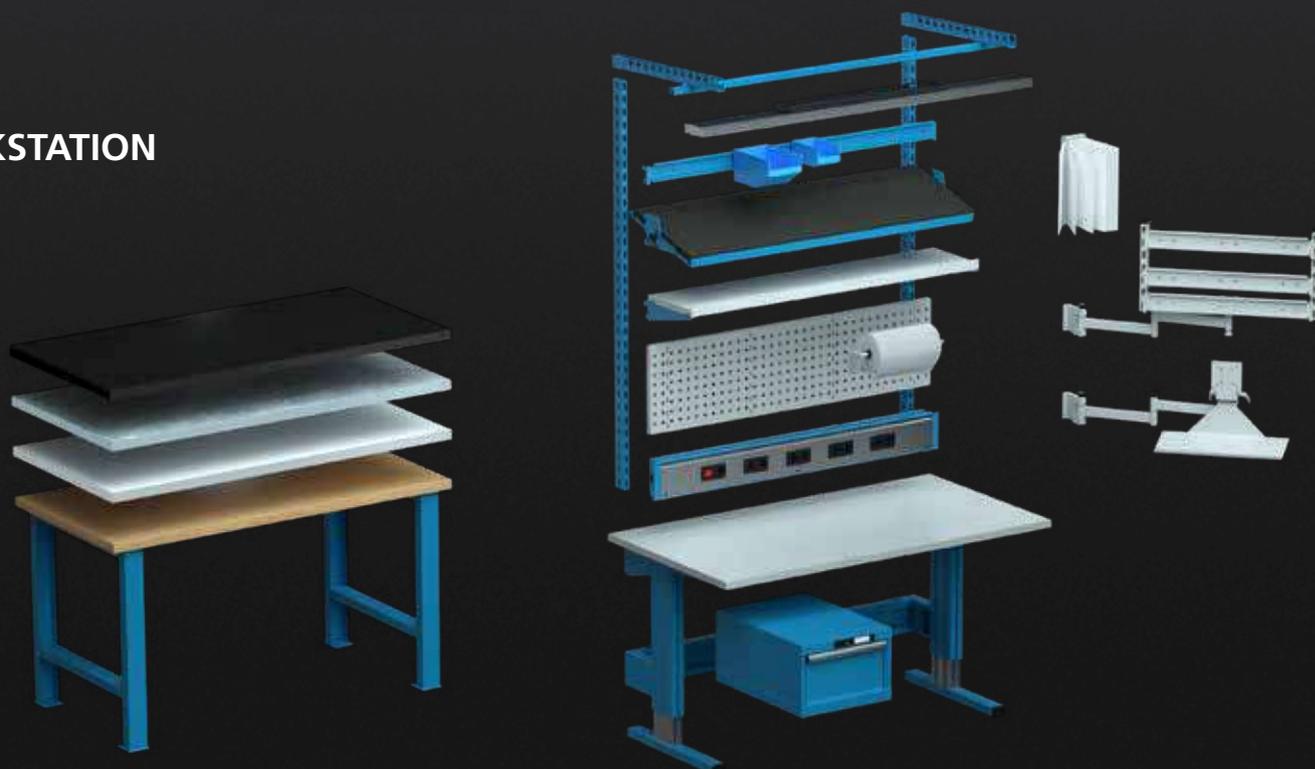

The working world is becoming more varied. So it is quite fitting that LISTA system solutions can be used to design working environments flexibly and according to requirements. The indivi-

dual modules are available in different versions and offer numerous options for individual configuration. After all, we don't want to sell you just anything, but always the solution that suits you.

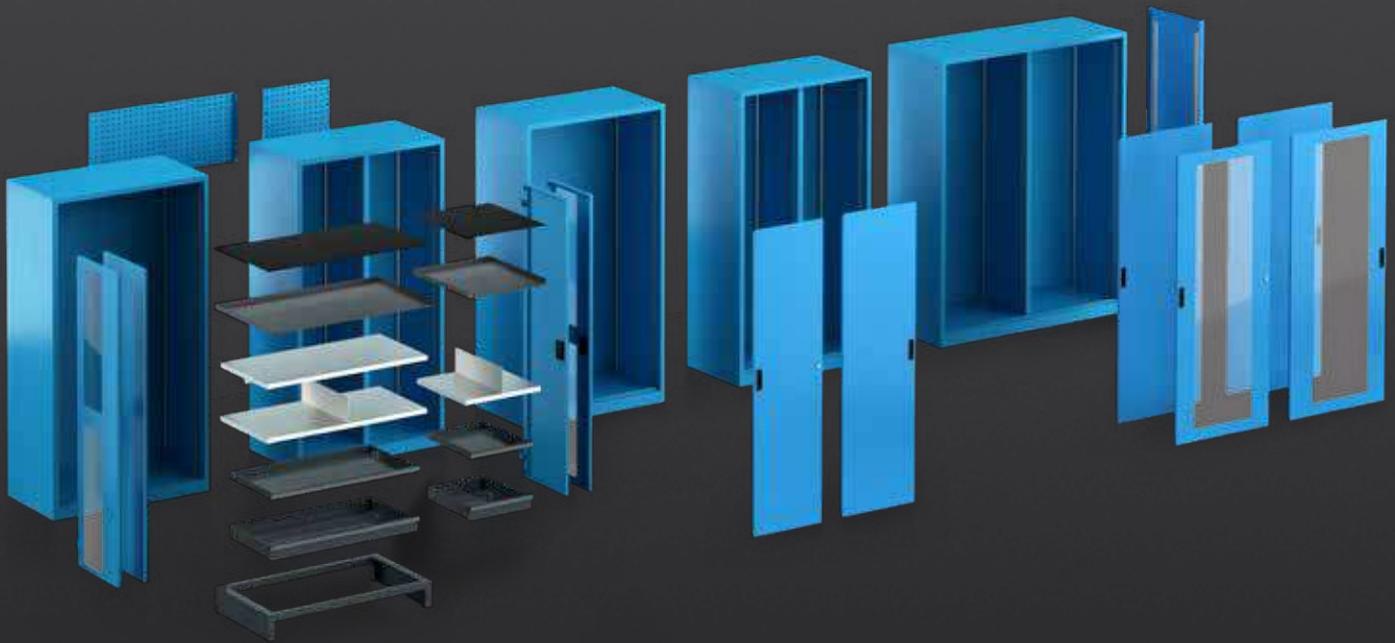

DRAWER CABINET

OPTIMISE YOUR WORKSPACE WITH LISTA

From the favourite colour to the perfect drawer partition: delivering the best product for you is important to us. That's why LISTA offers you free choice in almost all areas. Our surfaces, for example, are available as an ESD version or with an antibacterial coating in addition to the individual colour preference. You will

also receive multi-level locking solutions, up to fully automatic access control, as required. Not to mention comprehensive partition material, accessories and, last but not least, attractive extras such as our EDGE design cabinet.

Comprehensive partition material

Plastic boxes, troughs, anti-slide mats, dividers and more: the right partition material brings order to your LISTA drawers and also ensures more efficient workflows and increased productivity. See p. 248.

Smart accessories

Accessories such as hooks, lights or desk chairs complete your LISTA system. Design each workstation ergonomically and precisely to suit your individual requirements. See p. 162.

Free choice of colours

Twelve standard colours, six colour combinations, all other colours available. LISTA also provides you with the exact visual solution that suits you. Discover the possibilities. See p. 22.

Variable locking systems

LISTA provides you with the optimum locking system for your requirements, from standard locking systems with replaceable cylinders to fully electronic control systems. See p. 28.

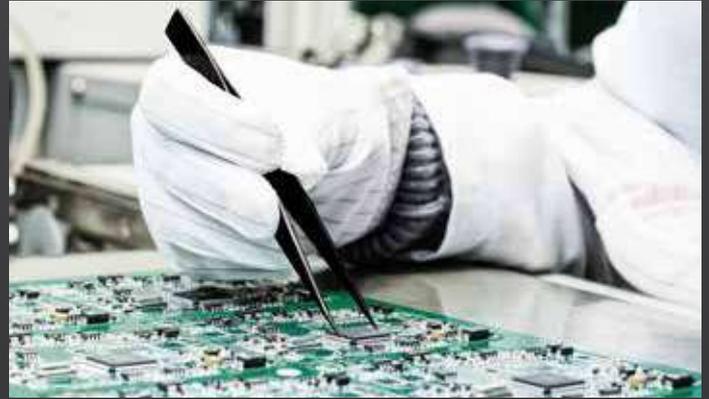

You can also find further information in our LOCKING SYSTEMS brochure.

Electronic access control

With our electronically controlled access system LISTA E-Control, you can protect valuable and important stored goods particularly securely and efficiently. See p. 32.

For more information, see our ACCESS CONTROL SYSTEMS brochure.

ESD solutions

Your LISTA workspace equipment is also available as an ESD version to protect sensitive components from electrostatic discharge. See p. 24.

Further information can be found in our ESD SOLUTIONS brochure.

Antibacterial surface

Infection control included: LISTA solutions are also available with an antibacterial surface coating for medical areas and others requiring increased hygiene.

More information can be found in our HEALTHCARE SOLUTIONS brochure.

EDGE statement light

EDGE, the LISTA designer cabinet with LED light signature, shines your workspace in a new light. Exciting. Different. State-of-the-art. See p. 34.

Further information can be found in our EDGE brochure.

THE LISTA PROMISE

Actually, it is very simple: we want you to be satisfied with your LISTA solution. That's why we focus on you as a customer in everything we do. For our products, this means: we manufacture in first-class quality with a long-term guarantee and responsibility

for the future. In this way, you can be sure that LISTA will not only provide you with a high-quality and durable solution, but also a sustainably produced solution.

TOP INDUSTRIAL QUALITY

LISTA products meet the very highest standards of quality. They are robust, made of top-quality materials and manufactured with first-class workmanship. That is why we offer a 10-year guarantee for our products. This is unique in the industry, but that's not all that LISTA customers can rely on. LISTA solutions have been awarded myriad international certifications, so they can be used worldwide. What's more, they'll still be in use years and decades from now: in addition to the very best industrial quality, we also guarantee subsequent deliveries of your product over a long period of time.

THE HIGHEST MANUFACTURING STANDARDS

We aim to provide the LISTA system with a consistently high level of quality. We therefore manufacture our products exclusively in Switzerland and Germany. State-of-the-art manufacturing technology and ongoing investment and innovation in our production processes ensure superb results. This has made LISTA a byword for reliability and security as a partner for storage and operating equipment for over 75 years.

QUALITY MANAGEMENT

We set ourselves realistic goals and review them on an ongoing basis in order to be able to improve our competitiveness and performance in a sustainable way, and thereby increase customer satisfaction. Our quality and environmental management system meets all of the requirements of the international ISO 9001:2015 and ISO 14001:2015 standards. As far as we are concerned, quality begins with our workforce, so we also have ISO 45001:2018 certification.

ENVIRONMENTAL PROTECTION

Environmental protection is an integral part of our corporate culture. We are committed to sustainable climate protection out of genuine conviction. By voluntarily participating in the Energy Agency for Business scheme, LISTA is committed to actively reducing CO₂ emissions and optimising energy efficiency.

SUSTAINABILITY

Environmental awareness and sustainability are integrated right from the very development of our products and carried across into all of the subsequent processes. This runs all the way through, from the procurement of raw materials to production and distribution, and finally the long-term use of our cabinets, shelving and other solutions. One reason why we are able to do this is that we mainly use steel as a material. In addition to robustness and durability, the fact that steel can be 100 per cent recycled is another convincing argument in favour of its use.

SERVICE FROM A SINGLE SOURCE

You can order your LISTA product quickly and easily from the catalogue or configure it online. And it's just as easy if you have any questions or need technical support. Contact LISTA

Service and you will also receive a tailor-made solution from consultation to customer service. Training included.

All contact addresses can be found on p. 270 and online at: [About LISTA > Contact](#)

ADVICE, PLANNING AND VISUALISATION

Is your project bigger and more extensive? Then we will be happy to advise you personally, work with you to analyse your individual needs and visualise your new furniture system with the aid of our planning software.

INDIVIDUAL ENGINEERING

Do you have any special requirements for your operating equipment? Do you require special technical features, special sizes or a company-specific design? If so, we're happy to help by offering our individual engineering service. You can rely on our many years of experience in planning, manufacturing and assembling customer-specific solutions. Even complex projects and ambitious tasks are in the best hands with LISTA.

INSTALLATION

Your LISTA solution is assembled by skilled technicians. They install the system on site and can also train your employees if necessary. This ensures that the equipment can be put into operation smoothly and also guarantees the successful use of our products over the long term.

AFTER SALES

After installation and setup, our experienced staff are available to help you with advice and assistance at any time.

SPARE PARTS

You can obtain the right replacement parts in original LISTA quality for each of our products.

CUSTOMER SERVICE

For technical queries, simply get in touch with our customer service team. They will provide expert advice and can also come to you if necessary.

REPAIRS

Do you need a LISTA product to be repaired? Our experts will ensure that your solution is working again as quickly as possible, as you can expect from LISTA.

LISTA After Sales can best be reached via the contact form on the Internet at: [Services > After Sales](#)

TRAINING

Whether you need to know more about products or customer applications, general background information or practical assembly instructions, at the LISTA Workspace Academy we offer specialist training on the topics that really interest you.

Course overview and registration can be found online: www.lista-academy.com

REFERENCES

With LISTA you are in good company. More than 100 000 prestigious companies around the world trust our solutions. Covering a cross-section of industries and sizes, from ABB to the Zurich

University of Applied Sciences. Take a look at our customer list. And if you want to be included: just contact us and ask.

Free choice of colours

COLOUR YOUR WORKSPACE

The LISTA storage and workspace equipment is available in twelve standard colours, twelve further predefined colour variants and, on request, in any colour and colour combination. This allows you to design each workstation completely flexibly and individually. Different colours for different work areas, coloured accents to increase clarity or complete company facilities in the corporate design: it's all possible. You can find an overview of our colours and colour codes on the fold-out pages at the end.

YOU SET THE TREND

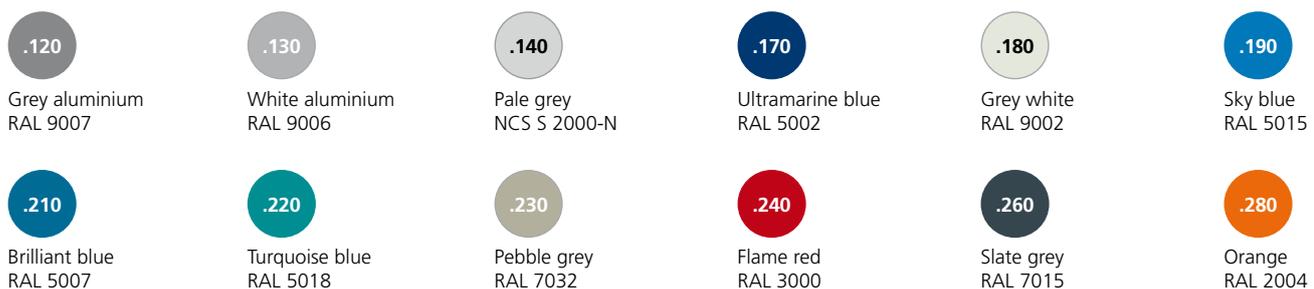

Do you have a special colour preference? No problem: LISTA solutions are available in any trend colour of your choice. Here are some examples that we have implemented for our customers:

Standard colours

An additional 12 predefined colours*

*12 other predefined colours are available at extra cost.

ESD solutions

SAFE HANDLING OF ELECTRONIC COMPONENTS

ESD stands for electrostatic discharge. It occurs when two objects at different potentials come into direct contact with each other. In modern workplaces, an electrostatic charge can give rise to high voltages depending on the humidity level.

+ Safety for your electronic components

Controlled dissipation of electrostatic charges

+ Comprehensive range of ESD products

for all applications (minimum to full protection)

+ Safe and neat storage

of your electronic components

+ Cost reduction

No damage and latent faults on PCBs

+ Expert planning

of ESD workstations and workspace equipment

WHEN IS ESD DANGEROUS OR HARMFUL?

It often goes unnoticed by people due to its low energy. However, even very small electrical discharges can quickly damage electronic components or lead to a hidden defect. If damage caused by ESD is noticed too late, high repair or replacement costs can result. Worse than the financial damage is the additional subsequent damage to reputation if, for example, a complete product batch is affected, which can, in turn, lead to a loss of customers.

The general rule therefore is:

“Where there is no charge, there is no discharge.”

ESD-safe equipment for handling ESD-sensitive components reduces the risk of static discharge to a minimum. This requires a comprehensive protection concept.

Warning symbol for ESD-sensitive components.

ESD protection components

THE COMPREHENSIVE ESD WORK PROGRAMME FROM LISTA

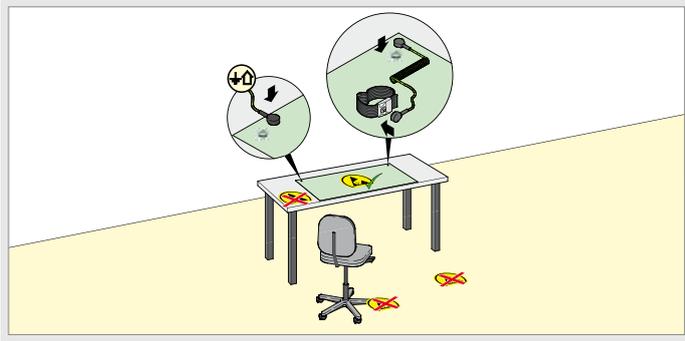

In order to avoid high costs, LISTA offers a complete ESD planning and implementation service – from advice to installation. LISTA has combined years of experience in workstation development with a sound knowledge of ESD problems and developed a comprehensive ESD workstation programme: **all painted surfaces feature a colour coating designed by LISTA that dissipates charges and prevents electrostatic discharge.**

IMPORTANT!

All ESD protection zones must be checked regularly!

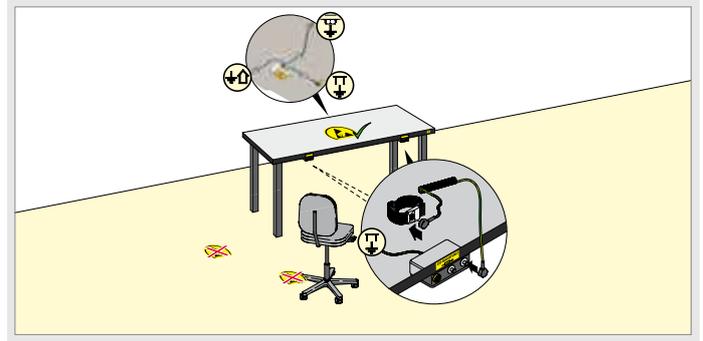

CONFIGURE AND ORDER ESD ZONES INDIVIDUALLY

A Version A

Minimum ESD protection

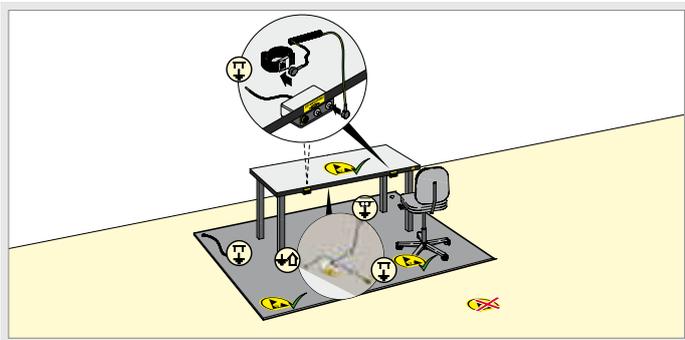

- Dissipative table mat with wrist strap

B Version B

Standard ESD protection

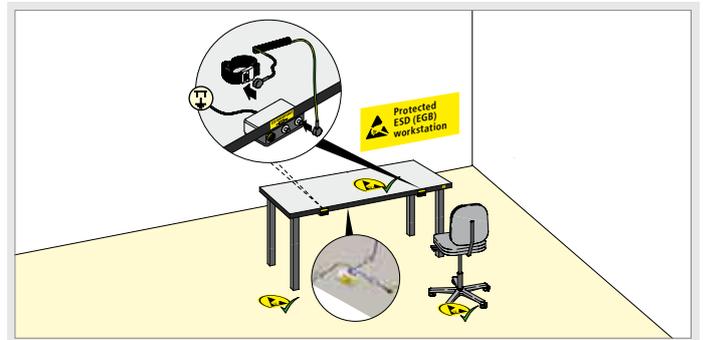

- Dissipative table top with wrist strap

C Version C

ESD isolated solution

- Dissipative table top with wrist strap
- Dissipative desk chair
- Dissipative floor mat

D Version D

ESD protection zone

- Dissipative table top with wrist strap
- Dissipative desk chair
- Dissipative base plate

A COMPREHENSIVE ESD PROTECTION ZONE INCLUDES THE FOLLOWING AREAS:

Workstations

The perfect ESD workstation is ergonomically adaptable and ESD protected. Electrostatic charges are dissipated in a controlled manner via the working surface and grounding cable so that the workstation stays charge-neutral.

Personnel grounding

People are a primary source of electrostatic charges. Wrist strap with grounding cable and shoes are therefore recommended for people working in an electronics manufacturing environment. Desk chairs or stand-up seats should also have ESD protection.

Storage

Electronic components are best stored in closed ESD drawers or hinged-door cabinets as well as ESD shelving (Faraday cage) with appropriate ESD containers.

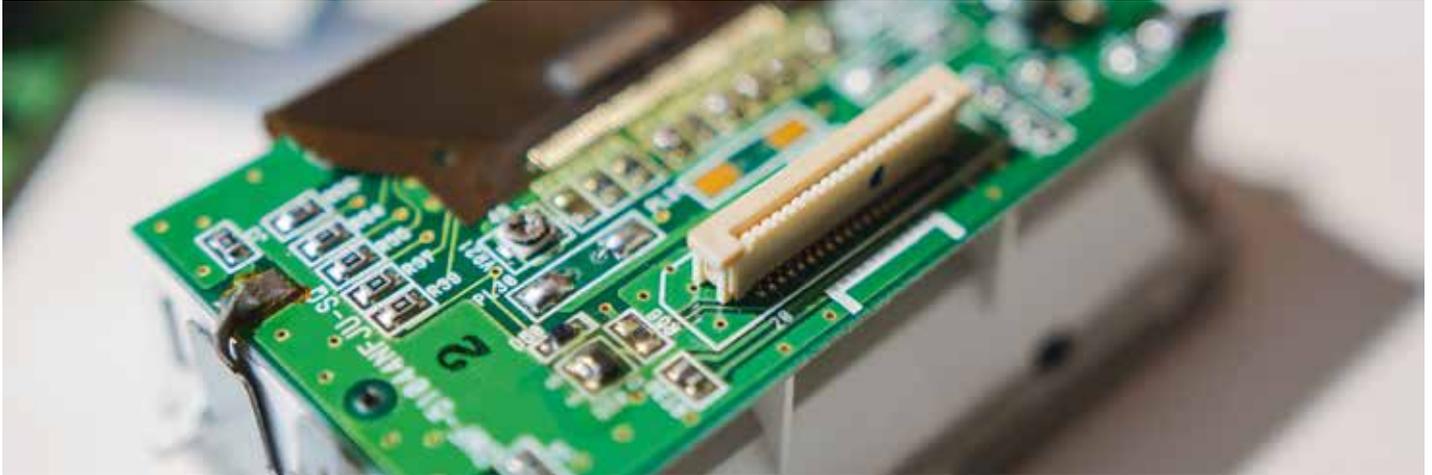

Markings

ESD-protected areas must be marked. Signs or additional labels should be used to warn of ESD-sensitive components.

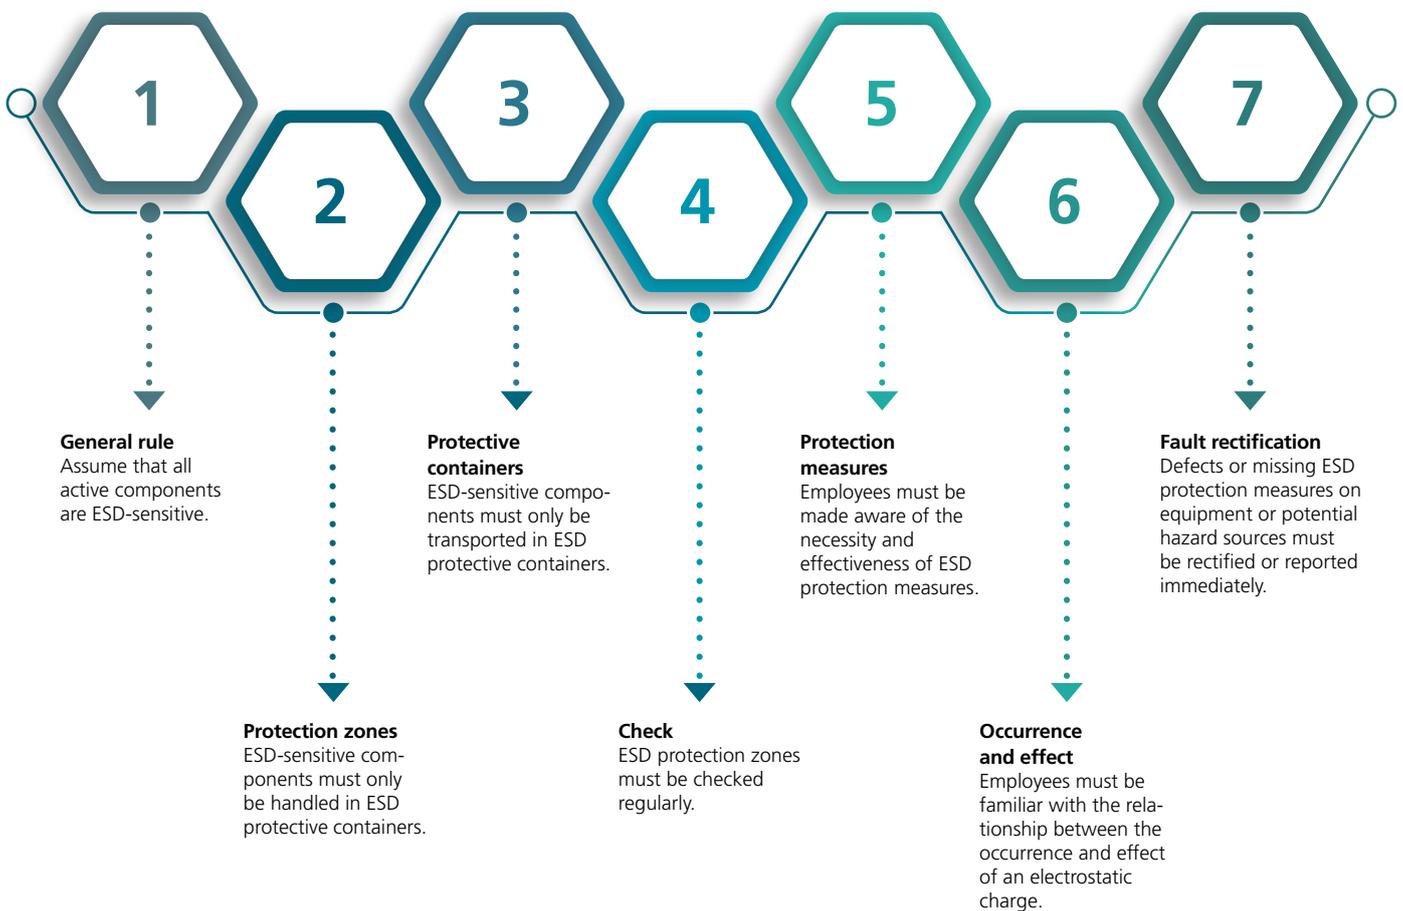

» see ESD catalogue

HOW ARE COMPANIES AFFECTED BY ESD?

“They work on components without knowing whether or not these components can be damaged during production.”
 Checklist for the equipment and maintenance of ESD protection zones to comply with the following ESD basic principles:
“Where there is no charge, there is no discharge.”

ESD CHECKLIST FOR COMPANIES

Locking systems

STATE-OF-THE-ART SECURITY

The new generation of LISTA locking systems offers ease of use and cutting-edge security. Modern technologies make our electronic locking systems even more flexible and easier to use. The different systems can be freely combined to create a locking system that ideally suits you and your requirements. We are happy to advise you.

- + Modular locking system**
perfectly adapted to your needs
- + Easy to use**
directly on the lock
(in all variants)
- + Optimal control and management**
via software with standard USB cable connected to the USB front port on the lock (in variants .C, .F or .A)
- + Capacitive keypad**
impervious to wear and easy to clean thanks to PCT technology
- + Mobile access**
via RFID badge and RFID card
- + Easy energy supply**
via mains adaptor or batteries for easy replacement on the front of the lock
- + Optional retrofitting**
for existing cabinets

OVERVIEW OF LISTA ACCESS SOLUTIONS

KEY LOCK

Proven standard locking system

KEY Lock, our standard locking system with replaceable cylinders.

- manual opening/locking with key
- simultaneously lockable for multiple, as well as different, products with only one key or separately lockable with several keys
- key availability guaranteed for years

CODE LOCK

The solution with number combination

When locking with CODE Lock, the key is replaced by a number combination. A simple four to six-digit code is all that is needed to open the product.

- manual opening/locking with number code
- lock readout and programming with LISTA Access software (option)

RFID LOCK

Ready for the future: The solution with RFID badge

In addition to the CODE Lock, the LISTA RFID Lock enables opening and locking via standard radio-frequency identification (RFID). It consists of a transponder in the lock and standard mobile RFID badges/cards/tags.

- **manual opening/locking** via RFID badge or number code
- most standard RFID badges/cards/tags can be used
- lock readout and programming with LISTA Access software (option)

AUTO LOCK

The ultimate solution: Automatic opening and locking

The LISTA AUTO Lock features the same functionality as our RFID Lock, however opening and locking take place automatically. With LISTA Access software (option), time profiles can also be programmed in the lock or on the user for time-limited access for increased security.

- **automatic opening/locking** via RFID badge or number code
- most standard RFID badges/cards/tags can be used
- locks automatically after a preset time or at the push of a button
- lock readout and programming with LISTA Access software (option)
- time-limited access programmable via LISTA Access software (option)

EXTENSIVE ACCESSORIES FOR OUR LOCKING SYSTEMS

Basic set
 1 AC/DC adapter (12W/5V)
 1 Combi-lock connection, complete
 1 Assembly instructions
 4 Cable ties
 Art. no. **19.160.000**

Expansion set
 1 Combi-lock connection, complete
 1 Connection cable, 2 m
 4 Cable ties
 Art. no. **19.161.000**

Extension cord set
 1 Connection cable, 2 m
 (one set is required per two metres)
 Art. no. **19.162.000**

Program badges
 Set of 5, colour: white
 Art. no. **19.581.000**

User badges
 Set of 5, colour: blue
 Art. no. **19.580.000**

RFID card reader
 for PC
 Art. no. **19.591.000**

Security eCard
 2 items
 Art. no. **19.579.000**

When ordering a **LISTA product with electronic lock**, please add the suffix of the relevant **lock type/locking type (.C, .F or .A)** to the article number from the table (e.g. **71.088.XXX.C**).

Order example for drawer cabinet with:

CODE Lock = 71.088.XXX.C
RFID Lock = 71.088.XXX.F
AUTO Lock = 71.088.XXX.A

FULL CONTROL WITH LISTA ACCESS

With the LISTA Access software, you have a particularly easy and user-friendly solution for managing and configuring your LISTA CODE, RFID or AUTO Lock. It enables faster learning and management of the lock, users and user groups via USB. Other additional functions are also available such as changing the lock ID code or creating summary assignment tables (permissions).

System requirements

Operating system: Windows 7 or higher

CPU: Intel Atom or similar (recommended Intel i3 or higher)

RAM: 2 GB (recommended 4 GB)

Free hard disk space: 500 MB (recommended 1 GB)

Functions

- Lock training and management
- User management
- Group classification
- Assignment table (permissions)
- Synchronisation of lock and database via USB

LISTA Access software

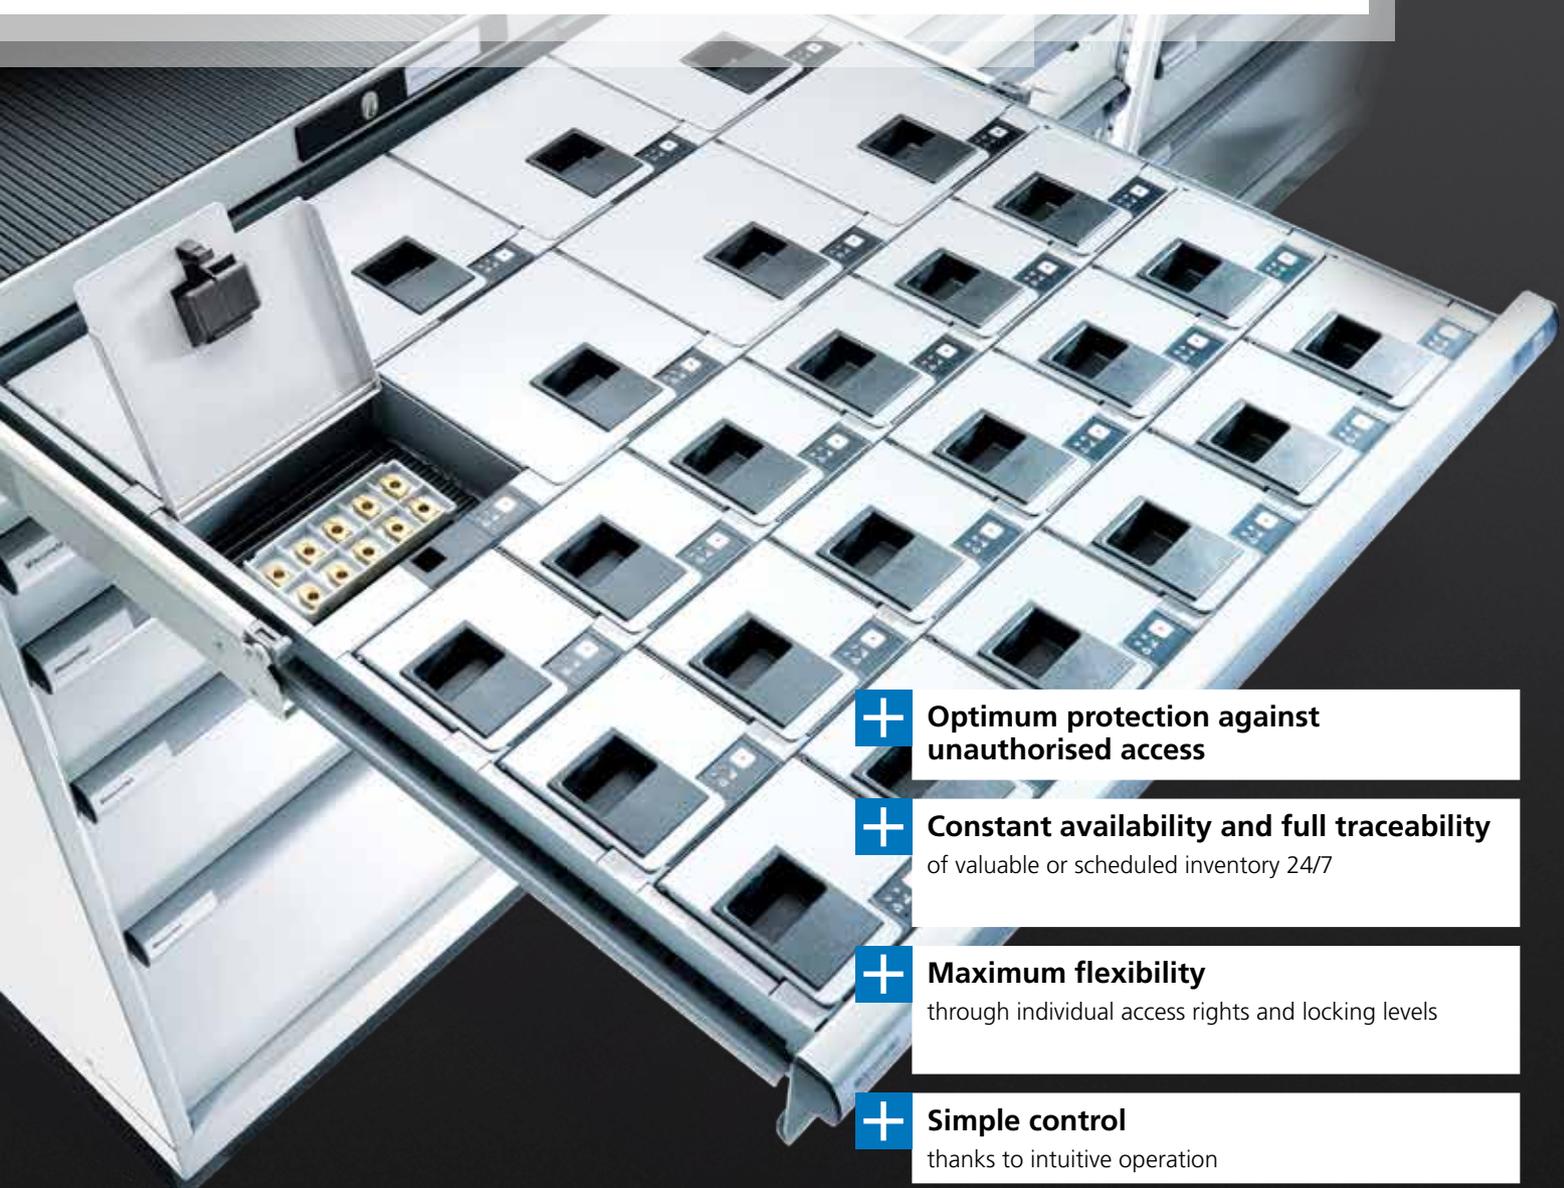

Art. no. 19.590.000

www.lista.com/locks

LISTA Electronic Control

SECURITY AT ALL LEVELS

The electronically controlled access system LISTA Electronic Control gives you maximum flexibility to allocate and manage access rights. This means that you can not only control access to the entire cabinet, individual drawers or the drawer compartments developed specially for this system but can also combine different system versions in a single cabinet. Just as required.

- + Optimum protection against unauthorised access**
- + Constant availability and full traceability** of valuable or scheduled inventory 24/7
- + Maximum flexibility** through individual access rights and locking levels
- + Simple control** thanks to intuitive operation
- + Additional security** through metal drawer compartments specially developed for this system
- + Reduced inventory loss and better planning** giving direct cost savings and increased productivity

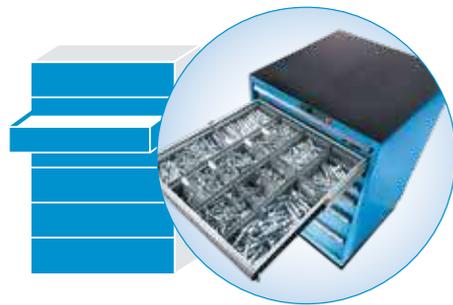

THE MODULAR SYSTEM FOR INTERNAL LOGISTICS SOLUTIONS

Level 1 Security

» Access control at cabinet level

LCC – LISTA Cabinet Control

Electronically controlled access to the entire cabinet.
Available for sizes
36 × 36 E (717 × 725 mm)
54 × 36 E (1023 × 725 mm)

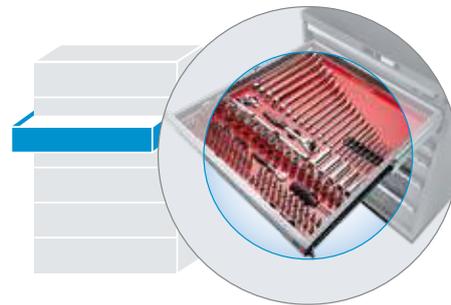

Level 2 Security

» Access control at drawer level

LDC – LISTA Drawer Control

Electronically controlled access to specific individual drawers. Available for sizes
36 × 36 E (717 × 725 mm)
54 × 36 E (1023 × 725 mm)

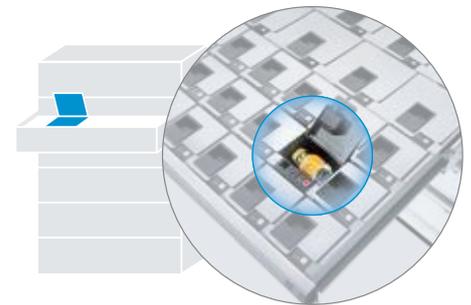

Level 3 Security

» Access control at compartment level

LPC – LISTA Parts Control

Electronically controlled access to specific drawer compartments. Available for sizes
36 × 36 E (717 × 725 mm)

eCONTROL

Don't search, find

LISTA eControl provides you with a tailor-made software solution for the storage and access management of your LISTA products. The software ensures optimal management so that you can access the desired product with as few steps as possible. eControl is simple, self-explanatory and event-controlled, so withdrawals are also possible without prior entry. The solution can optionally be integrated into your existing ERP system via an interface and – in addition to full transparency and time-saving withdrawal – also enables comprehensive controlling based on data and evaluations.

LISTA Electronic Control is available either as a complete system consisting of hardware and software or as hardware only to enable you to use your own software.

LISTA EDGE

GET THE LOOK

More form for your workspace: Discover EDGE, the new LISTA design cabinet with LED technology. The ultimate eye-catcher is available in two variants and different dimensions. Look forward to an individual statement light in the workshop, sales room, studio and office.

EDGE
GET THE LOOK

Form right down the line: EDGE LINE

- Vertical light strip along the cabinet front left and right
- Geometrical, uniform overall appearance
- Colour white
- Available in cabinet height 850 mm (other versions on request)

Form to the point: EDGE DOTS

- Individually controlled LED elements on the handle corners
- Technologically dynamic radiance
- Available in four colours (with optional myDOTS software package, colour mixing and intensity can be individually adjusted)
- Available in cabinet heights of 700, 800, 850, 1000, 1150, 1450 mm (other versions on request)

EDGE STATEMENT LIGHT: HIGHLIGHTS

Individual light signature

Expressive accentuation

High-quality radiance

Strip (LINE) or point (DOTS)

Different lighting moods

Sustainable LED technology

Material flow

OPTIMUM PROCESSES

Workspace equipment is important for efficient workflows in your business. LISTA therefore offers you a wide range of storage and workstation systems that can be optimally adapted to your workflow and combined into a process-optimised solution. LISTA systems include storage solutions from universal shelving to warehouse lifts, the individually configurable workstation system, linking options, workbenches and mobile solutions. LISTA also provides driverless transport systems for the automated transport of goods and materials within the company. All in all: the best conditions for optimising your material flow.

ERP
CONTROLLED

Storage lifts
Further information on LISTA's space-saving, time-saving and cost-saving vertical storage system can be found in our LISTA LIFT brochure.

Workstation systems
See p. 106.

Shelving
See p. 218.

LISTA SLIM

LISTA SLIM provides you with a particularly efficient solution for your intralogistics. The system offers a high loading capacity with low unladen weight. The lifting height can be adjusted up to 3 m depending on the lifting capacity. At the same time, 360° collision protection, millimetre-accurate navigation and the automatic charging function ensure maximum safety and reliability.

LISTA FLOW

Its technical features and high functionality make the FLOW series one of the leading AGVs for loading capacities up to 1000 kg. Thanks to its combined navigation with laser/QR, it achieves optimum accuracy with the highest possible safety and efficiency.

Belt

Heavy Carrier

Castors

Order

Picking Fork

Picking Plus

OTHER AGV SOLUTIONS

In addition to vehicles for automated material flow in industrial environments, driverless transport systems for picking and sorting supplement the LISTA AGV range. This gives you the right solution for a wide range of applications, such as retail or shipping, from vertical pickers to manoeuvrable small sorters.

YOUR ADVANTAGES WITH DRIVERLESS TRANSPORT SYSTEMS

- Automated product movement
- Fast storage and retrieval
- Decreasing error rate
- Reduced product damage
- Reduced labour requirements
- Greater flexibility in the warehouse
- Improved safety at the workstation
- Exceptional value for money

ROBUST ALL-ROUNDERS

LISTA drawer cabinets provide a robust and well protected storage option for equipment and many other items. High-quality specifications and a variety of individual configuration options make these robust all-rounders ideal for a wide variety of requirements and environments. Their special design guarantees optimum space utilisation. In addition, housing and drawers can be variably partitioned, intelligently labelled, protected with access control and finished in almost any colour. Nowhere else will you find this degree of flexibility.

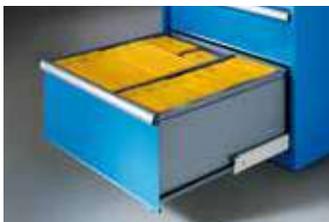

- + Utmost stability**
load capacity of housing up to 4 t; load capacity of drawers 75 or 200 kg
- + Can be utilised to the full**
since drawers can be fully extended and the drawer shell heights are optimised
- + Well protected**
against dirt, liquids and mechanical load through closed housing with impact and abrasion-resistant surface
- + Outstanding safety features**
safety catch to prevent unwanted drawer opening and anti-tilt mechanism to prevent opening of more than one drawer at a time
- + Corrosion protection**
with electrophoretic dip painting and environmentally-friendly powder coating
- + Optimum order and organisation**
thanks to special LISTA partition material for every purpose and perforated, slotted drawers
- + Professional labelling**
with LISTA Script labelling software and clip-on label holders which fold upwards
- + Perfectly smooth running**
through differential pull-out without a crossbar
- + Flexibly adaptable**
through pre-perforated holes for table tops (punch-outs), rollers, drawers, locking systems for easy retro-fitting and refitting
- + Secure locking option**
with interchangeable cylinder for adaptation to existing locking systems and electronic locking systems via CODE, RFID or AUTO Lock
- >> Fully compatible with LISTA partition material thanks to the standardised unit of measure** see p. 248

Drawer cabinets

+ Maximum use of drawer space

+ Perfectly smooth running

Optimum shell height

- drawer sides and rear panels the same height as the fronts
- maximum use of vertical space
- optimum protection against items falling out and loss of stored items

Full extension

- maximum use of horizontal space
- everything in view
- optimum access

Pull-out without crossbar

- perfectly smooth running and ease of movement through differential pull-out without a crossbar
- enables the drawer to be fully extended

Quiet locking tab

- special plastic cover in the locking tab
- smooth and quiet locking process

+ Professional labelling

+ Partition material for every purpose

Label holder which folds upwards

- on drawers, troughs, metal dividers, separators and housing
- for easy, clean and protected labelling

LISTA Script

The LISTA Script labelling software offers:

- numerous labelling options
- pictograms
- barcode generator

As a LISTA customer, you can download our LISTA Script labelling software free of charge from our website under Products › Accessories › LISTA Script.

The LISTA standard

Our drawer partition materials are standardised and therefore compatible with the entire LISTA range.

» Drawer partition material see p. 248

» LISTA Script slide-in labels see p. 268

Benefits of LISTA storage systems

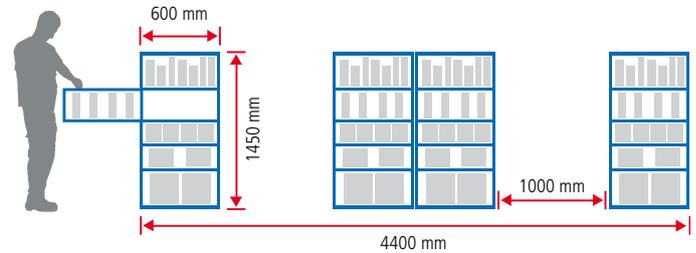

Storage in drawers

Storing small parts in drawers rather than on shelves ensures that stored items are protected from dust and contamination while saving space and optimising organisation. The entire contents of the drawer are visible in no time, whereas with a shelf, items may have to be moved or reached over to gain access.

- The depth of a compartment can be adapted to suit the stored items at any time, and any number of parts can be placed one behind the other
- By simply pulling out the drawer, you can clearly see the contents and have everything within reach in a truly space-saving way

+ Example of space requirement

Usable depth $4 \times 600 = 2400$ mm } Total 4400 mm
 Depth of aisle $2 \times 1000 = 2000$ mm }

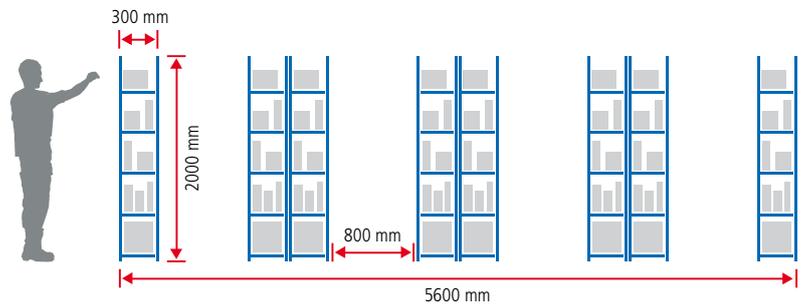

Storage on shelves

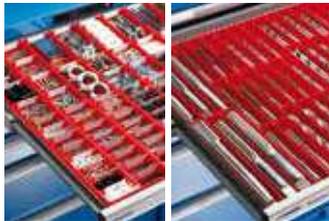

- If the parts are smaller than the depth of the shelves, there is a lot of unused space behind the goods
- If the items are stored behind one another, then space is needed for both visibility and access

- Example of space requirement

Usable depth $8 \times 300 = 2400$ mm } Total 5600 mm
 Depth of aisle $4 \times 800 = 3200$ mm }

+ Optimum order and organisation

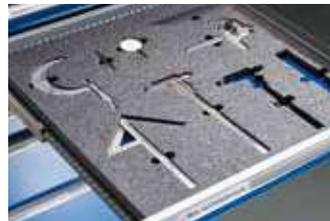

Plastic boxes and troughs
for small and cylindrical items

Tool holders
for NC storage

Metal separators
for different sized parts

PE foam inserts
for special and measuring tools

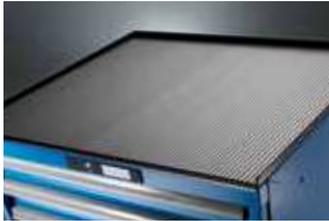

Perforated, slotted drawers hold items firmly in place

- a series of slots around the drawer walls hold the partitioning material firmly in place
- perforated drawer bases enable slotted dividers, metal separators, dividers, holding pins or milling cutter holders to be optionally screwed in place

LISTA Units	Depth 27 E				Depth 36 E

Drawer cabinets

+ Flexibly adaptable

Variable raised edges

- raised edges on three sides of stationary cabinets for simple and easy cleaning
- raised edges on four sides of mobile cabinets to protect the goods being transported

Punch out

- housing covers with pre-perforated holes which can be punched out
- for retrofitting with a table top or second drawer cabinet on top

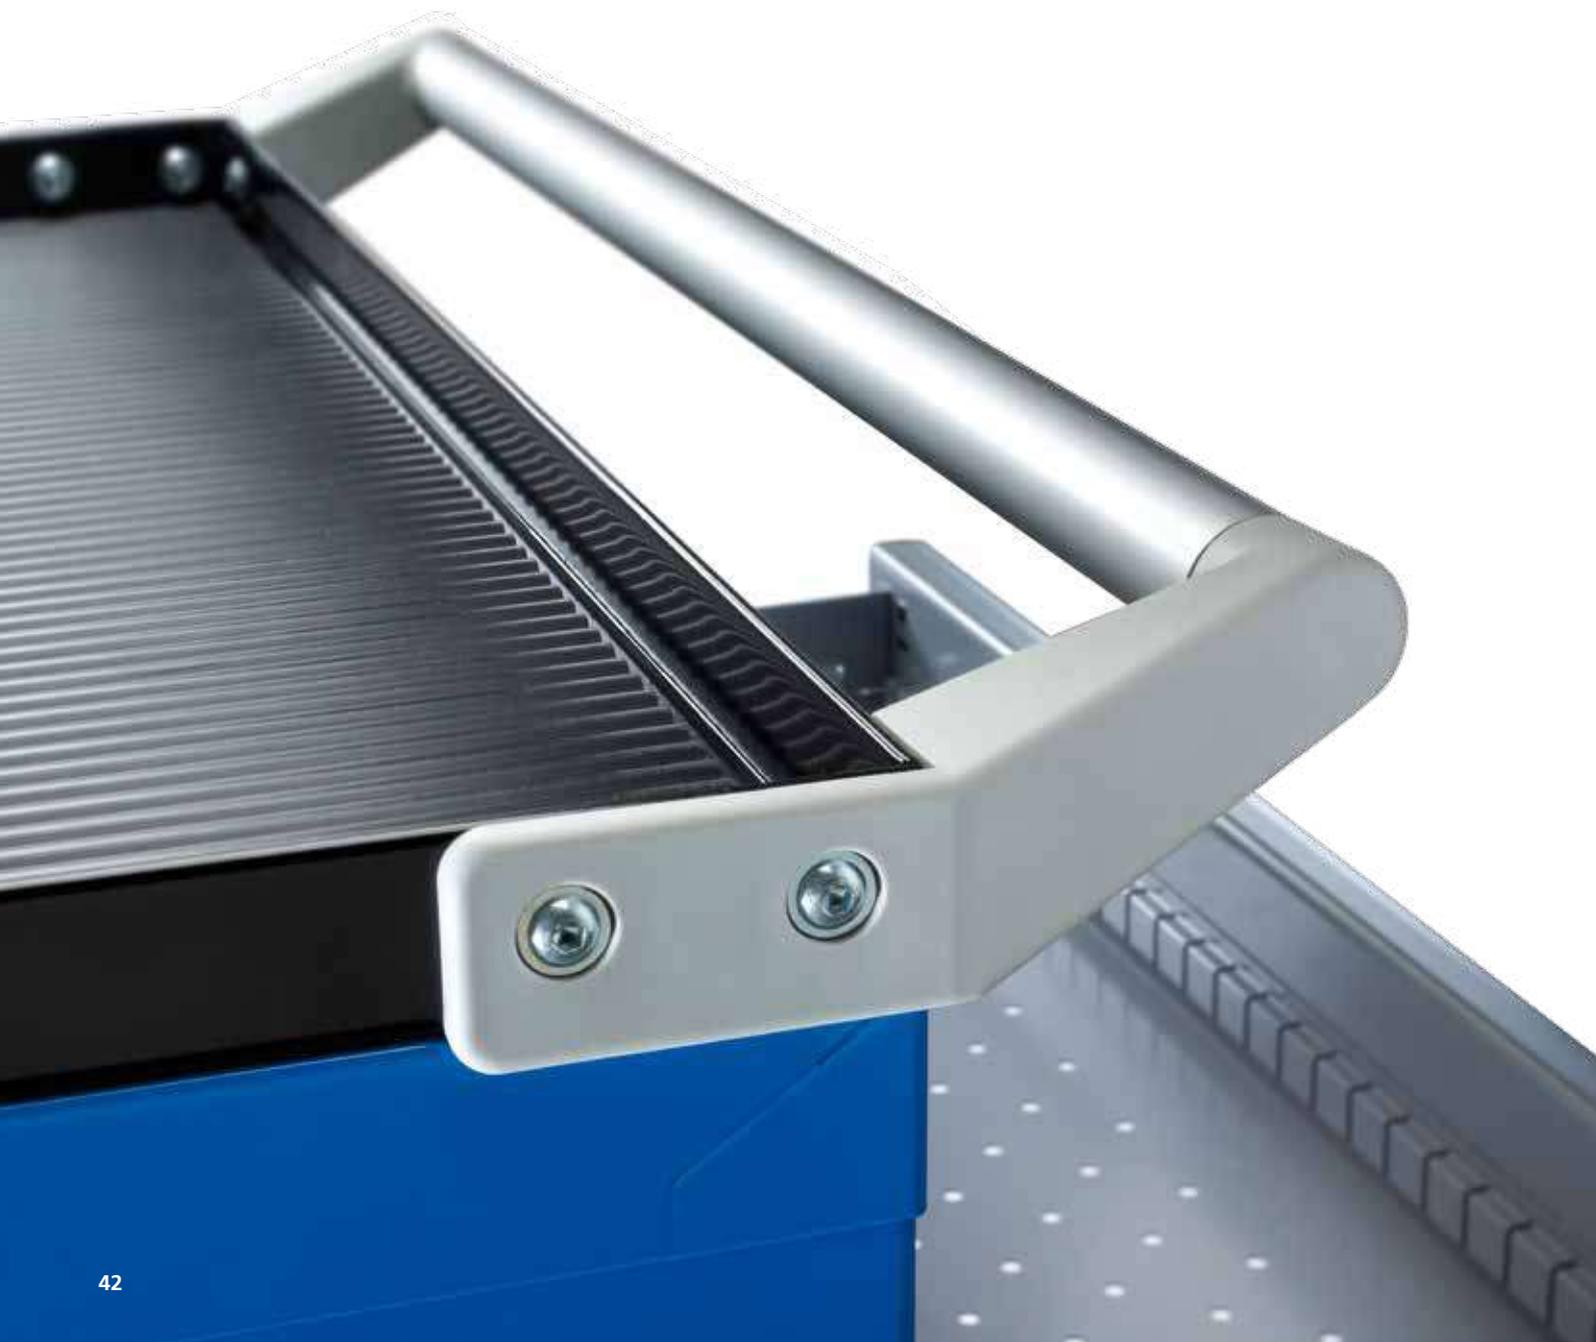

Base/forklift base

- optional base and forklift base (for drawer cabinets with a width of 36 E and over)
- makes it easy to adjust the height of the drawer cabinet
- enables the loaded cabinet to be lifted and moved with a forklift truck

Mobile cabinets

- Our mobile cabinets are supplied with:
- raised edges on all four sides and push-bar
 - black ribbed mat
 - two swivel castors with brakes
 - two fixed castors and single-drawer locking mechanism
- Stationary cabinets can be converted to mobile cabinets at any time.

+ Individual configuration options

As standard, LISTA drawer cabinets are available in seven different widths, two depths and a variety of heights. The configuration options in terms of size, equipment, locking system, colour and drawer partitions are almost unlimited.

Our drawer cabinets can be combined individually to suit any working environment in order to make maximum use of available space. They can be extended at any time and therefore offer a scalable solution tailored to your needs.

Typical configurations

Configuration as a drawer cabinet

Configuration as a drawer cabinet with recessed hinged door, pull-out shelves and adjustable shelves

Configuration as a drawer cabinet with drawers, recessed hinged door, pull-out shelves and adjustable shelves

Configuration as a mobile drawer cabinet with raised edges and a push-bar

Toolbox: Drawer cabinet with combined drawer widths (64/36/18 E).
Version: stationary or mobile

ESD version available on request

+ Outstanding safety features

Single drawer opening as standard

- prevents the cabinet from tipping over by blocking all other drawers when one drawer is pulled out
- allows for drawers to be moved around into a different arrangement at any time

Flush drawer front

- drawer handles with side covers which sit snugly within the front profile
- look good and are safe

Safety catches

- comply with all regulations against drawers accidentally falling out of cabinets
- reduce the risk of injuries at the workplace
- can easily be deactivated in order to move individual drawers

Information on load capacity

- the load capacity (75 or 200 kg) is inscribed on the drawer runners
- increased safety

+ Extra safety for stationary and mobile cabinets

Safety catch on right

- our standard safety catch for all mobile cabinets
- can be operated with one hand

Single safety catch on the right and left

- especially suitable for mobile equipment
- both hands are needed to operate them

Double safety catch

- has all the same features as the single safety catch on the left and the right
- easier to use since it can be operated with one hand

Lilo locking device

- with external lever for fixing the fully laden drawer in either open or closed position
- for a drawer load capacity of 200 kg

Drawer cabinets

Countless configuration options

Covers

Raised edges on three sides and ribbed mat, Resin-coated cover panel, Multiplex cover panel, Raised edges on 4 sides, with push-bar (for mobile cabinets)

Partition material

Slotted dividers, separators, trough walls, metal separators, label holders, plastic boxes and trough separators, milling cutter holders and holding pins, non-slip mats, foam inserts and much more.

Inserts and add-ons

Drawers, pull-out and adjustable shelves, hinged doors

Locking systems

KEY Lock, CODE Lock, RFID Lock or AUTO Lock

Substructures

Housing base, 2-way pallet/ forklift truck base, Pairs of castor holders, individual castors and levelling feet

▪ or options

... or configure and order cabinets individually

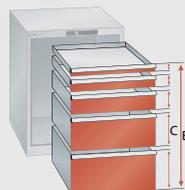

» Page 60–65

LISTA Units

1. Housing

2. Drawers

3. Accessories

» Page 248

4. Partition material

- select the cabinet floor area (e. g. 717 × 572 mm = 36 × 27 E or 717 × 725 mm = 36 × 36 E)
- LISTA Unit E × E = a unit of measure which helps to choose drawers and partition materials

- choice of various housing heights (A)
- the choice of housing always includes the choice of the preferred locking system and the colour

- define the height of the front, the load capacity, the colour and the type of safety catch
- sum of the drawer front heights (C) = clear height (B) (see diagram)

- can be equipped with drawers and doors
- select the cabinet accessories
- mobile cabinets must have a drawer safety catch and a push-bar

- select the partition material for the drawers
- N.B.: take the drawer height and usable surface into account!

12 standard colours

Maximum flexibility thanks to free choice of colours

All products with a choice of colours are available in 12 standard colours and 6 colour combinations without surcharge. The three-digit colour code (e.g. **.010**) forms part of the article number. When ordering, please complete the article number by adding the desired three-digit colour code (e.g. **70.701.010**). Housings and drawers can also be ordered in different colours.

Drawer cabinets | stationary and mobile

In addition to the stationary versions, all LISTA drawer cabinets are also available as mobile cabinets. This increased mobility provides greater convenience and gains extra space. Mobile cabinets enable you to transport stored items easily and quickly and can conveniently be stored under a work surface if space is at a premium.

+ Greater mobility
through smooth-running nylon and rubber castors, depending on the properties of the floor

+ Optimum use of space
when positioned under work surfaces

+ Safe and convenient
thanks to raised edges all round, ergonomic push-bar and additional drawer safety mechanisms

Equipped with drawers and doors

Drawer cabinets can optionally be fitted with drawers and a door. Because the door is recessed, special pull-out shelves are used. As standard, the two locks have different keys. Identical locks or a CODE/RFID Lock locking system are available on request (CODE/RFID Lock is not available for doors).

Art. no. **78.524.522**

2. Drawers

Drawers with different front heights can be incorporated into the same cabinet housing in any order. The insides of the drawer walls are all fitted with a slotted grid in units (E) of 17 mm, which means each drawer can be partitioned as required.

Select load capacity

Drawer safety catches

Standard: standard model including single drawer safety catch (all article numbers from the table).

Safety catch on right: the minimum requirement for mobile drawer cabinets. One-sided drawer safety catch on the right can be released with one hand and prevents accidental opening of drawers even if the cabinet is unlocked.

i When ordering a **single safety catch on the right**, please add the suffix "**R**" to the article number in the table (e.g. **72.034.XXX.R**).

Ordering tips

When selecting drawers, the clear height of the cabinet housing defines the size. The sum of the drawer front heights (C) must be equal to the clear height (B) (see diagram).

Recessed hinged doors for pull-out and adjustable shelves

Made from sheet steel as a front closing option for the pull-out and adjustable shelves built into the housing beneath the drawers. Equipped with a recessed grip and magnetic catch incl. KEY Lock. The sum of the hinged door front heights and all drawer front heights must be equal to the clear height of the cabinet housing.

Pull-out and adjustable shelves for recessed doors

Made from steel sheet, pigeon grey, NCS S 4502-B. Load capacity of pull-out shelf 75 kg, adjustable shelf 200 kg. Thanks to the 25 mm increments in the vertical supports of the cabinet housings, different shelves can be fitted in the same housing in any order.

Raised edges on 3 sides and ribbed mat

Made from sheet steel, black, NCS S 9000-N, including ribbed mat, black.

Cover panel, resin-coated

Surface and edging light grey, NCS S 1500-N, laminated chipboard (quality class E1), with melamine coating on both sides (manufactured according to standard EN 14322). 2 mm thick plastic edging on all sides. Including pre-drilled holes and fastening material.

Multiplex cover panel

Made of steamed beech veneers, glued in multiple layers and waterproof (DIN 68 705), bevelled edges, sanded, oiled and waxed surface. The panel is splash-proof, dirt-repellent and largely impervious to oil and grease. Including pre-drilled holes and fastening material.

Folding countertop

Attaches to the side of the drawer cabinet (depth 27E). It can be mounted either on one side or on both drawer cabinet edges and offers a work surface up to 1000 mm (2 x 500 mm) wider. It is operated one-handed. Multiplex top, sanded, oiled and waxed surface. Load capacity 25 kg, Housing incl. 10 x 10 square perforation, 38 mm divisions with slots, for cabinet height 850 mm.

Push bar

This push bar can be mounted for the mobile version of drawer cabinets without raised edges in the transverse direction of travel. Galvanised steel, Ø 22 mm, curved.

Perforated side panel

To allow accessories (waste container, protective earth socket retaining bracket) or keyhole hooks to be attached to the side of the drawer cabinet (depth 27 E), this perforated plate can be fastened to the side of the housing cabinet. Square perforation 10 × 10, 38 mm divisions with slots. Design for housing height 850 mm. Sheet steel design. Colour: as per colour chart.

Housing base

Made from sheet steel, as height compensation, black, NCS S 9000-N.

2-way pallet/forklift truck base

Made from sheet steel for screwing to the underside of the housing, black, NCS S 9000-N. **Base cover only** for attaching as a cover on the front or rear.

Raised edges on 4 sides, with push-bar

Made from sheet steel, black, NCS S 9000-N, including ribbed mat, black. Push-bar consisting of a pair of plastic handle grips, RAL 9006 white aluminium, and aluminium tube Ø 25 mm, clear anodised.

Pair of castor holders

Consisting of 2 swivel castors with brakes and 2 fixed castors. Castor holders, sendzimir galvanised. Nylon castors black, rubber castors grey.

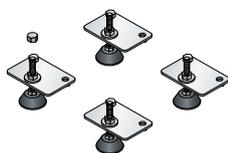

For safety reasons, mobile drawer cabinets must be fitted with a push-bar and a single drawer safety catch.

Protective strip

Made of black polythene, including fastening screws for mounting on the sides of the drawer cabinet. Two protective strips must be attached to each side.

Levelling foot set

Set consisting of 4 plastic pivot feet, Ø 50 mm, including mounting plates and fastening screws. Adjustment range: 45 – 90 mm. Load capacity: 1200 kg/foot. Art. no. **69.919.000**

Levelling foot set for cover plates

Set consisting of 2 pairs of levelling feet (4 plastic articulated feet), Ø 50 mm, mounting plates designed for the levelling foot holder, incl. fastening screws. Adjustment range 45–90 mm. Load capacity 1200 kg/foot

Levelling foot covers

made of sheet steel, powder-coated white aluminium RAL 9006. Cover plate height 50 mm. Prevents small parts from getting under the cabinet. Closed look. The levelling foot set (69.920.000 or 69.921.000) is required for assembly. Cover plate can also be retrofitted afterwards.

Drawer cabinets with a power supply are perfect for the centralised supply of rechargeable batteries and electrical devices. All cabinets can be configured individually and adapted to your specific storage needs through the flexible use of partition material, cabinet accessories and power supply via power modules.

+ Flexible range of applications
with charging options for battery-operated electrical machines, BDE devices, notebooks, tablets and smartphones

+ Perfect cable management
via cable openings (punch-outs) for protected and orderly cable routing

+ Great design diversity
with sockets, on/off switch, power USB

+ Outstanding safety features
CE compliant

>> General benefits of LISTA drawer cabinets
see p.38/39

1. Cabinet housing

Housing incl. punch-outs for power supply, incl. cable harness, excl. connection cable with earthing (must be ordered separately according to the lower version). For simultaneous securing of all drawers. Incl. KEY Lock, our standard locking system with replaceable cylinders. Manual opening/locking with key.

i When ordering a cabinet with **CODE Lock**, please add the suffix **"C"** or for **RFID** or **AUTO Lock** the suffix **"F"** or **"A"** to the article number from the table (e.g. **74.915.XXX.C**).

» Other locking systems: see p. 28–31

»	Cabinet accessories, see from page 62	»	Partition material see from page 248

2. Drawers

Drawers with different front heights can be incorporated into the same cabinet housing in any order. The insides of the drawer walls are all fitted with a slotted grid in units (E) of 17 mm, which means each drawer can be partitioned as required.

Ordering tips

When selecting drawers, the clear height of the cabinet housing defines the size. The sum of the drawer front heights (C) must be equal to the clear height (B) (see diagram).

* Drawers with front height of 50 mm must be placed in the top position.

! Max. 3 drawers with power supply per cabinet.

Bespoke workshop design to suit your line of work. Workshop equipment from LISTA has been tried and tested thousands of times in diverse industries. The modular design and excellent quality ensure that LISTA applications fit perfectly, are durable and robust. Special industry requirements are consistently met.

+ Modular system design concept
offering flexible configuration in terms of size, equipment, locks, colour, etc.

+ Best industrial quality
by using high-quality materials with a high level of in-house production and a 10-year guarantee

+ Fully compatible
with freely combinable modules, uniform and attractive look and feel consistent with your corporate design in all areas: workshop, warehouse, staff room, etc.

+ EDGE design
More contouring for your workshop with an individual light signature

>> Benefits of LISTA workshop add-on modules

Toolbox

Folding countertop

Integrated folding countertop module, single-handed operation. Load capacity: 25 kg. Multiplex top: 564 × 500 × 20 mm. Designed for drawer cabinet depth 27 E and drawer cabinet height 850 mm. See page 73.

Perforated rear panel for Toolbox 64 E

Self-supporting perforated rear panel module, direct mounting on the drawer cabinet. Square perforation, 10 × 10 mm, 38 mm divisions with slots for holding accessories, usable height 360 mm. Colour as per colour chart. W × H: 1193 × 550 mm See page 73.

Countertop

This multiplex worktop has been specially adapted to the 64 × 27 E drawer cabinet to ensure a flush transition to the folding countertop Multiplex top: 30 mm (W × D: 1193 × 572 mm).

Cabinet toolbox 6427E/3 and 6436E/3

The toolbox system for dimensions 64 × 36 E and 64 × 27 E (H: 850 mm) offers the flexible option of accommodating combined drawers in the dimensions 64, 36 and 18 E. See page 73. There are also various accessories that allow the cabinet to be individually configured as a small mobile workstation.

Perforated side panel

Integrated perforated side rear panel module with 10 × 10 mm square perforation, 38 mm divisions with slots for holding accessories. Designed for drawer cabinet depth 27 E and drawer cabinet height 850 mm H × D: 755 × 570 mm. Sheet steel design. Colour as per colour chart.

1. Cabinet housing with locking systems

To have simultaneous locking of all drawers, each cabinet housing can be configured individually using the KEY Lock system.

Housing with KEY Lock

2. Drawers

Drawers with different front heights can be incorporated into the same cabinet housing in any order. The insides of the drawer walls are all fitted with a slotted grid in units (E) of 17 mm, which means each drawer can be partitioned as required.

Drawer safety catches

Safety catch on right: the minimum requirement for mobile drawer cabinets. One-sided drawer safety catch on the right can be released with one hand and prevents accidental opening of drawers even if the cabinet is unlocked.

i When ordering a **single safety catch on the right**, please add the suffix **"R"** to the article number in the table (e.g. **72.034.XXX.R**).

Ordering tips

When selecting drawers, the clear height of the cabinet housing defines the maximum size. The sum of the drawer front heights (C1 + C2) must correspond to the clear height (B1: 200 mm + B2: 500 mm), see diagram.

For further drawers, see p. 60/61

Drawer cabinets I with hinged or sliding doors

LISTA drawer cabinets with hinged or sliding doors are ideal for large and heavy inventory items. The doors enable tall items to be safely locked away and protected from dirt, damage and unauthorised access. The flexible inner partitioning options and a variety of locking systems ensure that you have the best solution for your needs – all with lots of clever details and a 10-year guarantee. Just as you would expect from LISTA.

+ **Additional storage space and work surfaces**
through non-slip, easy-to-clean covers with raised edges all round

see p. 38/39

>> **Drawer cabinets with hinged or sliding doors for NC storage**
see p. 76/77 and 100

+ Ideal for large and heavy inventory items up to 200 kg / drawer

with pull-out shelves for flush storage

+ Securely lockable

with a choice of hinged doors or space-saving sliding doors

+ Can be adapted to new storage items at any time

because drawers, pull-out shelves and adjustable shelves can be flexibly added or modified in 25 mm increments

+ Can easily be moved with a forklift truck

even with loaded cabinets, by using forklift truck bases

Top-mounted cabinets for drawer cabinets

Lots of storage in a small space: LISTA top-mounted cabinets provide additional storage area when space is at a premium. The stored items are in plain sight and easy to reach because they are positioned at viewing height. LISTA top-mounted cabinets are perfectly coordinated with our drawer cabinets and made from high-quality steel. In short: the perfect add-on for fast access to tools and equipment supporting continuous improvement processes such as Kaizen and 5S.

Extra storage area

when space is at a premium

Everything in sight

through viewing windows made from UV-resistant shatterproof acrylic glass

Extremely user-friendly

since the items stored are within easy reach

Securely lockable

with a choice of hinged doors or space-saving sliding doors

Can be adapted to new storage items at any time

because adjustable shelves can be flexibly added or converted in 25 mm increments

Benefits of LISTA drawer cabinets

Locking systems

The standard **KEY Lock** locking system with replaceable cylinders allows easy adaptation to existing locking systems. Further locking systems, e.g. CODE Lock and electronic locking via RFID transponder on request.

Doors with viewing windows

Provide an open view of the contents and also encourage users to keep the contents tidy.

Pin hinged doors

Doors are flush with the cabinet housing. Opening angle approx. 115°.

Turn and push cylinder lock and smooth, quiet operation

Cannot be prised out thanks to a bar bent to right angles. The ball bearing rollers of the sliding doors run very quietly on the guide rails.

MORE FLEXIBLE THAN EVER

The new LISTA workshop trolley L3627 has been optimised for you in all of its key features and now offers you even more benefits, functions and improved ergonomics. In addition to even greater load capacities, its flexibility and adaptability make it the perfect solution for every area in the workplace. Because the basic models can be expanded to meet requirements at any time with versatile superstructures and add-ons.

- + Optimum load capacities**
Load capacity 40 kg per drawer, 400 kg housing
- + Can be utilised to the full**
since drawers can be fully extended and drawer shell heights are optimised
- + Absolutely safe to work with**
Central locking and single drawer opening protection against accidental opening when in motion
- + Flexibly adaptable**
through perforated side and rear panels for holding accessories and tool hooks
- + Extremely user-friendly**
with robust, ergonomic push handle
- + Full mobility**
thanks to the smooth-running fixed and swivel castors (two of each) in solid rubber
- + Additional storage space and work surface**
through hard-wearing wooden cover or non-slip plastic cover with compartments for small parts
- + Additional safety**
through rounded corner pieces made from ABS plastic which act as buffers
- >> Fully compatible with LISTA partition material thanks to the standardised unit of measure**
see p. 248

+ Fully modular and available in a wide range of versions

Depending on use and individual requirements, the basic models can be flexibly expanded in many ways by means of optional accessories.

Fully extendable without crossbar

- load capacity 40 kg
- enables it to be fully extended
- extremely smooth-running with great ease of movement

Partition material

- perforated, slotted drawers hold items firmly in place
- extensive range of partition material in the LISTA measurement unit see p. 248

Labelling

- handle folds upwards
- easy, clean and protected labelling

Single safety catch

- can be operated with one hand
- protects against accidental opening when in motion

Central locking

- a central locking system for all drawers
- secure and easy to use

Smooth-running castors

- two fixed castors
- two swivel castors including brake
- in solid rubber
- with generous \varnothing 100 mm

Push bar

- robust
- ergonomic
- material: anodised aluminium

Corner pieces

- protect against damage and also protect other workshop equipment or vehicles in the event of accidental contact
- material: ABS plastic
- colour: black, RAL 9005.

Wooden cover

- hard-wearing
- sanded, oiled and waxed surface
- material: Multiplex

Plastic cover

- non-slip
- including compartments for small parts
- material: ABS plastic
- colour: black, RAL 9005.

Perforated side panel

- perforated and slotted for holding accessories and keyhole hooks
- so that everyday tools are always ready to hand

Perforated rear panel

- for fixing to the rear of workshop trolleys
- perforated and slotted for holding accessories and keyhole hooks see p. 162
- ergonomic tool arrangement

STRONG AND SAFE

LISTA drawer storage walls are perfect for storing large, heavy single items or a large number of small items and keeping them clearly organised and protected from dust and dirt. All add-ons, drawers, pull-out shelves and adjustable shelves can be freely combined with one another. This enables a wide variety of different types of installation – even inside trucks and containers. The necessary changes can be made simply by reorganising the individual elements. This means that you can adapt your system to new logistics requirements at any time, so that you always have: A Solution to Match Your Needs. With all the benefits of our drawer cabinets.

- + Utmost stability**
through robust, sturdy design with a load capacity of up to 5.5 t per shelving unit
- + Large storage capacity with minimum space requirement**
since shelves can be up to 8.50 m high
- + A wide variety of equipment options**
with different pull-outs and shelves
- + Vertical pull-outs for clearer organisation and improved safety at work**
as a space-saving and user-friendly solution with direct access to the stored goods from both sides
- + Heavy-duty pull-outs**
with load capacities of up to 350 kg for especially large and heavy items
- + User-friendly**
through swing-out and sliding safety ladders for easy access to the upper shelves and drawers
- + Secure locking**
with a choice of roller shutters, hinged doors or space-saving sliding doors, optionally with viewing windows
- + Can be adapted to new storage items at any time**
through the flexible integration and rearrangement of drawers, pull-out shelves and adjustable shelves in increments of 25 mm
- >> Benefits of LISTA drawer cabinets**
see p. 38/39
- >> Fully compatible with LISTA partition material thanks to the standardised unit of measure**
see p. 248

+ A wide variety of equipment options

9

Fully extendable drawers

- load capacity 75 kg or 200 kg
- differential pull-outs without crossbar for perfectly smooth running
- for details see p. 40

11

Fully extendable pull-out shelves

- load capacity 75 kg or 200 kg
- differential pull-outs without crossbar for perfectly smooth running
- inserts provide flush storage
- pull-out shelves with eyelets for fixing heavy parts on request

14

Vertical pull-outs

- up to a load capacity of 200 kg (500 kg on request)
- for suspended and protective storage of pre-set tools
- optionally available with storage shelves, adjustable shelves, NC holder attachments and perforated panels

12

Heavy-duty pull-outs

- up to a load capacity of 350 kg
- extremely smooth running
- wood or steel inserts and ribbed mats are available

7 8

Adjustable and universal shelves, partitions and shelf side panels

- adjustable shelves: load capacity up to 200 kg, can be attached without screws
- universal shelves: up to a load capacity of 250 kg, can be fixed with screws
- optionally either plain or slotted for subdividing with partitions and side panels

6 10

1

Stable side frames

- for shelf heights up to 8.50 m over several storeys
- can be covered with side panel covers
- also available for special inserts and mobile equipment on request

18

Secure locking

- with lockable hinged doors
- sliding doors and roller shutters on request

+ Individual configuration options

LISTA drawer storage walls are available in two depths and can be configured to suit your exact individual requirements. The LISTA Unit enables all individual parts, drawers and partition materials to be freely combined with one another and quickly and easily replaced or added to.

Typical configurations

D **27 E**

Installed depth 553 mm

- ideal for locations with limited available space
- preferred system for use inside containers
- reduced depth makes it easy to remove heavy parts

D **36 E**

Installed depth 706 mm

- maximum flexibility through large selection of products and accessories
- allows vertical pull-outs and heavy-duty pull-outs to be used
- available in five different widths

Dimensions and load capacities see next page

+ Flexible range of applications

Mobile equipment

- in containers and trucks

Medicine storage

- well-organised and within reach

+ User-friendly

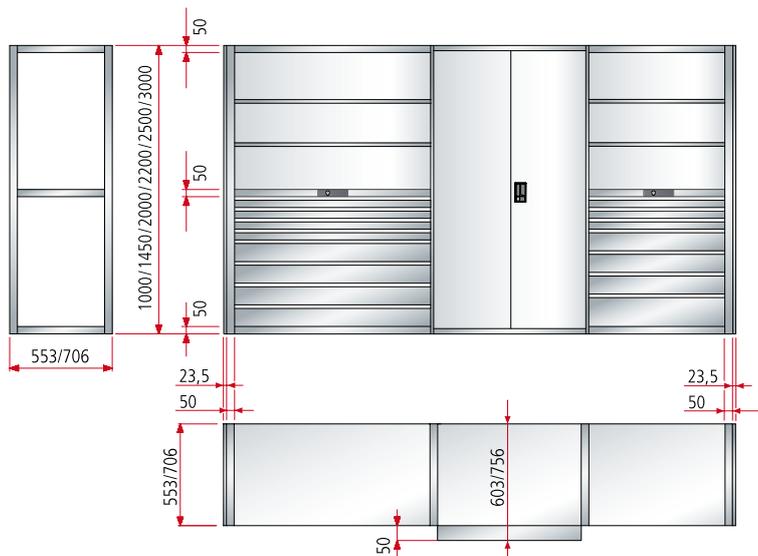

Safety ladders

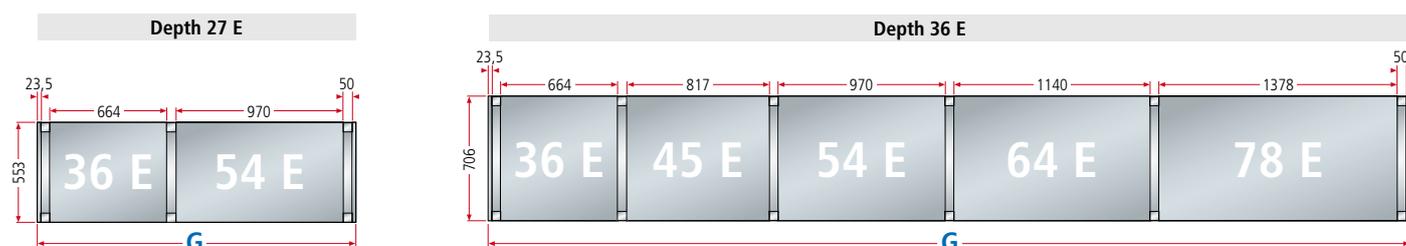

- can be swung out and moved sideways for easy access to the upper shelves and drawers

Drawer storage walls

Dimensions and load capacities

G = Unit length (without side panels) = sum of installed widths + sum of side frames
 Unit length (with side panels) = sum of installed widths + sum of side frames + 47 mm

Unit widths for depth 27 E and 36 E

W → LISTA Units	36 E	45 E	54 E	64 E	78 E
Installed widths mm	664	817	970	1140	1378
Side frames	50	50	50	50	50
Side panel cover	23,5	23,5	23,5	23,5	23,5

Configure and order drawer storage walls individually

- LISTA Units**
- 1. Side frames and stabilising elements**
 - Select floor area of storage wall $W \times D$ (e.g.: 664×706 mm = 36×36 E)
 - LISTA Unit $E \times E$ = measurement unit for selecting side frames, stabilising elements, shelves, drawers and hinged doors
 - Select height of side frames H
 - Select stabilising elements: rear panel or diagonal brace
 - Floor anchor, drawer storage walls must be anchored
 - Optional: levelling plates, frame pillar top covering, intermediate fill-in strip, side panel covers and partitions
 - 2. Universal, locking and fixed shelves**
 - Depending on the height of the unit, a minimum number of universal shelves are necessary – please refer to the table
 - Fixed and locking shelves including locking systems are used when drawers need to be lockable. Here, the universal shelves can be dispensed with entirely or used as a top shelf for the top of the side frames.

Diagonal brace arrangement

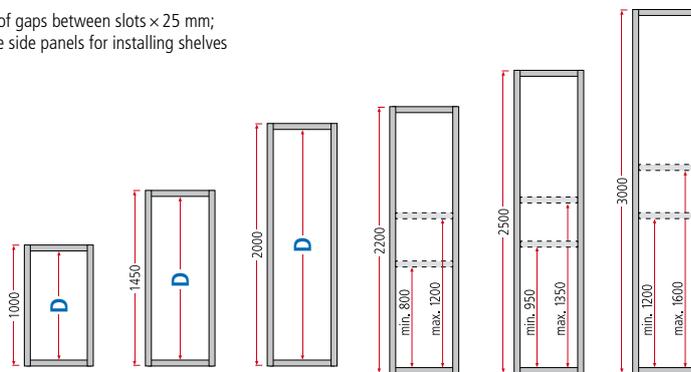

The load capacities only apply for six shelf units or more two shelf units or at least every fifth shelf unit has rear panels or every third shelf unit has a diagonal brace. From a unit height of 2200 mm an additional universal shelf is required as an intermediate shelf. In the case of two-storey systems, the lower story in every third unit must be fitted with a diagonal brace or rear panel.

Anchoring rule

All drawer storage walls must be anchored. 1 anchor is included for each side frame. Exception: double-sided drawer storage walls which are screwed together back-to-back do not need to be anchored.

Note: when using only one mounting fixture per side frame, it must be attached to the rear.

D = Clear height = number of gaps between slots × 25 mm; slots every 25 mm in the side panels for installing shelves and drawers

Wall heights and load capacities

H ↑ mm	1000	1450	2000	2200	2500	3000
Clear height D mm	900	1350	1900	2050	2350	2850
Load capacity per shelving section						
min. number of universal shelves	2	2	2	3	3	3
min./max. installed height for the middle universal shelves from floor (mm)	-	-	-	900–1300	1050–1450	1300–1700
load capacity per shelving section	5500 kg	5000 kg	4500 kg	5500 kg	5250 kg	5000 kg

3. Fitments

- Selection of adjustable shelves, drawers, pull-out shelves and heavy-duty pull-out shelves as desired
- Optional: dividers for adjustable shelves, slotted
- Optional: partition material see p. 248

4. Front-mounting fitments

- Lockable hinged doors over partial and total height
- Sliding doors, roller shutters on request

! In order to comply with regulations and for reasons of safety, drawer storage walls must consist of at least the following elements:

- Side frames
- Floor anchoring
- Rear panels OR diagonal braces
- Universal shelves (plain or slotted)

» Individual elements see p. 92–99

Drawer storage walls | heavy-duty versions

For storing heavy single parts and appliances, LISTA drawer storage walls have drawers and pull-out shelves with a load capacity of up to 200 kg. This gives you maximum flexibility – especially when storing NC tools.

+ **Ideal for large and heavy inventory items up to 200 kg per drawer**
with pull-out shelves for flush storage

+ **Extremely smooth running**
through differential pull-outs without crossbar

+ **Can be adapted to new storage items at any time** through the flexible integration and rearrangement of drawers, pull-out shelves and adjustable shelves in increments of 25 mm

>> **Benefits of LISTA drawer cabinets**
see p. 38/39

>> **Drawer storage walls for NC storage**

i Drawer load capacity
up to 200 kg

Universal and adjustable shelves

The universal shelves (load capacity 250 kg) are screwed to the side frames. The adjustable shelves (load capacity 200 kg) are attached to the side frames by means of shelf supports and can be adjusted for height. Usable dimensions: W 970 x D 701 mm.

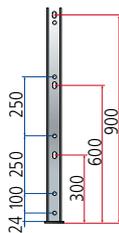

Pull-out shelves

For the storage of heavy items and assemblies which can be stored flush with the handle by using a sheet metal insert. Fully extendable. Load capacity 75 or 200 kg. Height-adjustable in 25 mm increments.

» For more universal, adjustable and pull-out shelves see p. 94 and 98

» For suitable partition material for drawers see p. 248

Drawer storage walls | side frames, stabilising elements

Fastening

! Side frames

Side frame with perforations 25 mm apart on both sides, for mounting of runners or shelf supports. Front and rear pillars are welded into a solid frame with horizontal struts. The side frames can optionally be equipped with screw-on locking profiles. With perforations on the back, for screwing to the container wall using horizontal C-brackets. Including 1 floor anchor. Model: frame pillars including horizontal braces made of steel extrusions. Colour: as per colour chart.

Locking profile

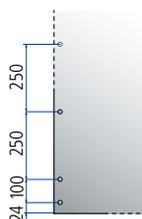

Screw-on locking profile for use of drawers and pull-out shelves with single and double safety catches. Colour: as per colour chart.

Frame top covering

For covering the top of the side frames. Specification: steel sheet. Colours: as per colour chart.

Intermediate fill-in strip

To close off intermediate spaces when shelves are placed next to each other at the same height. Including 2 holding bars. Cannot be inserted between side panels and shelves. Specification: Sheet steel. Colours: according to colour chart.

Fastening

! Rear panels

Rear cover for row of shelving units. Help to stabilise the shelving units lengthwise. Can be used for base and add-on units. Rear perforations for screwing rear panels to a container wall using horizontal C-brackets. Including screw fasteners. Can be stabilised with diagonal braces instead of rear panels. Specification: steel sheet. Colours: as per colour chart. Joint cross-section: anthracite grey, RAL 7016.

or...

! Diagonal braces

Used instead of rear panels to stabilise units lengthwise. Including screw fasteners. Specification: galvanised steel.

! In order to comply with regulations and for reasons of safety, drawer storage walls must consist of at least the following elements

Drawer storage walls | panels and shelves

Side panel covers

Side cover for row of shelving units. For hanging on the side frames by means of shelf supports. Including floor anchor. Specification: steel sheet. Colours: as per colour chart.

Partitions

For retrofitting by hanging in the side frames. Serves to protect against theft, especially behind sliding doors, hinged doors and roller shutters. Can be used on left and right. Specification: steel sheet. Colours: as per colour chart.

N.B. Remember to order a nut holder for fastening the shelf.

Shelf side panels

Used to cover a side end where an intermediate fill-in strip cannot be used to close an intermediate space. Attached to the side frames. Can also be used with folding fronts. Model: Sheet steel. Colour: Light grey, RAL 7035.

Delivery: as a pair (left and right version)

* Min. clear height mm of compartment equals height + 50 mm.

Folding fronts

Can only be used with universal shelves. Fold 180 degrees downwards. Equipment: Double safety catch, labelling strip throughout, handle covers and self-adhesive labels. Colours: according to colour chart.

! Universal shelves, plain or slotted

Screwed to the side frames as top and bottom closure and intermediate shelf. Including screw fasteners. Choice of plain or slotted versions. Slots 15 mm apart for subdividing partitions. Specification: steel sheet. Colours: as per colour chart.

Adjustable shelves, plain or slotted

Are inserted between the side frames using shelf supports, with welded strengthener. Choice of plain or slotted versions. Slots 15 mm apart for subdividing with partitions. Including 4 shelf supports each. Specification: steel sheet. Colours: as per colour chart.

Partitions

To subdivide the slotted universal and adjustable shelves. Specification: steel sheet. Colour: light grey, RAL 7035.

! In order to comply with regulations and for reasons of safety, drawer storage walls must consist of at least the following elements

Drawer storage walls | drawers, locking and fixed shelves

Select load capacity

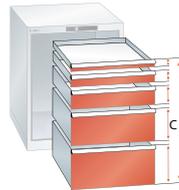

i When ordering a **single safety catch on the right**, please add the suffix **"R"** to the article number in the table (e.g. **72.034.XXX.R**).

Drawers

Drawers with different front heights can be incorporated into the same shelf unit in any order. The insides of the drawer walls are all fitted with a slotted grid in units (E) of 17 mm so that each drawer can be partitioned as required.

Ordering information

When selecting the drawers, the clear height of the wall defines the maximum size. The sum of the drawer front heights (C) must be equal to the clear height (B) (see diagram). For filling and loading the drawers and drawer walls please follow the installation manual and observe the loading rules. Load capacity applies to an evenly distributed load.

KEY Lock

The standard locking system with replaceable cylinders makes it easy to adapt to existing locking systems. The locking system secures all drawers simultaneously.

CODE Lock

Here the key is replaced by a simple numeric combination. A simple four to six-digit numeric combination is sufficient to open the drawer.

RFID Lock

The LISTA RFID Lock enables automatic and contactless locking through radio frequency identification. After a positive RFID read a rotary handle must be turned by hand to unlock.

AUTO Lock

Like LISTA RFID Lock, opens and locks the cabinet automatically without manual operation. Access and locked time management with LISTA Access software via USB.

Pull-out shelves

For storing heavy individual items and equipment. Variable fitting heights of 25 × 25 mm in the side panels. The inserts enable stored items to be stored and removed flush with the handle. Specification: steel sheet. Colours: as per colour chart. Bottom inserts are made of galvanised steel.

Heavy-duty pull-outs

Heavy-duty pull-outs are mainly used in machine tool production for storage of assemblies and tools. Even with a heavy load, the heavy-duty pull-out is easy to use. With a welded construction and pull-out frames running on multiple ball-bearings. The runners can be built directly into the side panels of the drawer walls of sizes 54 × 36 E without any adjustments. Specification: Shaped steel sheet. Colour: Grey, NCS S 4502-R.

Inserts and supports for heavy-duty pull-out shelves

Multiplex top: Can be inserted without screwing into the heavy-duty pull-out shelves. Made of steamed beech veneers, glued in multiple waterproof layers, rounded corners. Sanded, oiled and waxed surface. The top is splash-proof, dirt-repellent and largely proof against oil and grease.

Slat inserts: can be inserted without screwing into the heavy-duty pull-out shelves. Specification: Sendzimir galvanised shaped sheet steel.

Ribbed mats: provide protection. To be placed on top of the wooden inserts or on the metal slat insert panels. Specification: includes self-adhesive strips. Colour: Black.

Hinged doors made of full sheet steel or equipped with viewing windows

With two panels and a two-point rod lock with a recess for a clasp lock. The hinged doors can be retrofitted to all shelf units. Specification: sheet steel or sheet steel with viewing windows. Colours: as per colour chart.

For the version with **hinged doors**, the **clasp lock** shown below must be ordered separately.

Clasp locks

The standard KEY Lock locking system with replaceable cylinders makes it easy to adapt to existing locking systems. With CODE Lock, the key is replaced by a simple numeric combination. The LISTA RFID Lock enables automatic and contactless locking through radio frequency identification. After a positive RFID read the handle is operated by hand.

PROFESSIONALS AT WORK

NC storage and transport systems made by LISTA give you the perfect solution for your tool logistics. Our NC modules not only provide professional storage in inserts specially optimised for your machining and cutting tools, but also a safe method of transporting them. Tools are stored in a space-saving and organised way and are always within reach and ready for use. That's not all: our NC modules can be individually equipped and can of course be freely combined with the entire LISTA system in order to make the best possible use of the valuable space in your production facility.

+ Safe, neat and orderly storage
in high-quality inserts made from break-proof, impact-proof and oil-resistant ABS material tailored to hold your cutting tools

+ Optimum use of space
because these high-capacity systems are not only space-saving, but the tools are just where you need them – right next to the machine

+ Customised and easy to assemble
using tool holders with snap fasteners for tool-free insertion and removal

+ Secure transport
thanks to robust and stable design

+ User-friendly and ergonomic
because tool holders can be fitted at an angle and shelves and drawers can be pulled out

>> Benefits of the LISTA drawer cabinets
see p. 38/39

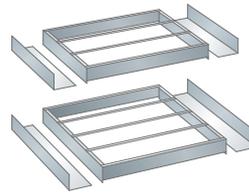

Partitioning schemes for NC tool containers

The capacity of each of the different storage and transport units for NC tools is given in the table below. The partitioning scheme for each type of tool is given next to the corresponding article number. With this scheme you can use the table to calculate the maximum capacity for each storage and transport unit used.

Insert frames in drawers and NC transport units

Units (E)	Dimensions mm (W×D)	A	B	D	E	F	G	H
36 × 27 E*	612 × 459	27	24	21	18	15	12	3
54 × 27 E	918 × 459	42	39	33	27	24	21	–
36 × 36 E*	612 × 612	36	32	28	24	20	16	4

* also for NC transport units

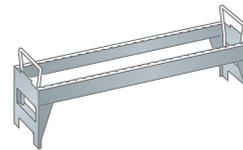

NC storage in vertical pull-outs

54 E**	946 × 140	16	14	12	10	8	7	–

* for NC transport trolleys and vertical pull-out cabinets (see p. 190) ** for NC cabinets

NC storage in transport units

NC bench stand

With insert frame for 3 strips.

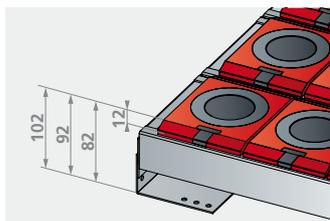

Units (E)	Dimensions mm (W×D)	A	B	D	E	F	G	H
36 × 27 E	588 × 413 × 345	27	24	21	18	15	12	3

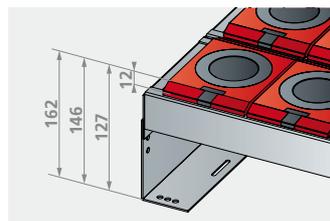

NC storage in bench stand

Version with pair of frame supports

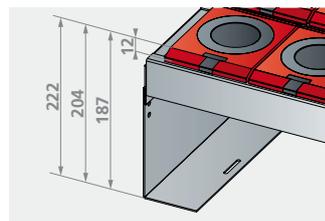

LISTA frame supports for NC systems have adjustable ranges with three positions so that the height can be variably adjusted to match the items stored. The distance from the insert frame to the top of the tool holder is always 12 mm.

For storage heights
82 – 102 mm
(27 E and 36 E)

For storage heights
127 – 162 mm
(27 E and 36 E)

For storage heights
187 – 222 mm
(27 E and 36 E)

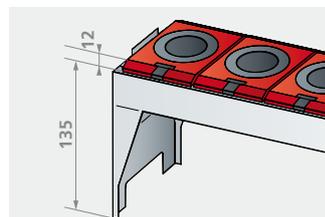

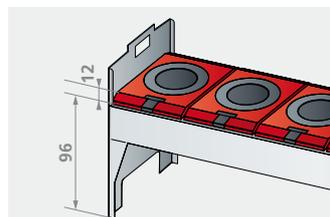

NC storage in drawers

» Drawer cabinets with hinged or sliding doors see p. 74

Version with tool cradles

LISTA tool cradles for NC systems are available in two heights. The distance from the cradle to the top of the tool holder is always 12 mm.

For storage heights 96–135 mm
(27 E and 36 E)

NC storage in cabinets

NC tool holder system

With this system a number of versions are available for different tools and can be fitted in a support in any combination. The holders are screwed together or fixed by means of snap fastener. Specification: high-quality plastic. Colour: red.

Note
 HSK tool holders are available in green on request. The red and green tool holders are required to differentiate between sharp and used tools.

» Partitioning schemes see p. 101

Capto C10	120	52	72	1	G	12.655.000

Tool holders to drill out yourself

For any tools.

Specification	Width mm	Depth mm	Height mm	Number of tools per holder	Partitioning schemes	Art. no.
for you to drill out 58*	58	138	20	as you like	A	12.832.000
for you to drill out 535*	535	138	20	as you like	H	12.838.000

*Screwed.

* **Explanation of "screwed"**: screwed tool holders are screwed onto the insert frame or the tool cradle frame with 1 or 2 allen screws.

Insert frame and pairs of frame supports

Available as a set or as individual components. One pair of frame supports is needed for each insert frame. By having frame supports in different heights which can be screwed onto the perforated drawer base together with the insert frame, tools with different cone lengths can be stored in drawers.

Adjustable ranges see p. 101

Partitioning schemes see p. 101

i **Ordering information**
Always take into account the maximum storage height of the tools including any fitting pins.

Insert frame for drawers

To accommodate all types of tool holder. One pair of frame supports is needed for each insert frame. Including screw fasteners. Without pair of frame supports. Specification: steel sheet. Colour: grey, NCS S 4502-B.

For drawer sizes Unit (E)	Number of rows	Width mm	Depth mm	Height mm	Art. no.
36 × 27 E	3	584	447	64	12.846.000
54 × 27 E	3	890	447	64	12.243.000
36 × 36 E	4	584	596	64	12.848.000

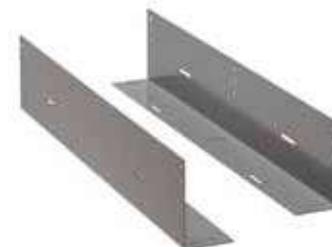

Pair of frame supports for insert frame

The position of the insert frames can be adjusted for height. Not necessary for tools with a height of less than 64 mm. Including screw fasteners. Specification: steel sheet. Colour: grey, NCS S 4502-B.

For depth (E)	Specification	Height mm	Cone length mm	Art. no.
27 E	447/60–110	60–110	80–160	12.907.000
36 E	596/60–110	60–110	80–160	12.904.000

For insert frames 12.846.000, 12.243.000.

For insert frames 12.848.000.

Tool holder sets 36 × 27 E

For inserting into drawers. Includes 1 insert frame, 1 pair of frame supports Art. no. 12.907.000. Width 588 mm, depth 447 mm, height 82–162 mm.

WELL ORGANISED

Thanks to the wide range of combination options, each workstation can be individually equipped with LISTA workbenches to optimise space. The combinable workbench tops, drawer cabinets, power unit cabinets, vices and rear panels can be organised to create optimum working conditions. The latest findings in ergonomics are incorporated and everything is delivered to the highest LISTA quality even for the most demanding working environments in workshops and heavy industry.

The right solution for every need

move workstations
see p. 110

Workbenches
see p. 116

Hexagonal workbenches
see p. 148

Compact workbenches
see p. 150

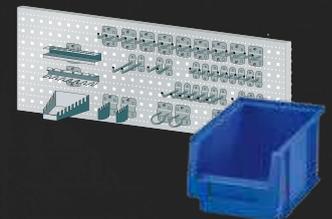

System workbenches
see p. 152

Assembly trolley
see p. 156

Test and inspection workstations

Desk chairs
see p. 164

+ The utmost stability
Workbench load capacity up to 3 t, workbench tops extremely robust and resistant

+ Great design diversity
thanks to the wide range of components, substructures, materials and surfaces

+ Ergonomics and health
with height-adjustable workbench legs for optimum working heights and leg room – also available for our modular superstructure system

+ Easily adaptable to new working environments
Flexible integration and reconfiguration of all components in the modular system

+ Fully mobile
when fitted with rubber or nylon castors for mobile use

+ move workstation system
electrically height-adjustable workstations with load capacities of 300–400 kg for a wide range of requirements and applications, see p. 110–115

+ Fast and easy assembly
thanks to countertops with pre-assembly (incl. threaded inserts and bolts) for fastening all substructures and drawer cabinets

>> General benefits of the LISTA drawer cabinets
See p.38/39

Three into one

Whether heavy duty or the assembly area - with the LISTA workstation system you can configure the solution that suits all your tasks and requirements. This works according to a very simple principle. Each workstation is comprised of three main elements: substructure, universal superstructures and worktops. These can be individually equipped and expanded to provide total flexibility.

1 Substructures

Depending on the application and area of application, you can choose between substructures in four variants.

From p. 112

Move workstation frame in H design, electrically adjustable

Move workstation foot in H design, electrically adjustable

Move workstation frame in C design, height-adjustable

Workbench leg assembly, fixed or height-adjustable

3 Universal superstructures

Combine substructures and worktops freely and flexibly with the universal superstructures of the LISTA system. Numerous modules and accessories are available from the rear panel to the monitor holder.

See p. 132

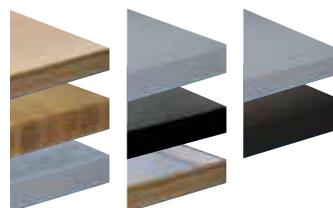

2 Worktops

The LISTA workstation system offers you a wide range of high-quality worktops:

- Eight standard materials for every purpose
 - Six standard widths and five standard depths
- Other plate types and dimensions on request.

See p. 124

1 move workstation system

LISTA's workstation system range offers an all-in-one solution for optimising workstations and workflows. Regardless of whether it's an individual table, multiple workstations or a team environment: the seamless integration of components turns simple workstations into functional system solutions for optimum ergonomics and cost-effectiveness.

+ Utmost stability

up to 300 kg (move C design) or 400 kg (move H design) weight loading, H design is characterised by maximum rigidity

+ User-friendly and ergonomic

freely variable electrical height adjustment with workstation frames (H or C design) or workstation feet (H design). Programmable control for storing table heights

+ Space-saving and well-organised storage

in freely combinable and configurable LISTA drawer cabinets

+ Perfect cable management

thanks to cable trays and cable guide clip

+ Fully mobile

when fitted with rubber or nylon castors for mobile use

>> Universal superstructures

see p. 132

>> Desk chairs

see p. 164 – 167

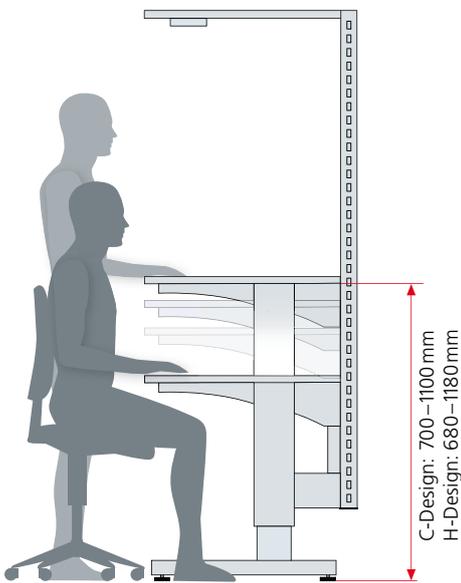

>> General benefits of the LISTA drawer cabinets

see p. 38/39

+ Benefits of ergonomic workstation design

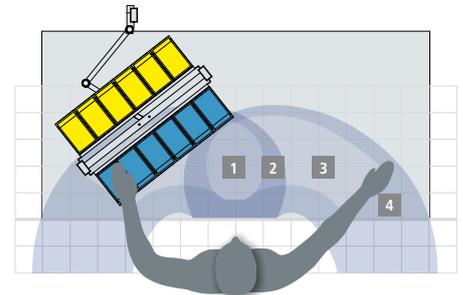

» Desk chairs see p. 164–167

- Simplified workflows resulting in quality improvements and a reduction in error rates
- 20% increased efficiency
- Increased performance potential and reduced processing times
- Healthier work environment and cost reduction in the long term thanks to fewer disruptions

Optimum reach area

Based on average human body dimensions, there are four access zones on the table worktop with different priorities:

Optimum arrangement of grab containers in zone 2 and 3 right beside the workpiece

- 1 The working centre:**
Both hands work in the direct field of vision
- 2 Extended working centre:**
Both hands reach all areas of this zone
- 3 One-hand zone:**
Parts and tools are within easy reach of one hand
- 4 Extended one-hand zone:**
Outermost usable zone

Mobility – humans as a standard

Assembly workstations should be fundamentally designed for sitting as well as standing positions. If alternating between sitting and standing positions is not possible, a sitting position is preferable.

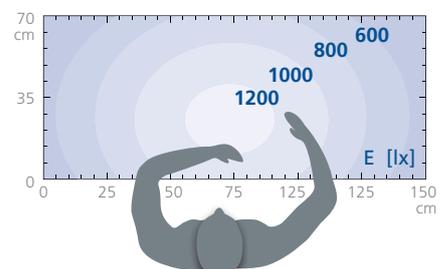

Features

	move H design		move C design
	H frame	H leg	C frame
Load capacity	400 kg	400 kg	300 kg
Adjustment range (without top)	680–1180 mm	680–1180 mm	700–1100 mm
Workbench depth	800/1000 mm	750–1000 mm	620–800 mm
Rigidity in the front countertop area	++	++	+
Knee clearance	+	+	++
Countertop thickness	30 mm	40/50 mm	30 mm
Countertop widths	1000/1500/2000	flexible up to 2500*	1200/1500/2000

*The max. top width depends on the load capacity. For load capacities see p. 130/131.

Lighting

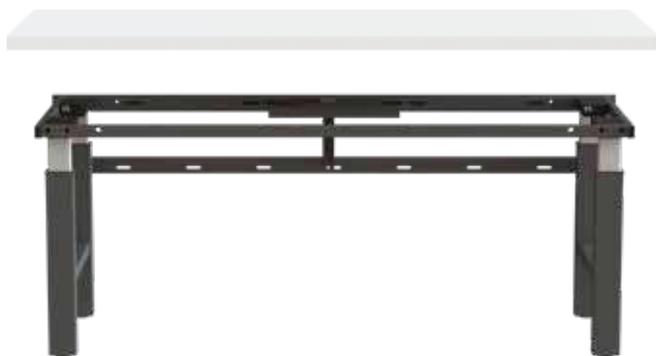

Good lighting helps to reduce error rates caused by overstrained eyes. Employee performance and production quality rise. The required light intensity must be adapted to the assembly activities.

Substructures

Does your workstation require a particularly stable and robust substructure, and must it be accessible or easily height-adjustable? The LISTA workstation system has flexible and configurable modules in four variants tailored to the requirements of different areas of application. In addition to the two electrically adjustable LISTA move H design workstation frames and legs, our system also includes the C design of the movable workstation frame, which is especially suitable for assembly and control tasks, as well as the classic workbench leg assembly for high loads in workshops and production.

move workstation frame, H design, electrically height-adjustable

4-legged tubular construction incl. connection for universal superstructures and adjustable legs. Lifting force: Max. 400 kg with evenly distributed load. Lift: 500 mm. Max. speed 23 mm/s. Incl. control and operating unit. Input via system plug. Colour: Lifting unit RAL 9006 white aluminium, outer profile according to colour chart. Without connecting cable. Country-specific connection cable must be ordered separately. See p. 144. Countertop must be ordered with pre-assembly, see page 125. Incl. integrated guide rail for mounting the optional support pillars, see page 138.

1 Workbenches

Thanks to the wide range of combination options, each workstation can be individually equipped with LISTA workbenches to optimise space. The combinable workbench tops, drawers and equipment cabinets, vices and rear panels can be organised to create optimum working conditions. The latest findings in ergonomics are incorporated and everything is delivered to the highest LISTA quality even for the most demanding working environments in workshops and heavy industry.

- 
- + Utmost stability**
workbench load capacity up to 3 t, workbench top extremely robust and resistant
 - + Easy to use and highly ergonomic**
with height-adjustable workbench legs for optimum working heights and leg room – also available for our modular superstructure system
 - + Fully mobile**
when fitted with rubber or nylon castors for mobile use
 - + Fast and easy assembly**
as the workbench tops have pre-drilled holes including threaded inserts (pre-assembled) for fastening all substructures and drawer cabinets
 - >> Universal superstructures**
see p. 132
 - >> Benefits of LISTA drawer cabinets**
see p. 38/39
 - >> Desk chairs**
see p. 164–167

+ Various substructures

Workbench legs

- sturdy steel plate construction
- welded from steel profiles
- with holes for attaching worktops and shelves

Castors for mobility

- for mobile workbenches
- fixed castors and swivel castors including brake mechanisms
- nylon or rubber-coated wheels for soft and hard floors

Vice cabinet

- can be fitted with any desired vice
- can easily be folded away beneath the workbench

Power unit and drawer cabinets

- prepared for the installation of the power and air supply by the customer at the workstation

* These workbench ordering examples are equipped with drawer cabinets in size 27×36 E. Each workbench is also available with drawer cabinets in sizes:
18×27 E = 306×459 mm (W×D)
27×27 E = 459×459 mm (W×D)
36×27 E = 612×459 mm (W×D)
18×36 E = 306×612 mm (W×D)
36×36 E = 612×612 mm (W×D)

S Workbenches

With Multiplex or beech top including pre-assembly and fastening material. Drawer cabinet can be fitted on either the right or the left.

Multiplex top thickness **40 mm**
Beech top thickness **50 mm**
Workbench leg height 800/850 mm
height-adjustable** 700–1050 mm
Drawer cabinet width 564 mm
Drawer cabinet depth 725 mm
Drawer load capacity 75 kg

For load specifications see p. 130/131

S LISTA fast delivery program

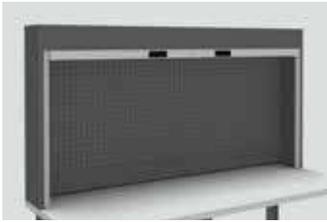

These LISTA products in light blue (.010) and light grey (.020) are available ex-works.

 .010 Light blue
RAL 5012

 .020 Light grey
RAL 7035

Art. no. **69.853.200**
Top-mounted cabinet with aluminium roller shutters anthracite, RAL 7016

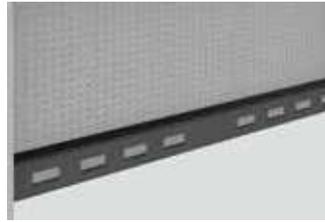

Housing

- Sturdy steel structure
- Version without shelf as top-mounted cabinet (direct mounting on countertop) or alternatively with shelf as overhead cabinet, see p. 186/187

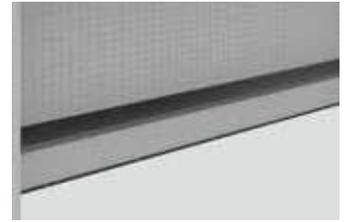

Handle

- Integrated handle
- Locking mechanism has no impact on usable depth
- Locking with KEY lock, keyed alike possible on request.

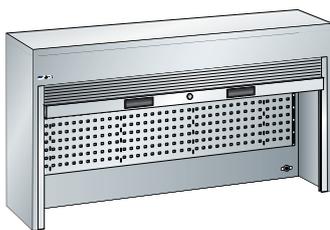

Power conduit

- Optionally integrated power conduit
- Configurable with power modules (see page 145)

Adjustable shelf

- Optional adjustable shelf
- Adjustment increment: 25 mm

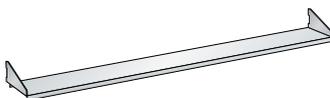

Roller shutter cabinet top-mounted cabinet

Aluminium roller shutters with spring-loaded winding ensures a large usable depth (215 mm) and safe operation (self-locking). The sturdy steel housing and the aluminium roller shutters ensure stable, secure storage. Punch-outs intended for power supply. Mounted directly on countertop.

Perforated rear panel for using perforated wall hooks (see p. 163), with square perforation 10 × 10 and 38 mm divisions.

Further versions with a height of 800 mm (with shelf) are attached to the support pillar via perforated rear panel (see p. 186/187).

Workbench legs, stationary, fixed height and height-adjustable

The LISTA workbench leg assembly is a rugged steel construction, welded together with extruded profiles, with holes for fastening the top. The feet can be anchored to the floor through a hole in the base plate. Load capacity 400 kg. Please note the maximum clear width on page 130. Specification: sheet steel. Colour: as per colour chart.

* Height-adjustable in 25 mm increments.

Levelling plates

For height compensation. For precise alignment, even on uneven floors. Description: PVC. Colour: grey. Dimensions: 90 × 90 mm (W × D)

Thickness mm	Art. no.
1	338.146.000
2	338.147.000
4	304.309.000

Levelling foot

1 × levelling foot, ø 50 mm, adjustment range 45–90 mm. Including fastening material.

Two levelling feet are required per workbench leg assembly.

Description: plastic, black.

Art. no.

345.040.000

! Workbench leg assemblies, mobile and height-adjustable

Option to select nylon or rubber coated wheels, depending on the properties of the floor. Width: 80 mm. Depth: 725 mm.

Height: 700–1050 mm. Please note the maximum clear width on page 130. Specification: sheet steel. Colour: as per colour chart.

The LISTA workstation system offers the right worktop for every application area, from the universal worktop with linoleum covering to the chrome steel worktop. Another plus point: If the support pillars for the superstructures are fastened behind the worktop, you can make effective use of the full worktop depth with the LISTA system.

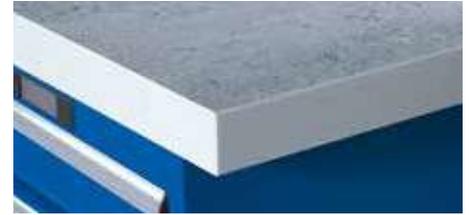

Multiplex top

- Made of steamed beech veneers, glued waterproof and with bevelled edges
- Sanded, oiled and waxed surface
- Versatile, splash-proof, dirt-repellent and largely impervious to oil and grease

Beechwood top

- Made of steamed beech beams, glued waterproof and with bevelled edges
- Sanded, oiled and waxed surface
- Extremely resilient, splash-proof, dirt-repellent and largely impervious to oil and grease

Universal top

- Universal countertop for the workshop
- Linoleum covering, grey marbled, 2 mm, with ABS edges, light grey
- Impact-resistant and slightly dampening
- Limited scratch resistance
- Colour change due to darkness is a natural reaction (disappears in normal light conditions)
- Linoleum is made from natural raw materials

Eterlux top

- For hygienic applications
- HPL coating, 3 mm, with ABS edges 2mm light grey
- Easy-to-clean surface texture
- Highest scratch resistance
- Heat-resistant up to 180°C, briefly up to 280°C
- Resistant to chemicals and solvents, also acids and alkalis to a certain extent
- Limited impact resistance

Nitrile top

- Technical coating of natural rubber
- 4 mm rubber floor covering, with 2 mm black ABS edges
- Medium-hard, slip-resistant and shock-absorbing as well as oil and fuel-resistant
- Can be used at -10°C to +70°C
- Slight clouding or scratches are production-related and correspond to the normal surface condition of the product

Metal coverings (on request)

- For high usage
- Very easy to clean and versatile
- Choice of sendzimir galvanised coating and chrome steel coating

Resin top

- Colour light grey
- Easy-to-clean textured surface with HPL coating, 0.8 mm
- Resistant to common household chemicals, solvents, weak acids and alkalis
- High impact and scratch resistance
- Also available as an ESD model
- With ABS edges, 2 mm, grey

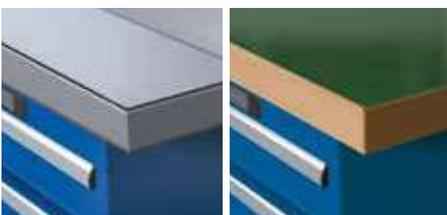

ABS plate

- With hard, slightly grained surface texture, 2 mm
- With ABS edges, 2 mm, black
- High scratch resistance and impact resistance
- Resistant to chemicals, oils and greases

PVC mat, 4 mm, transparent

- Dampening and slip-resistant
- Smooth, soft surface, easy to clean and impact-resistant
- Resistant to chemicals, solvents, weak acids and alkalis with brief exposure
- Do not use in combination with a beech top
- Made to measure (observe general cutting tolerances)
- PVC mat not suitable for beech wood top

Chrome steel and urphen plates

- Chrome steel plate sealed all round, ideal for pharmaceuticals and laboratories
- Available on request

** Resistant to: good resistance to oil, good or limited resistance to fuel, not recommended for acids, alkalis or acetone. Changes to the surface and slight swelling of the surface caused by using chemicals, oils, soaps, etc. may occur; these are a material property and not a product defect. Excluding threaded inserts (pre-assembled) and fastening material. These must be ordered additionally depending on the sub-structure.

! The recommendations on resistance materials are general indicators and do not take into account secondary factors such as concentration of the agent, temperature, oxidation, etc. The information given is therefore not binding. Depending on the substances, preliminary clarifications are strongly recommended.

Brackets, height-adjustable

Enable the shelves with raised sides to be adjusted to four different heights. Adjustment height relative to worktop 230, 270, 310 and 350 mm. They are fixed in place through the workbench top (pre-assembly required). Including fastening material. Specification: made from steel box section, including fastening material for each unit. Colour: light grey, RAL 7035.

Stop buffer

Stop buffer prevents the mobile drawer cabinet from rolling too deep under the table. The stop buffer is attached to the underside of the countertop (thickness > 40 mm) with wood screws. Designed for mobile drawer cabinet H: 890 in combination with stationary drawer cabinet H: 850 mm and levelling feet +50 mm

Width mm	Height mm	Art. no.
620	155	69.965.XXX

Support crossbar

By stabilising the countertop using a support crossbar, large spans of up to 2500 mm can be achieved without the use of a third workbench leg assembly. This support crossbar can also be retrofitted to the workbench leg assemblies.

Loads

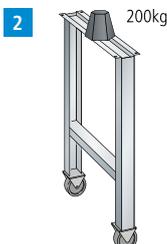

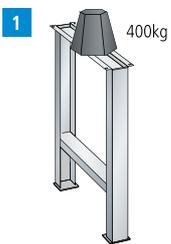

Workbench tops

Max surface loads of the tops. These specifications apply with evenly distributed loads and static applications.

» Desk chairs
see p. 164–167

» Superstructures and
accessories see p. 132

1 The maximum load is 400 kg for the fixed workbench leg assembly and 200 kg for the workbench leg assembly with castors with evenly distributed loads and static applications.

2 For this version, the load specifications (see tables below) must be halved in each case.

Overview of universal superstructures

With our universal superstructures, you can design each workstation ergonomically, neatly and individually. The consistent and form-fitting design ensures an attractive appearance and enables virtually invisible cable routing. All superstructures are easy to install and also available as an ESD model.

- Cantilever, single, double sided**
- Integrated and interlocking design for almost invisible cabling.

see page 139

- Rear panels**
- Perforated or smooth
 - For attaching tool holders
 - Smooth rear panels can also be mounted on the back for a complete room partition

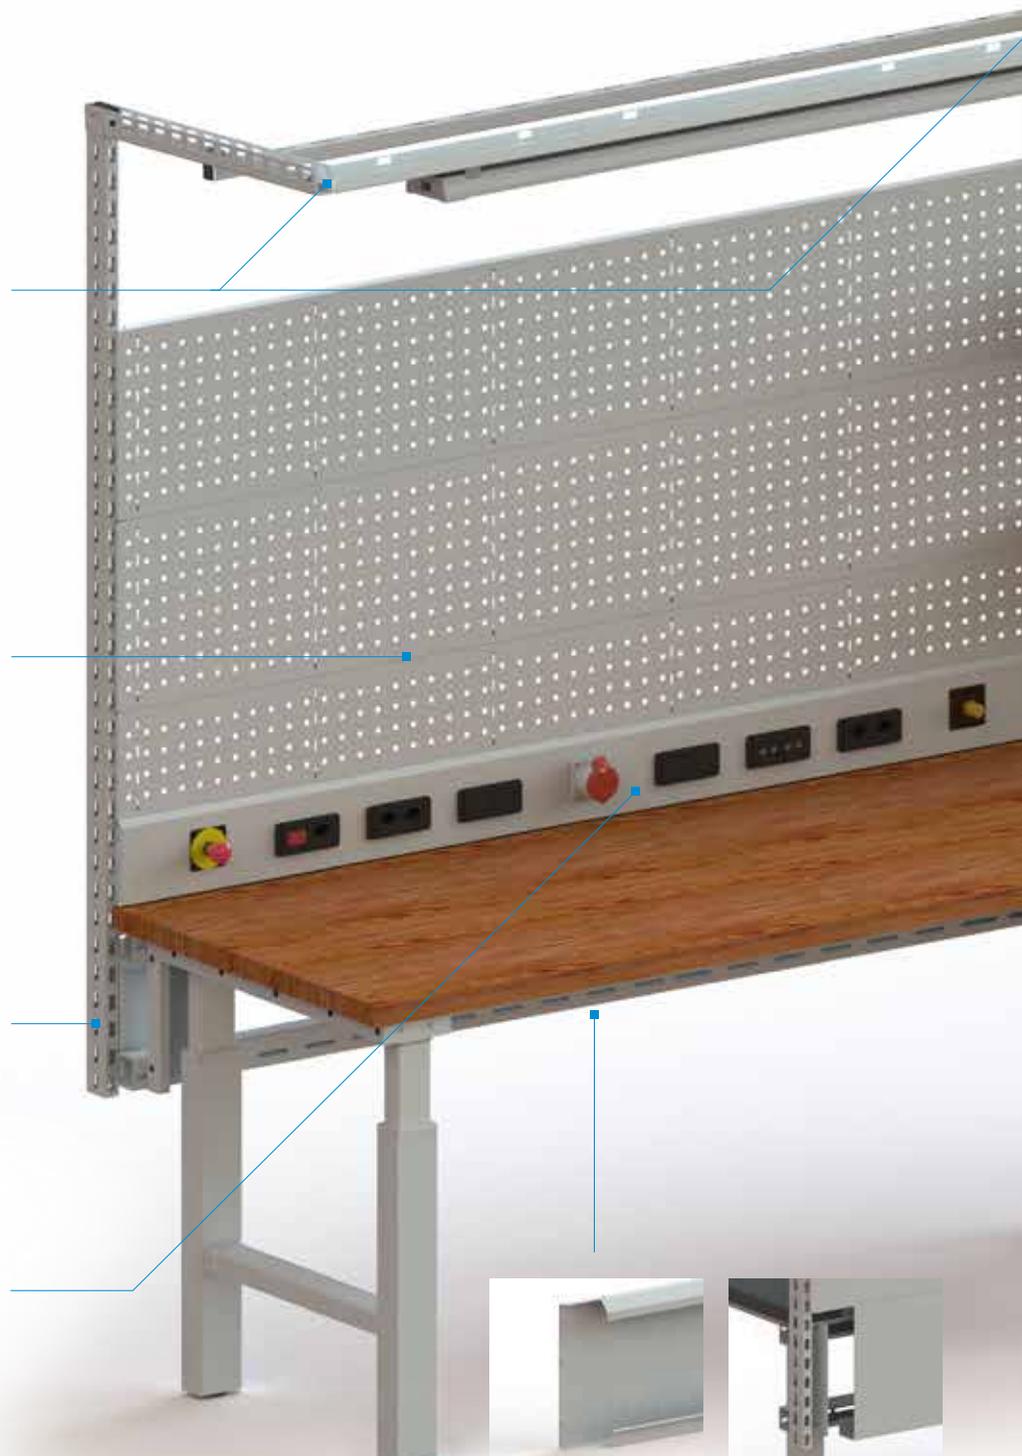

see page 140/141

- Support pillars**
- Flexibly mountable
 - Vertically adjustable in increments of 50 mm
 - Continuously adjustable horizontally for flexible attachment to any substructure

see page 138/139

- Rear power panel**
- For accommodating power modules and elements
 - Fully integrated into the rear panel
 - Simple assembly and dismantling

see page 144

Cable trough (visualisation: sectional view)

- Fastening to the rear side of support pillars
- Optimum cable routing and protection
- Suitable for linked solutions

see page 144

Equipment rail

- For use with carriages
- Fast and easy assembly
- Linking possible via multiple workstations

see page 139

Integrated lighting carrier

- For accommodating lighting and cabling.
- Interlocking design for almost invisible cabling

see page 139

Lighting

- Wide selection of different LED lights

see page 146

Swivel arm

- For mounting on support pillar
- One or two arms
- For holding peripheral devices and accessories

see page 140

Adjustable shelf

- Load capacity up to 50 kg
- Can be attached horizontally or tilted at an angle of up to 15 degrees
- Can be attached largely without tools

see page 140/141

Container strips

- For holding storage containers
- Can be attached horizontally or at an angle of 15 degrees
- Can be attached largely without tools

see page 140/141

Guide rail

- For fastening and horizontal positioning of support pillars

see page 138

Cable routing clip

- Enables clean cable routing, easy installation and removal
- Suitable for support pillars and perforated rear panels

see page 144

ESD

- ESD protected version available as an option

see page 24–27

Use of TWIN link adapters for drawer cabinet depth 27 E

Different adapter plates (TWIN links) are required to enable different configuration options between countertop depths and drawers with cabinet depths of 27 E. Generally, a TWIN link does not need to be used when **using a drawer cabinet with a depth of 36 E**. The use of the cover profile may be necessary when using a 700 or 750 mm deep countertop, see p. 138.

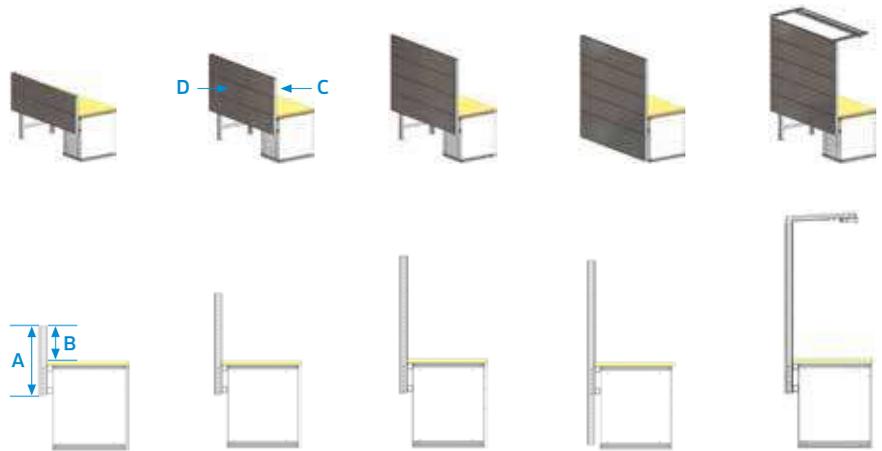

Countertop Depth mm	Cabinet / Cabinet				Cabinet / Workbench leg assembly				Workbench leg assembly / Workbench leg assembly

* Height from upper edge of table top mm

** Type CH: 1 switch with 1 thermal fuse and 4 socket outlets 230 V

*** Type CH: 1 switch with 1 thermal fuse and 2 socket outlets 230 V

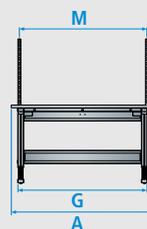

- 1 Guide rail pair
- 2 Support pillar
- 3 Guide rail holder
- 4 TWIN link (only for cabinet depth 27 E)

Module width of superstructures

The module width refers to the axis dimension of the superstructures (measured from the centres of the support pillars). The number and dimensions of the modules used may vary depending on the frame and top width. We will be happy to advise you.

- M Module width
- G Frame width
- A Top width

Guide rail pair for fitting to the workbench substructure*

The guide rail pair is available in 5 widths and is designed for the H leg, workbench leg assembly and for the drawer cabinet. Incl. fastening material. Model: Sheet steel, colour as per colour chart.

* Se si utilizza l'armadio a cassettei T: 27 E è necessario un adattatore TWIN-Link.

Support pillar for mounting on workbench substructure

Scope of delivery: 1 unit

To guide rail pair for

Workbench leg assembly move workstation leg, H design move workstation frame, H design

The support pillars are available in 5 heights. Capacity 150 kg. A guide rail pair is required for fitting. Incl. pillar bracket and fastening material. Model: Steel profile, perforated on four sides in increments of 50 mm for attaching the superstructure components with limited use of screws. For double workstations, the same support pillars are used for both sides. Colour: as per colour chart.

Perforated rear plain or panels

The support pillars can be vertically fitted with rear panels, either partially or up to their full height. All rear panels can be attached to the support pillars without screws. Rear panels perforated with square holes 10 × 10 mm, 38 mm division and slots 380 mm apart for accommodating storage shelves and can holders (see p. 141). Specification: sheet steel. Colour: as per colour chart.

Container strips

To hold size 2, 3 and 4 storage containers; can be attached to the support pillars without screws. Max. load capacity 15 kg. Specification: sheet steel. Colour: as per colour chart.

Adjustable shelves, plain or slotted

The adjustable shelves are fitted with a stop bar on one of their longitudinal sides. The adjustable shelves can be attached with the stop bar on either the front or the rear. For adjustable shelves, slotted: slots 15 mm apart for partitioning with dividers. Using two brackets, the adjustable shelves are attached to the support pillars without screws, either horizontally or with an inclination angle of 15°. Load capacity 50 kg. Normal level 25 mm + 17 mm stop bar. Including two brackets each. Specification: sheet steel. Colour: as per colour chart.

Swivel arm attachments

For accommodating the swivel arm elements directly on the table frame (individual workstation) or on the support pillar. Table frame holder galvanised. Specification: steel. Colour: light grey, RAL 7035.

Schematic diagram

The LED lighting and power supply system from LISTA meets the high requirements for modern and ergonomic workstations. The combined lamps and power strips make simple workstations functional system solutions for maximum ergonomics and cost-effectiveness. Good lighting and a tidy workstation are essential for high-quality, accurate work.

LED side lamp

- Fastening to support pillar or perforated rear panel
- With on/off switch and Wieland power connector GST-18
- Continuously dimmable

Rear power panel

- For attaching power modules or power elements
- Fixing to support pillars or power housing

Socket strip

- Designed for 230 V
- Fastening to support pillar or table top

Rear power panels and housings

**Please note:**

All power elements must be wired on site.

**Rear power panel**

For attaching power modules or power elements (see page 145). Simple, tool-free mounting on support pillars or power housing. A blind cover (89.543.000) is mandatory for unused fields. Height: 150 mm. Model: Colour as per colour chart.

**Power housing**

The solution for mounting without support pillars. Direct mounting on the countertop, incl. punch-out at the side and base. Height: 150 mm. Model: Sheet steel, colour: as per colour chart.

**Cable trough**

The cable tray is used to hold routing cables neatly. Depending on the module widths, the cable tray can be inserted without tools, similar to a rear panel. Height: 350 mm. Model: Sheet steel, colour: as per colour chart.

Hexagonal workbenches and vices

The space-saving hexagonal workbenches with vices are ideal as group workstations, especially for training centres. Every workstation has a large worktop and a drawer cabinet as substructure. The power outlets are integrated into the centre section.

+ Wide range of specifications in a modular system

for individual configuration and combination of drawer cabinets, power attachments and vices

+ Maximum workstation utilisation

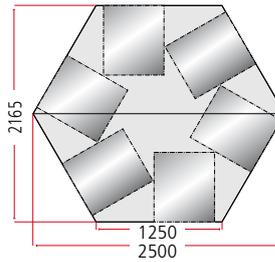

ideal as group workstations for training facilities thanks to special design

+ Perfect power supply

thanks to the power attachment with freely configurable power elements and power modules, available as a single or double level attachment

+ Easy assembly

Power and compressed air connections are combined in the centre section and are very accessible thanks to the easily removable hexagonal cover plate

Hexagonal workbenches

With Multiplex top and 6 drawer cabinets, including pre-assembly and fastening material.

Multiplex top thickness	40 mm
Height of drawer cabinet	800 mm
Drawer cabinet width	564 mm
Drawer cabinet depth	725 mm
Drawer load capacity	75 kg

When ordering a workbench from these two pages with **CODE Lock**, please add the suffix **"C"** or for **RFID** or **AUTO Lock "F"** or **"A"** in addition to the article number from the table (e.g. **78.897.XXX.C**).

➤ Locking systems see pp. 28–31

"Gressel" vice system

Forward-opening vice with off-centre design enables vertical clamping of up to 4 inch round stock. With protected square guide, for maintenance-free precision. Unlimited applications thanks to the patented 90° swivelling clamp. Anvil and saddle aids enable optimum machining of pipes and other work pieces. Specification: spheroidal graphite iron, with two exchangeable hewn jaws, fastening material included. Colour: stationary elements dust grey, RAL 7037, movable elements cobalt blue, RAL 5013.

Compact workbenches

- + Utmost stability**
housing can be loaded with up to 1.0 t.,
all connections welded
- + Space-saving and well-organised storage**
in variable substructures with smooth-running drawers
with 75 kg supported load and a wide range of
partition material
- + Secure locking system**
with KEY Lock locking system for simultaneous
protection of all drawers and doors against
unauthorised access
- + Great design diversity**
thanks to the wide range of components,
substructures, materials and surfaces
- + Easy to use and highly ergonomic**
with height-adjustable workbench legs for
optimum working heights and leg room – also
available for our modular superstructure system
- + Easily adaptable to
new working environments**
through flexible integration and reconfiguration
of the modular system
- >> Universal superstructures**
see p. 132

Compact workbenches made by LISTA provide versatile, modern workstations for production, workshop and hobby use. Their robust design and high-quality materials make them especially durable and able to withstand even severe conditions. Various substructures ensure that there is plenty of storage space.

Compact workbenches

With Multiplex or beech worktop and housing.

Multiplex top thickness	40 mm
Beech top thickness	50 mm
Height of workbench substructure	800 mm
Depth of housing/ worktop	695 / 700 mm
Drawer load capacity	75 kg
Shelf load capacity	25 kg

Note

Preconfigured workbenches are equipped with various types of locks. Other worktop specifications (Urphen, chrome steel coating) on request.

Universal superstructures

The modular system – for universal use with all LISTA workbenches and workstation systems. The compatible superstructure system stands out in terms of ease of integration. Only compatible when mounting on table top.

- Universal superstructures see p. 132
- Separate components see p. 154

High load capacity up to 1.0 t

The sturdy construction and high-quality materials provide a stable system. Can therefore handle total loads of up to 1.0 t without any problems.

For colour information see fold-out page. When ordering, please use the desired three-digit colour code (instead of XXX).

Ordering information

When selecting drawers and hinged doors, the clear height of the base is decisive. The sum of the drawer front heights (C) must be equal to the clear height (B).

Compact workbenches

System workbenches

Assembly trolleys

LISTA assembly trolleys optimise material flow between individual workstations, warehouse and dispatch. They enable fast transportation and interim storage of components or assemblies without requiring a lot of space and by combining various elements, they can be adapted specifically to individual requirements.

+ Utmost stability

total load capacity up to 250 kg, integrated storage shelf

+ Great design diversity and mobility

can be assembled on one side or on both sides, stationary or mobile

+ Ergonomic and safe handling

with four swivel castors and push handle

+ Easy assembly

through support pillar profiles perforated on four sides so that rear panels, swivel shelves and adjustable shelves and container strips can be attached at height increments of 50 mm largely without the use of tools

>> Universal superstructures

see p. 132

➤ Keyhole hook
see p. 163

➤ Storage container
see p. 162

Easy assembly

- swivel and adjustable shelves and container strips can be attached to the support pillar without the use of tools
- ribbed mats and raised sides provide the required stability for the stored items

Ergonomic handling

- with four swivel castors and push handle
- two locking mechanisms for fixing

1 Mobile assembly stand

The assembly trolleys can have elements attached on both sides. The support pillars enable rear panels, swivel shelves or adjustable shelves as well as container strips to be mounted without the use of screws. The assembly trolleys are equipped with 4 swivel castors, 2 of which have braking mechanisms. Wheel diameter 100 mm, rubber, grey, max. load capacity 250 kg. Specification: Assembly stand comprising crossbars, shelves and support pillars, made of steel profile, perforated on four sides at 50 mm increments. Colour: as per colour chart. Roller housing made of galvanised and chrome-plated sheet steel.

2 Push handle for assembly trolley

The push handle is fixed to the side of the support pillar of the assembly stand; includes fastening material. Specification: aluminium tubing, black, anodised, with plastic holder. Colour: black, RAL 9005.

3 Ribbed mat, double-sided

Specification: rubber, colour: grey.

4 Perforated rear panels

The support pillars can be vertically fitted with rear panels, either partially or up to their full height. All rear panels can be attached to the support pillars without screws. Rear panels perforated with square holes 10 × 10 mm, 38 mm division and slots 380 mm apart for accommodating storage shelves and can holders (see page 141). Specification: sheet steel. Colour: as per colour chart.

5 Container strips

To hold size 2, 3 and 4 storage containers; can be attached to the support pillars without screws. Max. load capacity 15 kg. Specification: sheet steel. Colour: as per colour chart.

6 Safety bracket for container strips for assembly trolley

Safety bracket for container strips. For retrofitting. Is attached to the container strip to prevent any open-ended containers detaching from the container fixing strip in case of uneven flooring. Fastening material included. Specification: sheet steel. Colour: as per colour chart.

7 Adjustable shelves, plain, with side panel for assembly trolley

The raised sides prevent the transported goods slipping out in case of uneven floors. The adjustable shelves can be attached with the stop bar on either the front or the rear. Using two brackets, the adjustable shelves are attached to the support pillars without screws, either horizontally or with an inclination angle of 15°. Load capacity 50 kg. Normal level 25 mm + 17 mm stop bar. Including two brackets and a safety catch each. Specification: sheet steel. Colour: as per colour chart.

i Safety instructions

Due to a risk of toppling, only adjustable shelves with a maximum depth of 300 mm or swivelling shelves may be used.

Test and inspection workstations

With its modular test and inspection workstations, LISTA offers optimised solutions for modern quality assurance practices. A variety of different test stations can be assembled from our wide selection of components in order to meet your individual needs and fulfil the most demanding requirements. You can be assured of one thing: system-based quality.

+ Utmost stability
through high-quality welded sheet steel construction

+ Great design diversity and modularity
for individual configuration and combination of top-mounted monitor cabinets with drawer and hardware cabinets

+ Secure locking system
with roller shutters, drawers, monitor doors and hinged doors to protect expensive hardware and important documents

+ Fully mobile
for mobile version

+ User-friendly
thanks to lockable keyboard drawer with full extension runner for keyboard and mouse

+ Perfect cable management
through cable conduits and openings for horizontal and vertical cable ducts

+ Optionally with lighting, power strip and ventilator
for an optimum working environment

>> Benefits of LISTA drawer cabinets
see p. 38/39

Test and inspection workstations | preconfigured

Computer cabinet

- 1 Monitor stand
- 2 Hardware cabinet
- 3 Pair of castor holders

Art no. **17.616.020**
Light grey, RAL 7035
(including push bar)

Computer cabinets

Computers and the corresponding hardware and software must be protected from dust, dirt and unauthorised access on the shop floor. The LISTA computer cabinet provides a safe and proven solution that fulfils this requirement. Equipped with:

- 1 monitor compartment with retracting door or hinged door mounted on the right, each with cylinder lock,
- 1 plain adjustable shelf in the monitor compartment with retracting door,
- 1 lockable 75 mm keyboard drawer with full extension runner,
- 1 hardware cabinet with hinged doors including lock, permanently installed power supply consisting of a 4-socket power strip (230 V) with illuminated switch, equipment extension, plain adjustable shelf,
- 1 built-in fan,
- 1 connecting cable, 5 m long,
- 1 opening in the rear panel, with removable cover
- 1 push rod (for mobile version)

Computer cabinets with retracting doors

Stationary and mobile version:
with mobile versions, nylon castors, Ø 100 mm,
monitor door can be swung upward,
monitor compartment usable dimensions
(W × D × H): 650 × 620 × 605 mm,
size of viewing window (W × H): 445 × 525 mm

Computer cabinets with hinged door mounted on the right

- Stationary and mobile version:
- with mobile versions, nylon castors, Ø 100 mm
 - Monitor door mounted on the right
 - monitor compartment usable dimensions / monitor stand (W × D × H): 710 × 325 × 730 mm
 - size of viewing window (W × H): 653.5 × 721 mm

Computer cabinets

Computer cabinets protect electronic equipment in dusty and dirty surroundings. A central power input facilitates power supply to the hardware.

Quality Stations

Specification depending on model with the following system modules:

Quality cabinet

With plastic roller shutters including cylinder lock, connection cable 3 m long, hard laminate top as working surface, fitted without tools, power supply with 2-socket and 3-socket power outlet and rocker switch for the lamp built into the housing cover

Hardware cabinet

With hinged doors including lock, permanently installed power supply consisting of a 4-socket power strip (230 V) with illuminated switch, equipment extension, connecting cable 5 m long, lockable 75 mm keyboard drawer with full extension runner

Drawer cabinet

With full extension runner, drawer load capacity 75 kg

Support base

With privacy screen

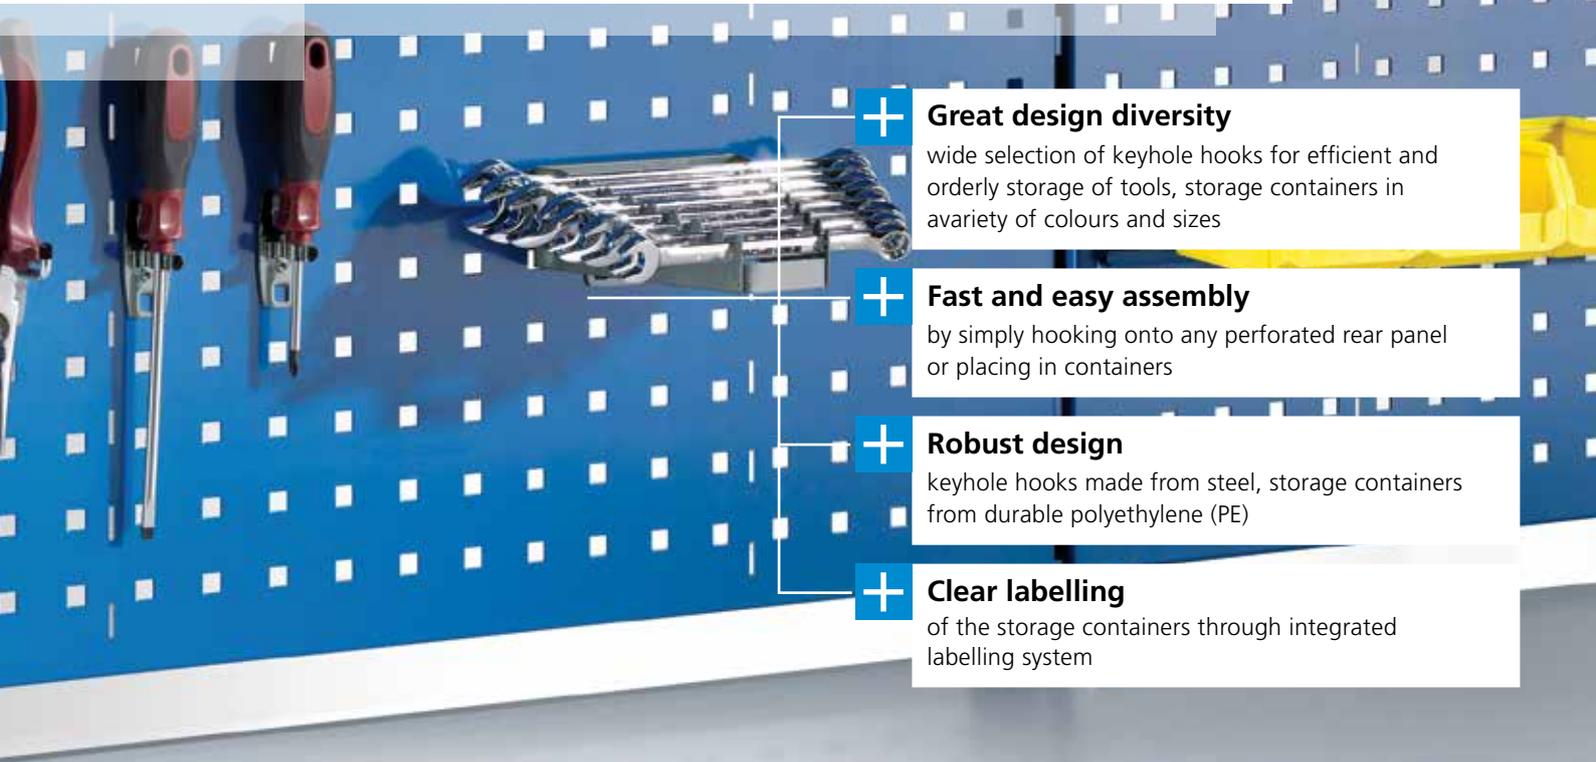

Mobility

All test and inspection workstations are also available in a mobile version. This allows you to quickly and efficiently adapt to changing requirements.

Storage containers and keyhole hooks

Storage containers and keyhole hooks not only keep workbenches and workstations neat and tidy, they also ensure that tools and accessories are neatly stored and always within reach on assembly trolleys and when they are used as accessories in full storage walls and shelving systems. You bet.

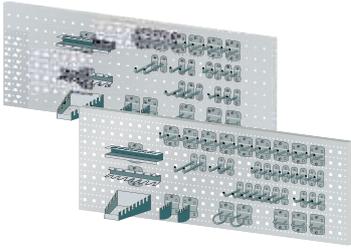

- + Great design diversity**
wide selection of keyhole hooks for efficient and orderly storage of tools, storage containers in a variety of colours and sizes
- + Fast and easy assembly**
by simply hooking onto any perforated rear panel or placing in containers
- + Robust design**
keyhole hooks made from steel, storage containers from durable polyethylene (PE)
- + Clear labelling**
of the storage containers through integrated labelling system

Storage container

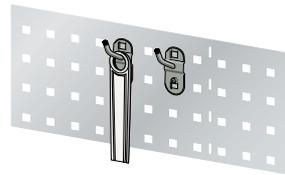

Width, depth and height refer to the external dimensions. The storage containers are resistant to most oils, acids and alkalis, reduce noise when used on conveyors and when used properly are resistant to temperatures of -20°C to +100°C. Specification: polypropylene.

Desk chairs

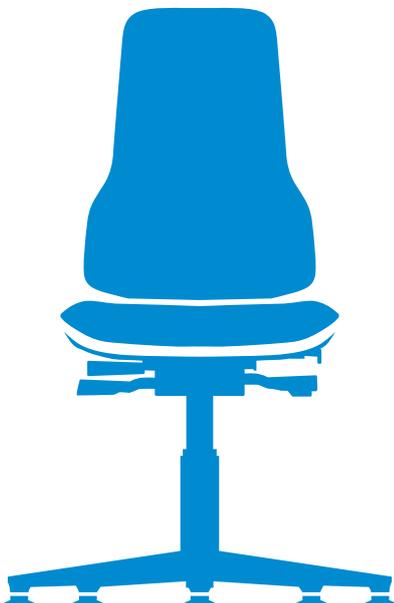

Desk chairs from LISTA provide perfect seating and standing solutions for versatile use in production, at electronic workstations or in the laboratory. All chairs are manufactured according to the industry work chair standard DIN 68877, taking into account all major ergonomic findings in industrial medicine. The robust design and hard-wearing materials make the chairs very durable, ensure the required hygiene and are easy to clean. With functions such as ergonomically adaptable adjustment, these chairs are the perfect workstation seating solution.

+ Utmost stability
Sturdy base with resilient, robust and non-slip seats

+ User-friendly and ergonomic
thanks to simple adjustment functions such as stepless seat and backrest height adjustment, seat tilt adjustment and weight regulation

+ Tremendous design diversity
thanks to different surfaces, materials and selectable bases with casters or abrasion-resistant sliders

A good desk chair increases the efficiency of your company and ensures safety in the workplace

-  free-floating backrest, height and tilt-adjustable
-  Adapts to different types of work when sitting
-  Prevents the risk of entrapment or crushing
-  height-adjustable seat
-  additional slip-resistant step-up rail for chairs with an adjustable seat height of over 650 mm
-  no casters for chairs with a seat height of over 650 mm (except for seat-stop casters)
-  Base with minimum five support points and safety against tilting

THE PERFECT COMPLEMENT

The extensive range of LISTA cabinets enables you to customise and add to your workspace and storage equipment. The high-quality steel cabinets can be easily integrated into a variety of working environments and individually adapted to your specific requirements. They are suitable both for industrial purposes and for storing files and similar items in offices and administrative departments. And of course your personal belongings are always kept safe in a LISTA cabinet.

The right solution for every need

Hinged door cabinets

Compartment cabinets
see p. 202

Battery charging cabinets
see p. 204

Laptop cabinets and battery charging cabinets for electric scooters
see p. 210

Battery charging cabinets as an e-bike charging station
see p. 214

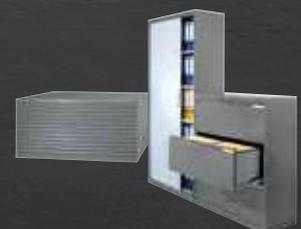

Environmental and oil cabinets
see p. 216

Containers and large-scale pin cabinets*

Firefighter lockers*

Office cabinets*

LISTA hinged door cabinets provide secure and orderly storage for a variety of items. All cabinets can be configured individually and adapted to your specific storage needs through the flexible use of partition materials and cabinet accessories.

! ALWAYS WITH LISTA

Choice of colours

12 standard colours, all other colours available; see p. 22

Intelligent locking systems

Replaceable cylinders which can be fitted to existing locking systems, electronic locking systems via CODE and RFID Lock for absolute security made to measure; see p. 28

Individual configuration options

in size, equipment, locking system, colour and drawer partitions; see p. 10

Utmost stability

with housing load capacity of up to 500 kg

High load capacities

load capacity of 60 kg or 100 kg per adjustable shelf, 60 kg per drawer/pull-out shelf

Well protected

protection from dirt, liquids and physical loads thanks to closed housing with impact-resistant and abrasion-resistant surface

Flexible configuration options

with covers, perforated panels, suspension folder pull-outs, desk mounts and clothes rails

Optimum order and organisation

with optional installation of drawers and pull-out shelves for clear and orderly storage of small parts (for a cabinet depth of 580 mm)

Perfectly organised

with viewing windows made from UV-resistant, shatterproof acrylic

Secure locking

with solid sheet or viewing window doors (flush-fitting, folded from one piece) and intelligent locking systems

Can be adapted to new storage items at any time

with the flexible integration and rearrangement of drawers, pull-out shelves and adjustable shelves in increments of 25 mm

Note: the front height corresponds to the drawer front height. For the actual height of the partition material see p. 262–265. Partition material sets excluding clip-on label holder.

Cabinet housing

The housings of the hinged door cabinets are made from high-quality sheet steel and are available with specifications for one or two hinged doors, with or without a fixed partition. The inside fittings of the cabinet are easy to customize thanks to the 25:25 mm divisions.

Hinged doors

The hinged doors in solid sheet or with a viewing window are folded from one piece, flush-fitting and flush with the cabinet housing. The doors can be equipped with hinges, with an opening angle of approx. 115°. The hinged doors can be equipped with a KEY Lock, a CODE Lock or an RFID Lock as desired.

i

Clasp locks

The standard KEY Lock locking system with replaceable cylinders makes it easy to adapt to existing locking systems. With CODE Lock, the key is replaced by a simple numeric combination. The LISTA RFID Lock enables automatic and contactless locking through radio frequency identification.

When space is limited, sliding-door cabinets from LISTA are the ideal solution for your storage items. Because the smooth-running doors remain in the housing and do not jut out into the traffic area.

+ Utmost stability
thanks to housing with a load capacity of 500 to 950 kg
(as from a width of 1500 mm)

+ Perfectly smooth running
since the sliding doors are equipped with high-quality,
smooth-running and quiet runners

>> Benefits of LISTA cabinet systems
see p. 168

Sliding-door cabinets

Depending on the model, the cabinets on these two pages are fitted with: adjustable shelves, galvanised, 30 mm thick, load capacity 60 kg, pull-out shelves and drawers, painted, anthracite grey, RAL 7016, load capacity 50 kg

Slotted adjustable shelves
Adjustable shelves including 4 shelf supports. Specification: steel sheet, galvanised, slotted. Long sides folded by 4 × 90°. 30 mm thick with load-bearing capacity of 60 or 100 kg.

Dividers for adjustable shelves
For subdividing adjustable shelves. Specification: steel sheet, painted. Colour: light grey, RAL 7035.

Drawers and pull-out shelves
Full extension with ball bearings, including guide rails. Load capacity 50 kg. Specification: steel sheet. Colour: anthracite grey, RAL 7016. **For cabinet depth 580 mm.**

Base
Robust steel tubing construction 40 × 40 mm, closed side panels, incl. fastening material (screw connection between cabinet and base). Optional: base cover to be attached as a cover on the front or rear. Colour: Anthracite grey, RAL 7016.

Cabinet systems | Wall-mounted cabinets with hinged or sliding doors

+ Utmost stability
thanks to housing with load capacity of 40 to 80 kg

+ Optimum order and organisation
thanks to adjustable shelves with load capacities of up to 40 kg for neat and tidy storage of tools, files and other equipment

+ User-friendly
since the stored items are easy to reach and at viewing height

+ Perfect cable management
with cable openings and intermediate shelf for tidy and well-protected cable routing

+ Flexible configuration options
thanks to pre-perforated holes (punch-outs) as cable guide for power strips and LED lights

>> Benefits of LISTA cabinet systems
see p. 168

LISTA wall-mounted cabinets are perfect as additional storage space for small parts, documents and more. They keep your storage items ergonomically and conveniently stored at viewing height. Just mount them on the wall and in no time everything is just where it should be: neatly put away.

Art. no. **69.861.200**

Load capacity: 40 kg.

Art. no. **69.883.XXX**

Cover flap set

Custom-fit flap and cable collar for punch-outs.
Delivery: 2 hinged flaps.
1 cable collar

Art. no. **69.869.000**

Clasp lock KEY Lock

- standard locking system for hinged doors with replaceable cylinders
- makes it easy to adapt to existing locking systems

Lock-down cylinder lock / KEY Lock

- locking system for sliding doors
- cannot be prised out thanks to the right-angled bar

Extremely smooth running

- the ball bearing rollers of the sliding doors run quietly on the guide rails

Cable feed-through

- punch-outs allow the cabinet to be provided with a power supply, see p. 147
- punch-outs are present on the lid and base
- there is space for cable routing underneath the shelf

Flexible configuration and organisation

thanks to perforated and slotted rear panels, individually configurable with optional adjustable shelves or integrated cable conduit

User-friendly operation

Aluminium roller shutters with spring-loaded coils: self-locking, effortless operation. Optimum use of space with a continuous usable depth of 215 mm

Versatile

also available as top-mounted cabinet without a base for direct mounting onto the worktop, see p. 121

Benefits of LISTA cabinet systems

see p. 168

LISTA wall-mounted shutter cabinet for optimal tool storage. The cabinet can be custom-adapted to your needs with optional accessories such as an adjustable shelf or power conduit.

Wall-mounted cabinet with aluminium roller shutters

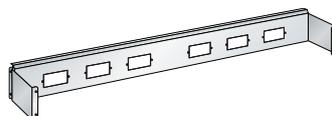

This type of cabinet is ideal for securely hanging tools. The space-saving roller shutter winder gives a maximum usable depth of 215 mm and also allows the use of standard folders. In addition, this cabinet can optionally be equipped with an integrated cable conduit to accommodate the energy modules (see p. 145). For direct fastening to the work-top, this cabinet (1050 mm high) can also be ordered without a floor (see p. 121).

Art. no. **69.851.200**
Wall-mounted cabinet with aluminium roller shutters, RAL 7016

Roller shutter cabinet

Aluminium roller shutter with spring-loaded winding ensures a large usable depth (215 mm) and safe operation (self-locking). The sturdy steel housing and the aluminium roller shutters ensure stable, secure storage. Punch-outs intended for power supply. Perforated rear panel for using perforated wall hooks (see p. 163), with square perforation 10 × 10 and 38 mm divisions.

	2000	8 ×	89.023.XXX

Integrated cable conduit solution. Designed for installation in roller shutter cabinet. The power conduit can be equipped with the power modules. see page 145

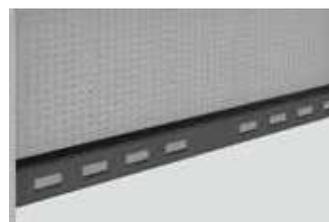

Housing

- Sturdy steel structure
- Version with shelf as an overhead cabinet or alternatively without a shelf as a top-mounted cabinet, see p. 121

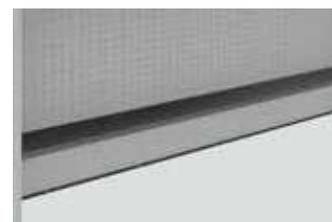

Handle

- Integrated handle
- Locking mechanism has no impact on usable depth
- Locking with KEY lock, keyed alike option also possible on request

Power conduit

- Optionally integrated power conduit
- Configurable with power modules (see page 144)

Adjustable shelf

- Optional adjustable shelf
- Adjustment increment: 25 mm

Cabinet systems | Roller shutter cabinets

LISTA roller shutter cabinets give you full access to your stored items even in confined spaces. And the individual configuration and equipment options mean that they are right for a wide variety of workplaces from workshop to office.

+ Utmost stability

with housing load capacity of up to 500 kg

+ Secure locking

thanks to the smooth-running roller shutters with user-friendly push handle and integrated cylinder lock with replaceable cylinders (other locking systems on request)

+ User-friendly

roller shutter stops at any height without the need for catches

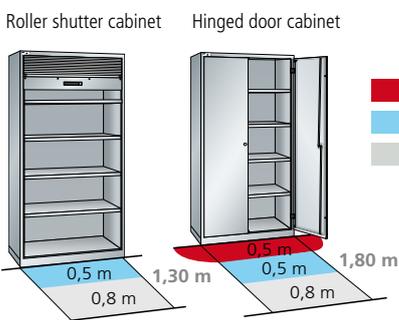

» Benefits of LISTA cabinet systems

see p. 168

Roller shutter cabinets

Depending on the model, the cabinets on this page are fitted with: adjustable shelves, galvanised, 30 mm thick, load capacity 60 or 100 kg, pull-out shelves and drawers, painted, anthracite grey, RAL 7016, load capacity 50 kg, roller shutter in PVC, colour similar to light grey, RAL 7035

Art. no. **58.401.010**
Light blue, RAL 5012

Direct access to all stored items

The smooth-running roller shutter which can be operated with one hand stops at any height without the need for catches.

Strike plate

The sturdy metal strike plate comes with an anti-trap finger guard for safety reasons.

Push handle cylinder lock/ KEY Lock

The replaceable cylinder makes it possible to adapt the locking system as required.

Cabinet systems | Vertical pull-out cabinets

- + Utmost stability**
with a housing load capacity of up to 1000 kg
- + High load capacities**
vertical pull-outs with a load capacity of up to 200 kg
- + Perfectly smooth running**
can be fully extended on smooth-running plastic runners even with heavy weights off-floor
- + Outstanding safety features**
through standard single-drawer blocking system
- + Secure locking**
thanks to front covers or hinged doors with KEY Lock including replaceable cylinders (other locking systems are available on request)
- + Flexible configuration options**
with adjustable shelves, perforated panels and shelves for tool holders for NC storage in increments of 50 mm
- + User-friendly**
with direct access to tools and small parts from both sides
- + Well protected**
protection from dirt, liquids and physical loads thanks to closed housing with impact-resistant and abrasion-resistant surface

Vertical pull-out cabinets from LISTA provide space-saving storage for tools, supplies and more where space is at a premium. The pull-outs can be used from both sides and can optionally be fitted with perforated panels or shelves to hold plastic containers, tools, documents and LISTA tool holders for NC storage. The result: maximum storage space with a very small footprint. That's what we call efficient.

Art. no. **85.799.010**
Fronts light blue, RAL 5012
(excluding storage containers)

Vertical pull-out cabinets

Depending on the model, all cabinets on this page are equipped with: front covers 3 × W 307 mm, 4 × W 230 mm, pull-outs with a load capacity of 200 kg, perforated panels with square holes 10 × 10 mm, 38 mm apart

Clothing lockers from LISTA offer impressive functionality and a wide variety of equipment options.

This makes them suitable for use in a wide range of locations from workshop to sports hall and they also offer secure, flexible and ideal storage in accordance with DIN 4547-2011.

+ Utmost stability
thanks to hinged doors with the pin on the right and with reinforcement pocket for greater protection against burglary (DIN 4547)

+ Sophisticated ventilation
with air vents at the top and bottom of the housing

+ Optimum hygiene
thanks to plain compartment shelves without raised edge to make it easier to clean the compartments thoroughly

+ Practical interior fittings
with hat rack, towel holder and clothes rail with three sliding coat hooks for each compartment

+ Individual equipment options
such as housing with an inclined top, double compartments, benches or ventilation ducts for on-site forced ventilation

+ Secure locking
with KEY Lock locking system, rotary knob safety lock or closing device for padlock (CODE/RFID Lock and other locking systems on request)

+ Protection from dirt and corrosion
with bases or legs that are galvanised in addition to being powder-coated. Protect against corrosion, cover with a base also protects against dirt

Bench base for in-line installation on request

Upon presentation of a layout plan, the bases are available at **little cost** for single- and/or double-sided construction in a row. In addition, less cleaning is required thanks the small number of leg supports.

Double-sided base, height 400 mm with shoe racks

LISTA compartment cabinets are ideal for storing personal items of all kinds. Whether in industry, trades, office and administration, or leisure and sport: a variety of locking systems makes the cabinets easily adaptable to the respective security requirements of any location.

+ Utmost stability
thanks to hinged doors with the pin on the right, rolled on all sides, with curved surface

+ Sophisticated ventilation
with air vents at the top and bottom of the door

+ Secure locking
with KEY Lock locking system or locking mechanism for padlock (CODE/RFID Lock and other locking systems on request)

+ Clearly labelled
thanks to embossed label frame

+ Protection from dirt
thanks to substructure with base to prevent dirt from accumulating under the locker

Art. no. **11.527.050**
Metallic grey, NCS S 6502-B

Art. no. **11.529.010**
Light blue, RAL 5012

Compartment doors

Different compartment doors, e.g. with viewing windows or mail slot, on request

Inclined top part

An inclined top part prevents the cover from being used inadvertently as shelf space and reduces required cleaning.

Ventilation slots and label frames

The high-quality solid sheet doors provide very high stability and are also equipped with a label frame. Air vents at the top and bottom provide ideal ventilation.

Versatile locking systems

cylinder locks, numeric combination locks, coin deposit locks, locking systems for padlocks and master key systems are available. Other locking devices such as CODE/RFID Lock on request.

i Ordering information

When ordering a compartment cabinet with **closing device for a padlock**, please specify the suffix **"V"** or, for a **rotary knob safety lock**, the suffix **"D"** in addition to the article number from the table (e.g. **11.525.XXX.V**).

COLOURS: With preconfigured cabinets housing in light grey, RAL 7035.

LISTA battery charging cabinets with hinged doors are perfect for the centralised supply of batteries and electrical devices. All cabinets can be configured individually and adapted to your specific storage needs through the flexible use of partition materials, cabinet accessories and power supply by means of power strips.

+ Flexible range of applications
Charging options for battery-operated electrical machines, BDE devices, notebooks, tablets and smartphones

+ Perfect cable management
Cable openings for protected and orderly cable routing

+ Outstanding safety features
CE compliant

+ Secure locking
Devices are locked away at all times, and are protected against unauthorised use and with intelligent locking systems such as CODE/RFID Lock.

>> Benefits of LISTA cabinet systems
See p. 168

Battery charging cabinets with hinged doors

Depending on the model, the cabinets are equipped with **adjustable shelves**, galvanised, 30 mm thick, load capacity 60 kg. Painted **drawers**, anthracite gray (RAL 7016), load capacity 50 kg. **Power strips** with on/off switches and 4 or 5 sockets, 230 V.

LED cabinet lighting

12 V LED lighting for cabinet height 1950 mm. Installed at the front right of the cabinet. Consisting of 1 LED light each, length: 800 mm (9W) and 500 mm (5W), integrated motion detector requires 1 free slot in one power strip.

Art. No. **57.463.000**

+ Flexible range of applications

Charging options for battery-operated electrical machines, BDE devices, notebooks, tablets, smartphones or e-bikes

+ Sophisticated ventilation

Optimal air circulation thanks to ventilation holes at the front and back

+ Great design diversity

With sockets, network sockets RJ45 and USB interfaces

+ Outstanding safety features

CE compliant

+ Secure locking

Devices are locked away at all times, and are protected against unauthorised use and with intelligent locking systems such as CODE/RFID Lock

>> Benefits of LISTA cabinet systems

See p. 168

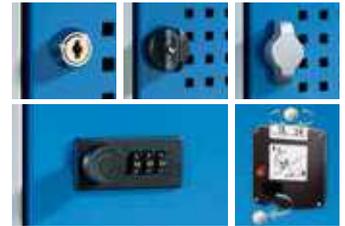

LISTA compartment cabinets with power connection are perfect for personal storage of battery-operated devices of all kinds. Suitable for use in industry, trade, offices, schools, universities or public buildings. Batteries can be charged during storage thanks to the built-in double sockets, and are therefore always ready to use.

Art. no. **98.409.020**
Light grey, RAL 7035

Art. no. **98.416.070**
Ruby red, RAL 3003

Versatile locking systems

- Cylinder locks, numeric combination locks, coin deposit locks, locking systems for padlocks and master key systems are available

i When ordering a cabinet from this page with **RFID Lock**, please add the suffix "F", respectively, to the article number stated in the table (e.g. **98.409.XXX.F**).

Power modules for laptop cabinet

Socket strip can be ordered with one or two 230V sockets per compartment.

USB adapter for sockets

1 × USB-C connection, 3 × USB-A connection
Overcharge, deep discharge, overload and short-circuit protection Colour: Black

Art. no. **61.257.000**

When ordering a laptop cabinet on this page with **CODE/RFID Lock**, please specify the suffix **"F"** in addition to the article number from the table (e.g. **98.600.XXX.F**)

Thanks to its high resistance to light and weathering, the LISTA e-bike charging station is ideally suited for the central supply of batteries for outdoor use. Each compartment has a power module with two fused sockets. In addition to business and public authorities, schools, universities, airports, restaurants, cafés, hotels and other public buildings can also be equipped with the e-bike charging station for outdoor use.

+ Utmost stability and convenience

thanks to welded sheet steel housing made of electrolytically galvanised sheet steel and double-walled doors with opening limiter and self-closing function

+ Well protected

thanks to high-quality polyester resin powder coating with high light and weather resistance, cabinet housing and electrical components protected against splashes (IP44 in accordance with DIN EN 60529), inclined top with front projection as rain protection

+ Perfect cable management

thanks to 230V socket with cover, FI/LS switch for each compartment, power supply via ground cable, access in base in spray water-protected distribution box (IP65), roof and left side panel removable as inspection opening (screwed), inspection opening in lower compartment incl. distributor box in base area

+ Sophisticated ventilation

thanks to integrated heat ventilation conduit and passive ventilation in each compartment

+ Outstanding safety features

CE compliant

+ Secure locking option

with security cylinder lock, coin deposit lock or cashier lock (other locking systems available on request)

LISTA environmental and oil cabinets are suitable for the safe and standard storage of water-hazardous substances in water hazard class (WGK) 1–3. Liquids that are required in the daily work flow are stored safely in LISTA oil cabinets. Pull-out shelves hold the liquid canisters. Drops of liquid are collected in the drip tray.

- + Maximum stability**
with housing load capacity of up to 500 kg
- + High load capacities**
Drip trays with a load capacity of up to 100 kg and canister shelves up to 200 kg
- + Can be adapted to new storage items at any time**
by inserting or converting drip trays and canister shelves in 25-mm increments as required
- + Individual equipment options**
with drip trays, canister shelves, base trays, canisters and drawers
- + Safe and orderly storage**
with drip trays welded to form a liquid-tight seal according to Section 19 of the Water Resources Act/German directive on steel trays (StawaR).
- + Secure locking**
with solid-sheet doors (flush-fitting, folded from one piece) and selectable locking systems
- + Sophisticated ventilation**
with perforated field at the top and bottom of environmental lockers

Observe legal regulations and directives

The canisters may only be filled with acid- and lye-free liquids (no abrasive media), oils and grease with a flame point above 55° Celsius. Maximum ambient temperature 40° Celsius. Please call us for special applications and further information.

i Note:
Not suitable for storage of flammable materials

Canister shelf

The canister shelf has a handle on the left and right and a centre lip. It is only 27 E (451 mm) deep so there is enough room in the front area for the canister tap.

Built-under drainage tray for oil cabinet

The built-under drainage tray of the oil cabinet has a leak-proof welded construction according to the Water Resources Act Sec. 19/StawaR (German directive on steel trays) and has a test certificate. It has a volumetric capacity of 40 l. Art. no. **14.995.000**

Drip trays

The drip trays feature a leak-proof welded construction according to StawaR (German directive on steel trays) and have a test certificate.

VERSATILE AND ROBUST

Whether for files, liquids, equipment or tools: shelving systems from LISTA offer tailor-made storage solutions for practically all requirements. High load capacities and a distinctly robust design guarantee optimum use of space and high storage capacity. Many shelving systems are now also available in a galvanised version. The more impressive new feature is that the universal shelving system has been completely overhauled to allow even more flexible solutions for a wide variety of working environments.

The right solution for every need

L1006 universal shelving
see p. 220

Heavy-duty pull-out shelving systems
see p. 238

Drawer storage walls

Storage and sloping shelving systems*

Wide span shelving systems*

Pallet shelving systems*

Cantilever shelving systems*

Mobile shelving systems
see p. 246

* For more information, please get in touch.

The impressive feature of the universal shelving system from LISTA is that it is fully modular. Available in two versions – either with shelf supports or with open sides – and a variety of heights, depths and unit widths, the slot-in system is quick and easy to assemble for a wide range of requirements. Individual configuration options with shelves, partitions, drawer units and more produce an orderly, space-saving storage system in which everything is ready to hand. Whether small parts, bulk goods, tools or archive material: the LISTA universal shelving system is the ideal warehouse solution – especially in the lean area.

! ALWAYS WITH LISTA

Choice of colours

12 standard colours, all other colours available; see p. 22. Many shelving systems are also available in a galvanised version.

Intelligent locking systems

Replaceable cylinders that can be fitted to existing locking systems, electronic locking systems via CODE and RFID Lock for absolute security made to measure; see p. 28.

Individual configuration options

in size, equipment, locking system, colour and drawer partitions; see p. 10.

Fully combinable

Standardised dimensions for all LISTA universal shelving systems of varying designs.

+ Utmost stability

Sturdy shelf supports or side panels with a load capacity from 1,000 kg to 2,800 kg per shelving unit

+ High load capacities

80 kg to 350 kg per shelf

+ Generous storage capacity in a small space

Can also be installed as a double-stack set-up on request

+ Fast and easy assembly

Non-screwed, slot-together design of all basic components and shelves simplifies assembly

+ Flexible configuration options

Drawers, clothes rails, organisation rails, pull-out suspension file frames, shelf front cover strips, drip trays, grating covers, etc.

+ Fully modular

Standardised dimensions for all LISTA universal shelving units and customisable configuration options

+ Can be adapted to new storage items at any time

Flexible integration and rearrangement of shelves, drawers and individual parts in increments of 25 mm

+ Secure locking

Choice of hinged doors or space-saving sliding doors in combination with rear panels

+ Ideally suited to lean environments

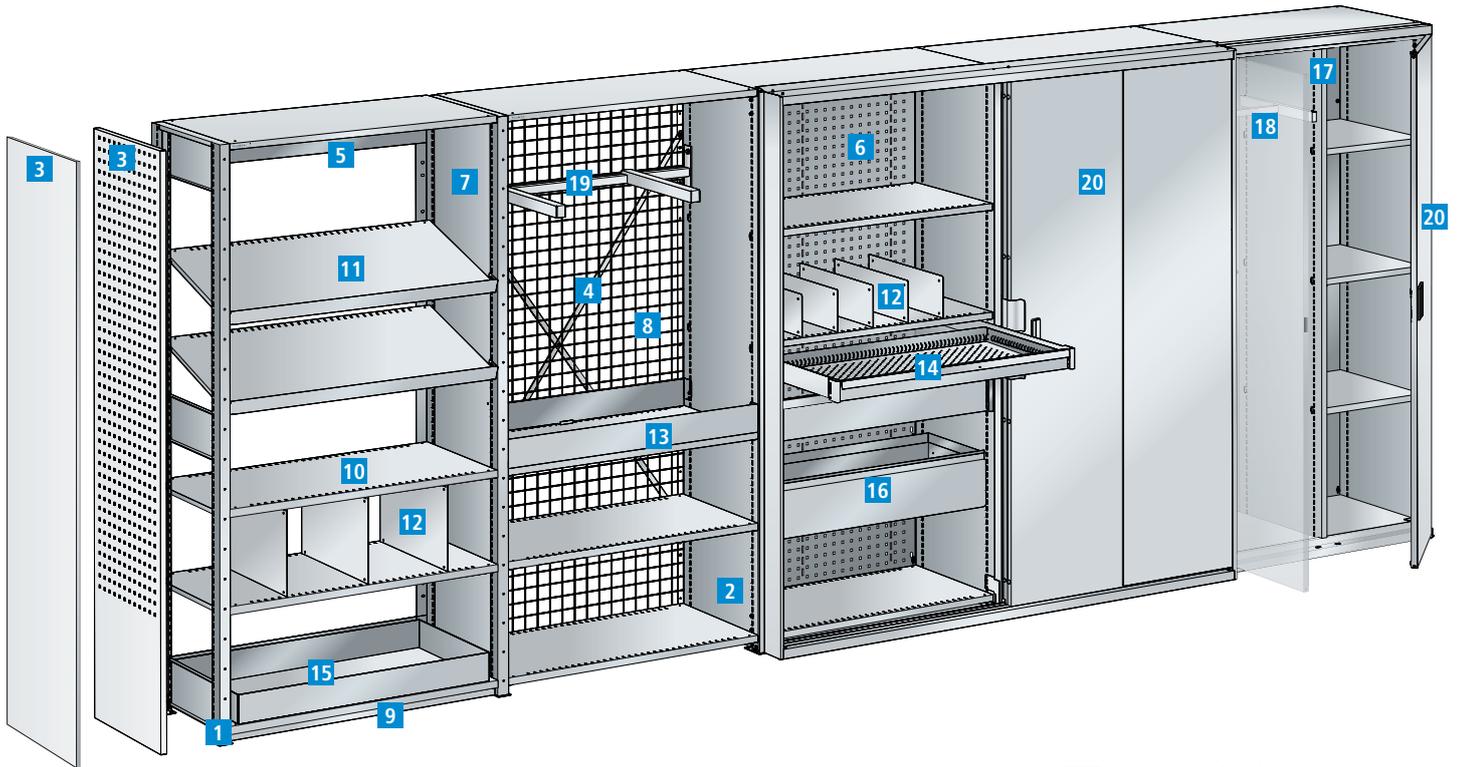

Perforated rear and side panel covers and sloping shelves for fast, ergonomic access to tools and materials

+ Maximum shelf use

Shelves have an edging height of only 25 mm so that the full storage height is available

+ Fully modular and available in a wide range of versions

All individual parts and accessories of the universal shelving system can be freely positioned and combined with one another in a modular fashion – and this applies to both equipment versions (with shelf supports or with side panel).

» Dimensions and load capacities, see page 226.

1 Shelf supports

Sturdy, open layout with a maximum load per unit of 2,800 kg, optional extension unit for shelving heights up to 5 m.

2 Side panel

Elegant closed layout with a maximum load per unit of 1,000 kg also prevents the stored items from falling out

3 Side panel cover, plain or perforated

For covering the open shelf supports or the row of slots on the side panels, perforated version for tool hooks

4 Diagonal brace

For stabilising the shelving units lengthwise

5 Lengthwise braces

Used instead of diagonal braces to make both sides accessible

6 Rear panel, plain or perforated

For covering the rear panel of shelving units; also stabilises the units lengthwise, perforated version for tool hooks

7 Partition

Placed between the shelf supports

8 Grating

Can be used as side panel covers, rear panels and partitions, prevents access and yet guarantees visibility and ventilation

9 Base cover

Protects against dust and dirt. Also prevents items from sliding underneath the unit

10 Shelf

High compartment loads of 80 to 350 kg (edge height 25 mm) for maximum use of space, in a choice of plain or slotted

11 Sloping shelf LEAN

Retrofittable stop bars for fitting shelves at an incline, for providing ergonomic access to materials and parts

12 Partitions and shelf dividers

For subdividing slotted shelves, ideal for storing small parts and small boxes

13 Shelf front cover strip

For the neat and tidy storage of bulk goods

14 Drawer

Fully extendable with load capacity of 50 kg for space-saving storage of small parts; extensive range of partition material

15 Drip tray

For storing liquids and for use as a drip tray

16 Pull-out suspension filing frame

Suitable for A4 suspension files; load capacity 50 kg for the orderly storage of and easy access to suspension files

17 Centre partition

For the vertical subdivision of complete shelf units

18 Clothes rail

Perfect for storing clothing and protective workwear

19 Organising rail

For vertical storage, compartment division and for storing ring-shaped materials (cables, vee belts and tubing)

20 Hinged and sliding doors

Secure access and dust protection with hinged doors or space-saving sliding doors, lockable

+ Flexible range of applications

The universal shelf unit offers storage solutions for a wide variety of requirements in workshops and offices. Since it takes ergonomic factors into account and implements the 5S principles, it is especially suitable for lean working environments.

Storage of tools and spare parts

- Perfect order and cleanliness according to the 5S principle

Storage of boxes and containers

- Ergonomic access to materials at the workplace according to lean criteria

Storage of bulk goods

- Structured and efficient storage of bulk goods

Shelf units with sloping shelves

- Ergonomic access to materials at the workplace

Shelf cabinet system with lockable doors and drawers

- Safekeeping of small parts and tools

Storage of lever-arch files, folders and suspension files

- Well-organized and within reach

Clothing locker shelf units

- Storage of clothing and protective workwear

Double-stack shelving systems

- Optimum use of space

+ Individual configuration options

Typical configurations

L1006 universal shelf unit for the workshop

- Perforated rear panel for holding tool hooks
- Drawers for safekeeping of small parts
- Shelf front cover strips for tidy storage of loose bulk goods
- Organising rail for storing cables and tubing
- Tyre shelves for storing narrow and wide wheels

Configure and order L1006 universal shelving individually

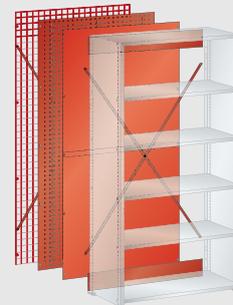

Shelf unit floor area

- Choice of shelf dimensions $W \times D$ (e.g.: 1000×500 mm)
- To calculate the external dimension, please refer to the planning instructions on p. 226 / 227

1. Layout and shelving height

- Choice of "shelf supports" or "side panel".
Design combinations available on request!
- Choice of shelving height H
- Optional: shelf support cover, extension units, side panel covers and partitions, floor anchoring, levelling plates

2. Stabilising elements

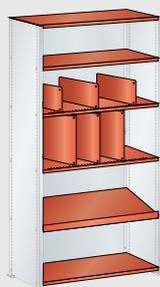

- Choice of stabilising elements: diagonal braces, rear panels or lengthwise braces

L1006 universal shelf unit for the office

- Elegant, closed side panel
- Pull-out suspension filing frame for orderly, easily accessible suspension files
- Partitions for orderly storage of and easy access to files and folders
- Shelves with an edging height of only 25 mm so that the full height of a file is available

! **NEW!**
Shelf heights 1,100mm, 1,450 mm and 1,800 mm for 3, 4 or 5 file heights

3. Shelves

- Choice of shelves (plain, slotted) and compartment load
- Optional: Stop bars for sloping shelves, shelf labelling, partitions and dividers

4. Accessories

- Optional: Choice of accessory shelf front cover strips, drawers, partition material, drip trays, clothes rails, Cover panels, etc.
- Choice of tyre compartment level pair for tyre storage, see p. 235

5. Front-mounting fitments

- Optional: Hinged and sliding doors

6. Add-on elements "Office"

- Optional: sideboard

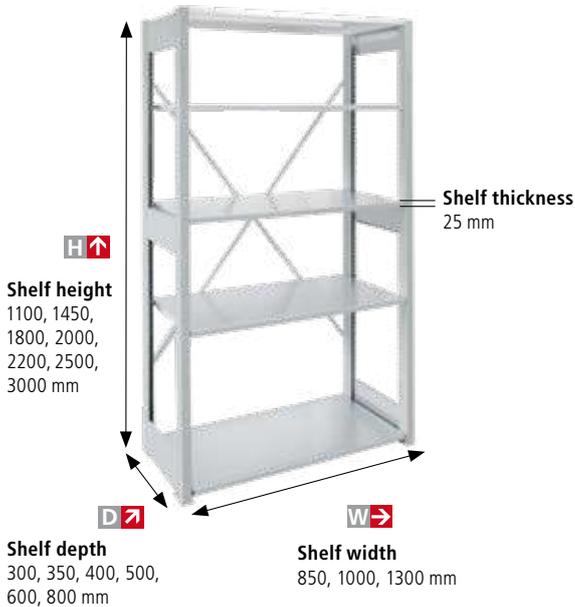

Shelving systems | Universal shelf unit L1006, shelf support layout

Dimensions and load capacities

kg Max. load per unit 2,800 kg with a distance between shelves of max. 750 mm

kg Max. compartment load: 80, 160, 220, 280, 350 kg

Adjustment increment: 25 mm

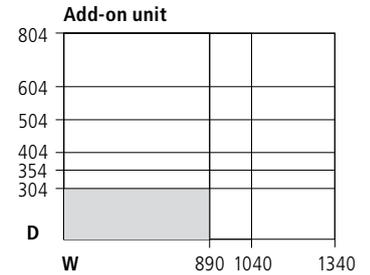

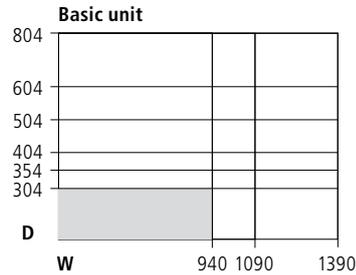

Planning instructions

Calculating the external dimensions

Overall width of shelving: Total shelving widths + number of supports × 40 mm + 10 mm (base plate external)

Overall depth of shelving: Shelf depth + 4 mm

Safety instructions

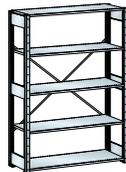

Anchoring rule Units with a depth to height ratio greater than 1:5 (1:4 for units with hinged doors and single units with drawers) must be anchored. Floor anchoring: Art. no. **130.555.000** (each).

Arrangement of diagonal braces For each basic unit and for each third add-on unit, an extra diagonal brace is required. Instead of diagonal braces, rear panels can be used – or lengthwise braces in order to make the unit accessible from both sides. Diagonal brace: Art. no. **50.026.000**.

Basic and add-on shelf units

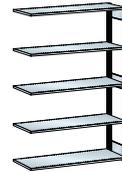

Basic unit

2 pairs of shelf supports incl.
6 horizontal braces
1 diagonal brace, galvanised
5-6 shelves, slotted (thickness 25 mm)

Add-on unit

1 pair of shelf supports, incl.
3 horizontal braces
5-6 shelves, slotted (thickness 25 mm)

1a. Pair of shelf supports Max. load per unit, 2,800 kg

Consisting of 2 shelf supports, 2 base plates and 3 horizontal braces (4 horizontal braces for height of 3000mm). Slots 25 mm apart for attaching shelf supports at any height, including fastening material. Specification: Shelf supports in cold-rolled C profile, 40 x 75 mm, with 6 edge turns for maximum stability. Base plate, galvanised. Without Floor anchoring. Colour: As per colour chart or galvanised.

25 mm		50.432.XXX	50.433.XXX	50.434.XXX

2. Diagonal brace

For stabilising the shelving units lengthwise. Fastening material included. Specification: Steel, galvanised.

Diagonal brace arrangement:

For each basic unit and for every third add-on unit, an extra diagonal brace is required.

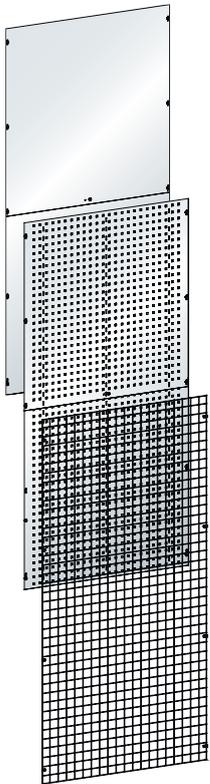

Lengthwise braces

Instead of diagonal braces, lengthwise braces (at the top and bottom) can be used in order to make the unit accessible from both sides.

Including fastening material.

Specification: Steel sheet.

Colour: As per colour chart or galvanised.

Rear panels, plain or perforated

The rear panel cover for shelving sections also stabilises the units lengthwise and is screwed to the shelf supports or side panels.

For perforated rear panel: Specification: 10 × 10 mm square holes and 38 mm divisions for holding keyhole hooks (see page 163). Including fastening material.

Specification: 2-part, sheet steel.

Colour: As per colour chart or galvanised.

Rear grating

Rear grating filling for shelf units. The rear gratings are screwed to the shelf supports or side panels. Including fastening material. Specification: Steel wire 3.0 mm.

Mesh size 50 × 50 mm, galvanised, blue chromated according to DIN 50961.

! To stabilise the shelving systems lengthwise, diagonal or lengthwise braces must be used in addition to the perforated rear panel.

! **Rear panel link piece** is absolutely essential for all rear panels used in combination with shelf supports. Basic unit: 2 × width 80 mm and for each add-on unit 1 × width 120 mm. Specification: Steel sheet. Colour: As per colour chart or galvanised.

				1474	Resin	45.989.XXX	45.990.XXX
Shelf load (kg)						80	80

Cover panel, resin-coated, thickness 22 mm

Surface and edging light grey, NCS S 1500-N, laminated chipboard (quality class E1), with melamine coating on both sides (manufactured according to standard EN 14322). 2 mm thick plastic edging on all sides. Including double-sided adhesive tape.

Multiplex cover panel, thickness 30 mm

Made of steamed beech veneers, glued in multiple layers and waterproof (DIN 68 705), bevelled edges, sanded, oiled and waxed surface. The panel is splash-proof, dirt-repellent and largely impervious to oil and grease. Including double-sided adhesive tape.

Shelving systems | Heavy-duty pull-out shelving systems

Heavy-duty pull-out shelving systems are ideal for the safe and convenient storage of heavy items such as injection moulds, punching tools, electric motors and pallet goods. Since they can be loaded using lifting gear, they can be installed in a compact arrangement. Load capacities of up to 9000 kg per unit and the availability of different shelving heights, shelf depths and unit widths and the wide selection of equipment options mean that they can be adapted to perfectly suit any type of storage item.

+ Utmost stability
through robust, solid design with a very high load capacity of up to 9 t per shelving unit

+ Optimum use of space
with shelving heights of up to 2.50 m for perfectly organised storage of very heavy inventory items

+ High load capacities
up to 200 kg per top shelf, up to 1000 kg per fixed and pull-out frame

+ Secure locking
with smooth-running roller shutters in combination with side and rear panels

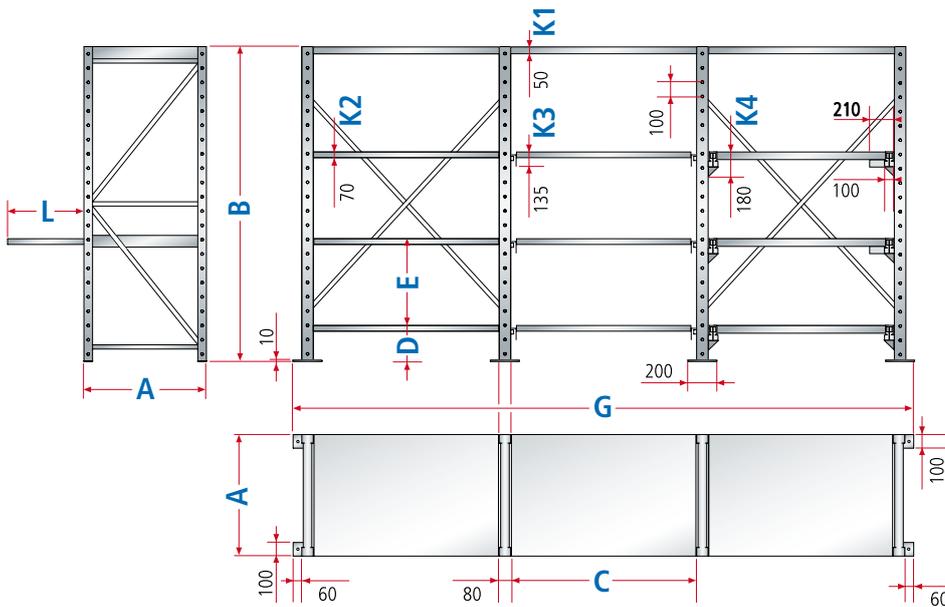

+ Can be adapted to new storage items at any time – through the flexible integration and rearrangement of fixed and pull-out frames in increments of 100 mm

+ Extremely smooth running
through smooth-running pull-outs with stops in closed and fully extendable positions

+ Optimum order and organisation
pallets can be stored lengthwise or crosswise in fixed and pull-out frames

+ Safe and orderly storage
flush storage achieved by placing sheet metal covers on top or inserting chipboard inserts

Dimensions and load capacities

A = Shelving depth
B = Shelving height
C = Shelving width

D = Minimum distance from floor
E = Minimum distance top edge to top edge

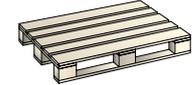

G = Number of installation widths + number of side frame widths 80 mm + external base plate widths 60 mm
 Example: $G = 3 \times 1090 \text{ mm} + 4 \times 80 \text{ mm} + 2 \times 60 \text{ mm} = 3710 \text{ mm}$
K1...K4 = Installation heights

Lengthwise pallet storage

Pallet type	Width mm	Depth mm	Height mm
I	800	1200	150

Crosswise pallet storage

Pallet type	Width mm	Depth mm	Height mm
I	800	1200	150
II	1200	800	150
III	1200	1000	150
IIII	1000	800	150

Shelving depths (A)

D Installed dimensions mm	860	1060	1260
Extension depths (L) mm			
Part extension, 65% extension	510	650	810
Full extension, ~ 100% extension	790	990	1190

Shelf widths (C)

W Installed dimensions mm	890	1090	1290
Side frame width	80	80	80
Base plate width	200	200	200

Load capacities

D Installed dimensions mm	860	1060	1260
Number of pull-out frames			
Fixed frame Number			
		Max. load capacity per pull-out or fixed frame kg	
1 to 5	-	1000	900
1 to 6	-	900	900
1 to 7	-	800	800
1 to 8	-	700	700
1 to 9	-	600	600
-	1 to 9	1000	900
1 to 3	1 to 6	1000	900
1 to 5	1 to 4	800	800
Max. load capacity per top shelf kg		200	150

The maximum load capacities specified must not be exceeded. The load capacities apply only to an evenly distributed load. The maximum load capacity per shelving unit is 9000 kg. **Only one pull-out frame per shelving unit may be pulled out.**

Shelving heights (B)

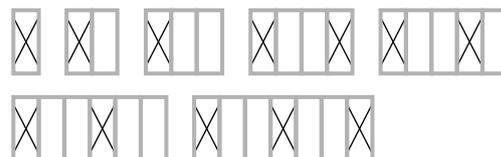

H Nominal dimensions mm	1500	2000	2200	2500
--------------------------------	------	------	------	------

Installation heights (K)

Top shelf	K1	50 mm
Fixed frame	K2	70 mm
Part extension frame	K3	135 mm
Full extension frame	K4	180 mm

Vertical installation distances

Distance from floor (D) minimum	105 mm for fixed frame
	165 mm for part extension frame
	215 mm for full extension frame
Minimum distance (E) top edge to top edge	100 mm for fixed frame
	200 mm for full extension and part extension frame
	300 mm for full extension frame with sheet metal cover
Hole spacing	every 100 mm

Diagonal brace arrangement

the load capacities only apply when, for 6 shelf units or more, 2 shelf units or at least every fifth shelf unit is fitted with rear panels or 1 diagonal brace per 3 units.

! Anchoring rule

Heavy-duty pull-out shelving units must always be anchored.

+ Optimum use of space for very heavy storage items

Pallet storage

- space-saving pallet storage with a load capacity of up to 1000 kg in fixed frames

Heavy-duty pull-out shelving systems 9000, disassembled

With 2 pull-out frames for part extension (PE, 65% extension) and 1 fixed frame as top shelf, each including chipboard inserts, 40 mm thick. Can be fitted with side panels, further pull-out and fixed frames, metal covers, sliding doors, roller shutters and column guard. Basic unit including 1 diagonal brace for lengthwise stability, 2 side frames, floor anchor and levelling plate set. Add-on unit including 1 side frame, floor anchor and levelling plate set. Hole spacing in the side frame every 100 mm. Specification: steel sheet. Colour: as per colour chart.

Note: from the third add-on unit, an **additional diagonal brace** is required (see p. 242).

H 2000 mm

		Pull-out frames	Fixed frames	Shelf load kg	Max. load per unit kg	Basic unit Art. no.	Add-on unit Art. no.

1260	890	2	1	800	9000	71.531.XXX	71.535.XXX
1260	1290	2	1	800	9000	71.533.XXX	71.537.XXX

Heavy-duty pull-out shelves up to 1000 kg

- for storing large, heavy single items and equipment
- flush storage achieved by placing sheet metal covers on top or inserting chipboard inserts

! Side frames

Side frames are perforated at intervals of 100 mm to allow installation of top shelves, fixed and pull-out frames. Front and back columns are welded together with horizontal and diagonal braces to form a rigid frame. Specification: sheet steel pressed profiles. Colour: as per colour chart.

Caution: four floor anchors are required per side frame.

Side frame cover

For covering the top of the side frames. Specification: sheet steel. Colour: according to colour chart.

Side panels

The side panels and the side frame columns are screwed together. The standard side panels are used for the roller shutter structure. Includes screw fixtures. Specification: sheet steel 1.5 mm. Colour: according to colour chart.

! Side frame connections

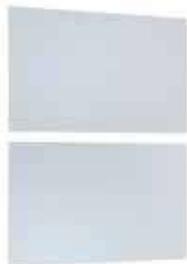

Screwed to the side frames at the front and rear. Including screw fasteners. Specification: flat steel. Colour: as per colour chart.

! Diagonal braces

Used instead of rear panels to stabilise units lengthwise. Including screw fasteners. Specification: Steel, galvanised. Number of diagonal braces: see planning notes p. 240.

or...

! Rear panels

The rear panel cover for shelving sections also stabilises the units lengthwise and is screwed to the side frames with the columns. Including fastening material. Specification: steel sheet. Colour: as per colour chart.

! In order to comply with regulations, and for safety reasons, heavy-duty pull-out units must consist of at least these elements

Shelving systems | Heavy-duty pull-out shelving systems fixed and pull-out frames

! Fixed frame

Instead of the top shelves, fixed frames can also be used. The fixed frames are screwed to the side frames. Including screw fasteners. Specification: Pressed profile, welded. Colour: as per colour chart.

Metal sheet covers for fixed frames

Placed on loosely. Locked in place with a bent section at the front and rear and a stop bracket welded on at the rear. Specification: steel sheet, 2 mm thick. Colour: as per colour chart.

Chipboard inserts for fixed frames

2-piece, to be inserted into the fixed frames. Specification: chipboard, 40 mm thick.

or...

Pull-out frames for part extension

Part extension (PE), 65% extension. The pull-out stop secures the pull-out frame in both closed and open positions. The runners are screwed to the side frames. Including screw fasteners. Specification: Pressed profile, welded. Colour: as per colour chart.

Metal sheet covers for pull-out frames (part extension)

With raised edge on 3 sides, 30 mm high, placed on loosely. Locked in place with a bent section at the front and a stop bracket welded on at the rear. Specification: steel sheet, 2 mm thick. Colour: as per colour chart.

Chipboard inserts for pull-out frames (part extension)

2-piece, to be inserted into the pull-out frames for part extension. Specification: chipboard, 40 mm thick.

! In order to comply with regulations, and for safety reasons, heavy-duty pull-out shelving systems must consist of at least these elements.

or...

Pull-out frames for full extension

Full extension (FE), 100% extension. The pull-out stop secures the pull-out frame in both closed and open positions. The runners are screwed to the side frames. Including screw fasteners. Specification: Pressed profile, welded. Colour: as per colour chart.

Metal sheet covers for pull-out frames (full extension)

With raised edge on 3 sides, 30 mm high, placed on loosely. Locked in place with a bent section at the front and a stop bracket welded on at the rear. Specification: steel sheet, 2 mm thick. Colour: as per colour chart.

Chipboard inserts for pull-out frames (full extension)

2-piece, to be inserted into the pull-out frames for full extension. Specification: chipboard, 40 mm thick.

! Top Shelves

Cover the top of the side frames and provide protection from dust. Fitting material included. Specification: sheet steel. Colour: according to colour chart.

Roller shutter including top shelf

Pre-assembled roller shutter housing. Roller shutter guided in vertical profiles on side frame. With recess for lever tumbler lock. For initial assembly, including top shelf, pre-drilled, for attaching the roller shutter housing. Description: roller shutter housing and guide profiles made of sheet steel. Colours: according to colour chart. Roller shutter with plastic slats. Colour: pale grey, RAL 7035. Note: the height of the shelving is increased by 323 mm due to the design.

-------------------------------	------------

Shelving systems | Mobile shelf units

A LISTA mobile shelving system is the perfect way to create plenty of storage space in confined areas. When more space is needed in existing premises, LISTA has the perfect solution: create more space without extending. Fixed shelf units are needed only if simultaneous access to all stored items is necessary; otherwise, aisles between shelf units are simply uneconomical. Instead of many space-consuming service aisles between the fixed shelf units, only one single aisle is needed to provide access to all shelving.

A wide variety of equipment options

with different drives and rail systems

Protects against dirt

through horizontal and vertical dust seals

Secure locking option

central locking system and linking hook provide protection against unauthorised access

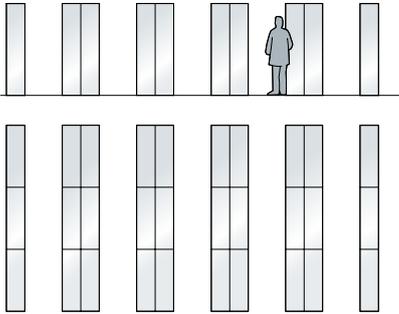

Outstanding safety features

aisle can be locked during service times; movement of the system is not possible

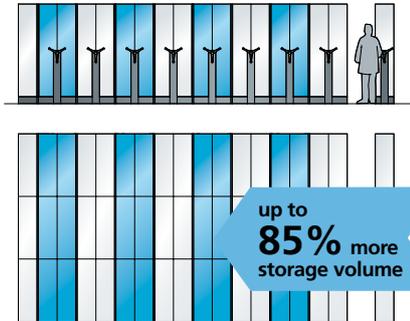

+ Benefits of LISTA mobile shelf units

Conventional storage

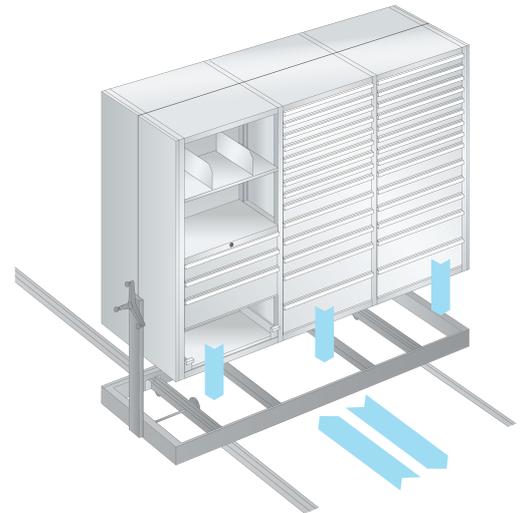

30 shelving units each providing 6 shelf metres = **180 shelf metres.**

Storage with mobile shelf units

54 shelving units each providing 6 shelf metres = **324 shelf metres.**

+ Flexible range of applications

LISTA offers suitable storage solutions for all types of stored goods. Universal and drawer storage walls are perfectly suited for use with mobile substructures. LISTA planning specialists utilise the many options offered by the mobile shelf unit system. Every organisation detail is managed according to your requirements – from the design to the turnkey installation of your system.

Universal shelving L1006 R Design "Solid sheet side panel"

Diagonal braces or rear panels ensure stability. Depending on the dimensions and specification, shelves have a load capacity between 80 and 280 kg. The maximum load-bearing capacity of a shelving unit is about 500 kg.

For more information on universal shelving systems see page 220.

Universal shelving L1006 Design "shelf supports"

Suitable for bulky or heavy stored goods. They provide optimum air circulation thanks to their open design. Stability is ensured by diagonal braces or rear panels. Depending on their dimensions, the shelves have a load capacity between 80 and 280 kg. Maximum load capacity per shelving unit up to 1000 kg.

For more information on universal shelving systems see page 220.

Drawer storage walls

The drawer options for small parts or tools are virtually unlimited. The many drawer sizes together with the large range of partition components provide a flexible and adaptable basis for optimum and material-friendly storage.

For more information on drawer storage walls, see page 84.

SYSTEMATIC ORGANISATION

LISTA drawer partition materials create systematic order for all industries and all requirements. From small parts to NC tools, our plastic boxes, troughs, metal dividers and more provide flexible solutions for practically any kind of storage item. The results speak for themselves: because systematic organisation means less time searching for stored items, simplified workflows and efficient results.

+ **Wide range of specifications in a modular system**

with preconfigured sets and freely combinable individual elements such as slotted partitions, metal dividers, plastic boxes, troughs, etc.

+ **Fully combinable**

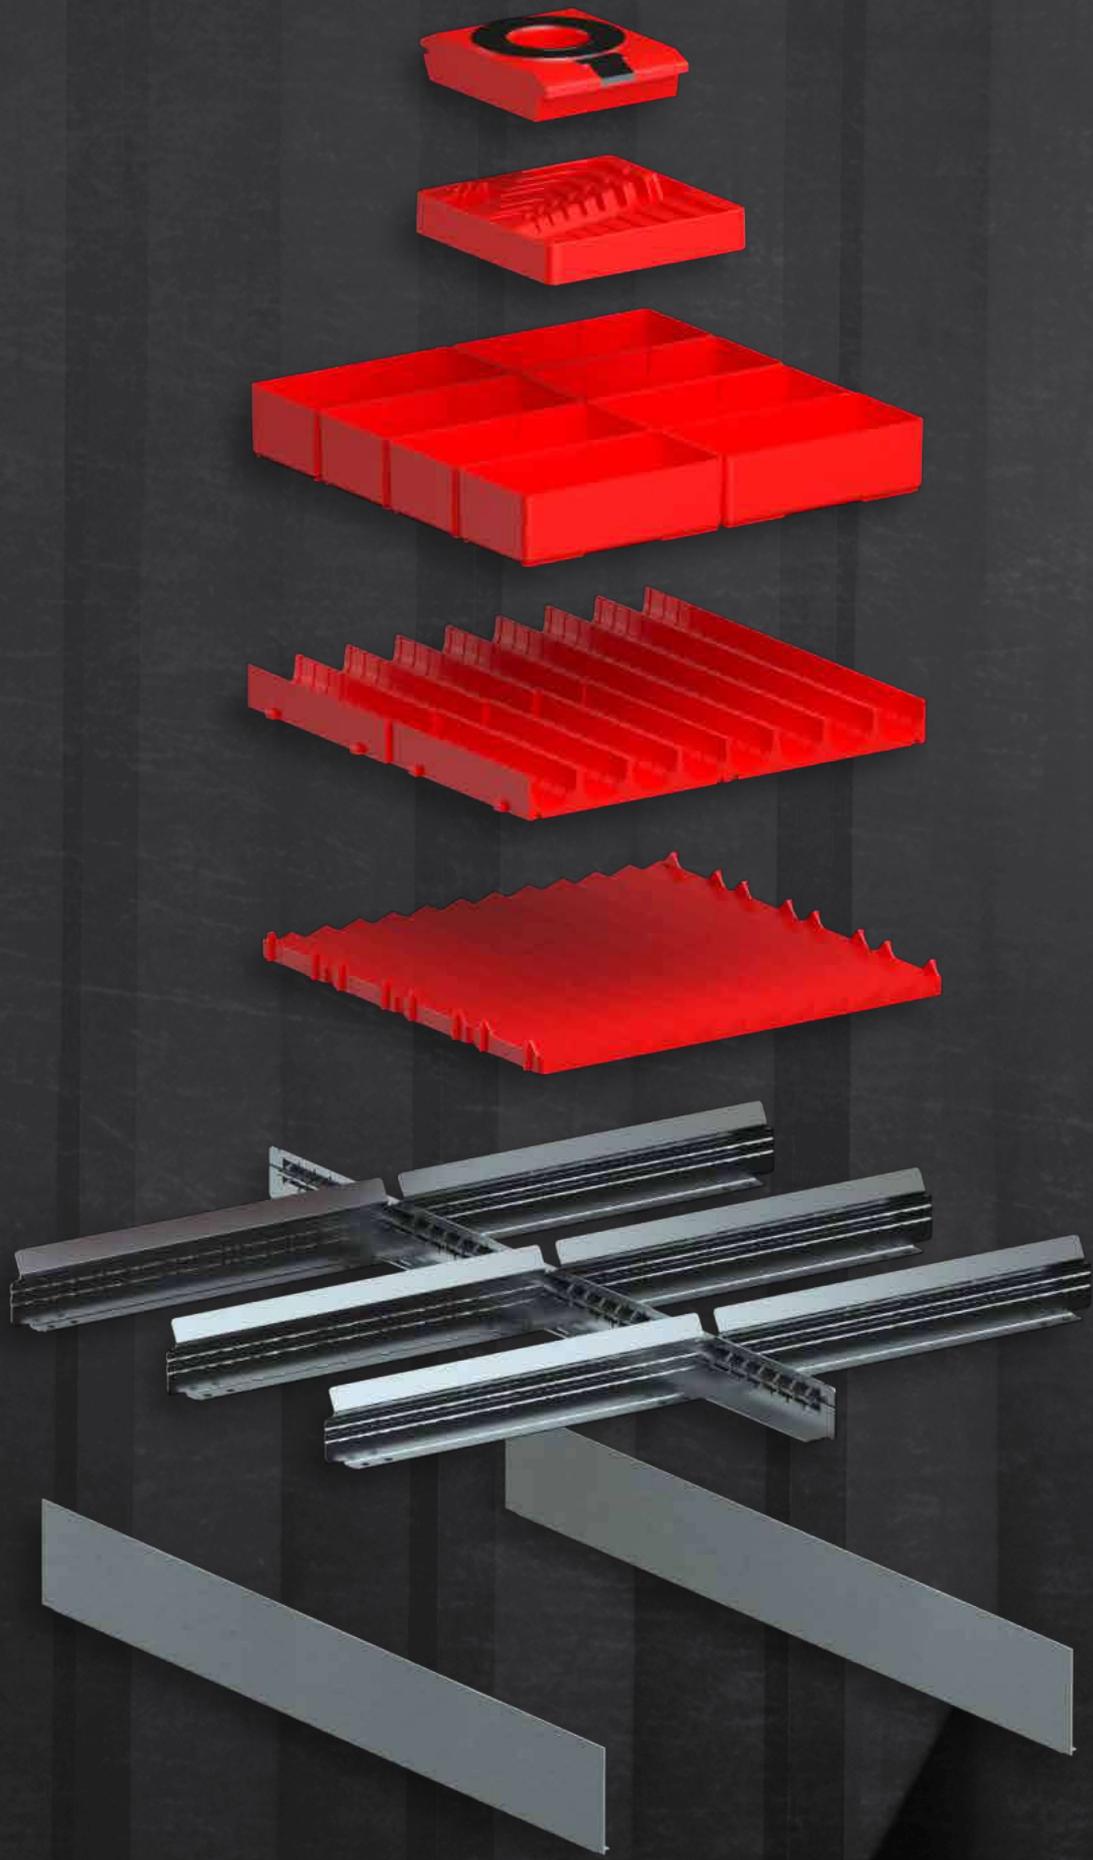

with the entire LISTA range thanks to the standardised unit of measure

+ **Fast and easy assembly**

the walls surrounding the interior of the drawers have a slotted grid and the bottoms of the drawers are perforated for the insertion and attachment of slotted partitions, metal dividers, milling cutter holders and holding pins

+ **Professional labelling**

with LISTA Script labelling software for labels, clip-on label holders and barcode holders

Partition material

+ One system, many different options

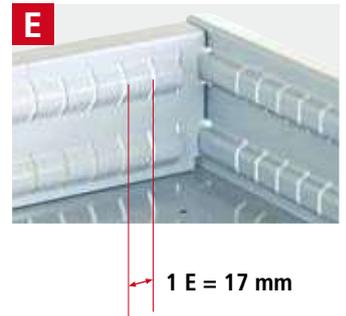

Thanks to the LISTA Unit measuring system, our partition materials can be freely combined and are compatible with the entire LISTA range. This means that you have the ideal storage system for your particular storage items – either as individual parts or as a preconfigured set.

+ The LISTA Unit (E) – the clever measurement system

Using a practical grid system, the LISTA unit (E) ensures that housings, drawers and partition materials always fit neatly together. **A LISTA unit (E) is 17 mm** and is based on the grid system for partitioning drawers. Drawer cabinet housings and the drawers that fit into this housing are based on the same LISTA Units, even though they have different dimensions.

Determining the right partition material:

1. Determine the drawer size in LISTA Units (E)
2. Determine the dimensions of the set or the individual parts in LISTA Units (E)
3. The sum in Units of the individual parts must not exceed the sum in Units of the drawer(s)
Take the usable height of the drawer into account according to the goods to be stored.

» For more information, see fold-out.

+ Wide range of specifications in a modular system

Plastic boxes

- perfect for small parts of various sizes
- also available in ESD

Troughs

- for cylindrical items
- can be divided lengthwise as desired
- also available in ESD

Slotted partitions and metal dividers

- for flexible partitioning
- for parts of different sizes

Holding pins and non-slip mats

- ideal for larger items

Foam inserts with blue underlays

- protects tools and other items and keeps them organised
- hold items firmly in place in the drawer

NC tool holders

- for neat and orderly storage of NC items

» For NC storage and transport systems see p. 100

LISTA Script

- clip-on label holders for plastic boxes, troughs and metal dividers
- helps you keep an overview of your inventory and can easily be read by a barcode scanner

» LISTA Script see p. 268

The entire LISTA range can be found online at www.lista.com.

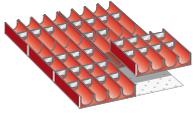

You can find our LISTA Script labelling software on our [website](http://www.lista.com) under **Products › Accessories › LISTA Script**

18 × 27 E

306 × 459 mm

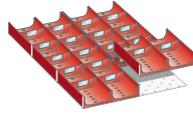

Troughs

For front height mm	Art. no.
50	80.377.000
6 troughs:	4-piece, Ø 33 mm*
30 trough dividers:	4-piece, Ø 33 mm*

Troughs

For front height mm	Art. no.
50	80.378.000
6 troughs:	3-piece, Ø 45 mm*
20 trough dividers:	3-piece, Ø 45 mm*

Troughs

For front height mm	Art. no.
50	80.379.000
6 troughs:	2-piece, Ø 70 mm*
20 trough dividers:	2-piece, Ø 70 mm*

Plastic boxes

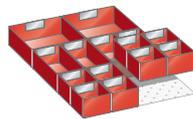

For front height mm	Art. no.
50	80.372.000
75	80.414.000
24 plastic boxes:	75 × 75 mm

* Take the usable height of the drawer into account according to the goods to be stored.

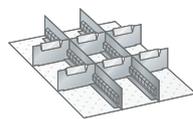

Plastic boxes

For front height mm	Art. no.
50	80.368.000
75	80.412.000
16 plastic boxes:	75 × 75 mm
4 plastic boxes:	75 × 150 mm

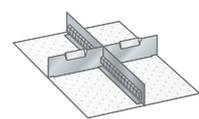

Plastic boxes

For front height mm	Art. no.
50	80.370.000
75	80.413.000
8 plastic boxes:	75 × 75 mm
4 plastic boxes:	75 × 150 mm

50	80.009.000
75	80.010.000
100, 125	80.011.000
150	80.012.000
200	80.013.000
250	80.014.000
300	80.697.000

5 slotted partitions: 27 E
12 metal dividers: 9 E

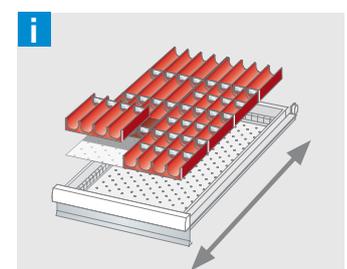

» Non-slip mats and PE foam inserts, see p. 267

Note

The front height is the same as the height of the drawer front. For the actual height of the partition material see p. 262–265.

Partition material sets excluding clip-on label holder.

Correct use of partition material

Troughs should always be inserted in the running direction of the drawers to prevent round parts, such as drills or similar, from falling out when the drawers are closed forcefully.

Partition material | Plastic boxes and troughs

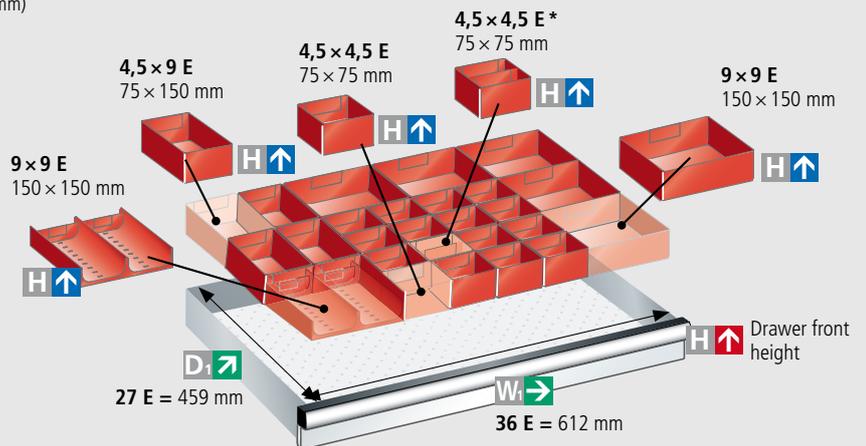

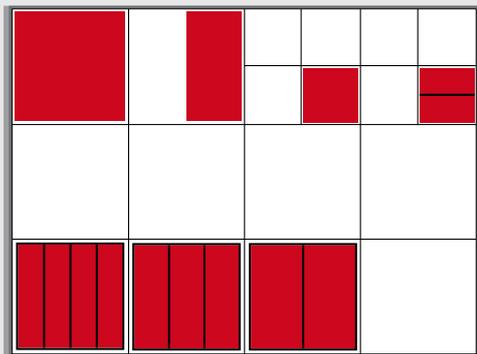

Especially suitable for drawers with a front height of: 50, 75, 100, 125 mm

How can I partition my LISTA drawer?

Example: Plastic boxes and troughs for drawers 36 × 27 E (612 × 459 mm)

* The plastic box also has a fixed centre divider.

Perfect drawer partitioning

Store your small and round parts professionally and perfectly in the LISTA drawers with LISTA plastic boxes and troughs.

The table on the right shows the maximum capacity of your drawer for each size of plastic boxes and troughs. The dimensions are standardised but can be combined if desired and fit into any LISTA drawer.

Please bear the front height of your drawer in mind (external dimension)!

Maximum capacity per plastic box for:

9 × 9 E

150 × 150 mm

LISTA Script labelling system

With LISTA Script, your LISTA products can be simply and clearly labelled. The labelling software can be downloaded from our website. The matching labels are supplied as perforated A4 sheets suitable for any commercially available printer. There are almost no limits to the ways you can design labels. As always with LISTA.

+ Individual labelling
with a wide range of labelling options, colours, pictograms and barcode generator

+ Software can easily be downloaded
via www.lista.com under Products › Accessories › LISTA Script

+ Easy to use
with any commercially available printer and pre-perforated labels

+ Fast data import
via database link

+ Easy to use in three simple steps

1. Design

- Design the labels using LISTA Script labelling software

2. Print

- Print the labels on perforated A4 sheets and detach them in the desired size

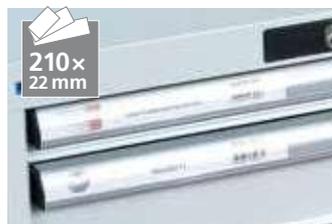

3. Insert

- Open the viewing window, insert the label and close the viewing window by pressing the bottom edge

+ Pre-perforated labels for cabinets and partition material

LISTA labels are available in the sizes 70 × 22 mm, 140 × 22 mm and 210 × 22 mm for cabinet labelling and 27 × 12 mm, 47 × 12 mm and 47 × 18 mm for labelling partition material.

Label size 210 × 22 mm
for labelling drawers

Label size 70 × 22 mm
for labelling housing

Label size 70 × 22 mm
for labelling drawers

All labels
on perforated A4 sheets

Label size 27 × 12 mm
for labelling troughs

Label size 47 × 12 mm
for labelling plastic boxes

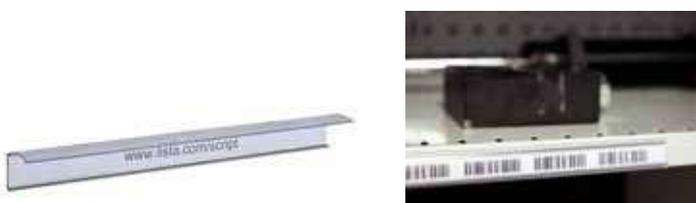

Label size 47 × 18 mm
for labelling dividers

THERE FOR YOU ALL OVER THE WORLD

LISTA is there for you, on several continents, in many different locations. In addition to our two plants at the headquarters in Erlen (Switzerland) and in Bergneustadt (Germany), we also look after and advise our customers through our international sales branches in Europe and China. A close-knit network of retail partners tops off the service that we offer.

COLOUR YOUR WORKSPACE

Twelve standard colours, six colour combinations, all other colours available. Whether a workbench or drawer cabinet in red, green or violet: LISTA can supply any product, in any colour and colour combination on request. This means that you can design your own individual system with absolute flexibility. All options are possible, from different colours for individual work areas to storage and workspace furnishing in corporate design colours.

In addition to classic standard colours like pale blue, pale grey, pure white or black, you can choose from 12 other predefined colours or simply specify the colours you want. And you can order housings and drawers in different colours. Because when we say flexible, we mean it.

+ The clever measurements system

The LISTA units

As a practical grid system, LISTA units enable clear assignment of housing, drawer and partition material. A LISTA unit (U) is 17 mm and is based on the grid system for partitioning drawers. Drawer cabinet housings and the drawers that fit into the housing are based on the same LISTA units, even though they have different dimensions.

	Depth 27 E				Depth 36 E							
LISTA units	18x27 E	27x27 E	36x27 E	54x27 E	18x36 E	27x36 E	36x36 E	45x36 E	54x36 E	64x36 E	78x36 E	
Cabinet base area mm	411 x 572	564 x 572	717 x 572	1023 x 572	411 x 725	564 x 725	717 x 725	870 x 725	1023 x 725	1193 x 725	1431 x 725	
Drawer usable surface mm	306 x 459	459 x 459	612 x 459	918 x 459	306 x 612	459 x 612	612 x 612	765 x 612	918 x 612	1088 x 612	1326 x 612

Locking systems

KEY Lock

The standard locking system with replaceable cylinders makes it easy to adapt to existing locking systems. The locking system secures all drawers simultaneously.

CODE Lock

Here the key is replaced by a numeric combination. A simple four to six-digit numeric combination is sufficient to open the drawer cabinets.

RFID Lock

The LISTA RFID Lock enables automatic and contactless locking through radio frequency identification. It consists of a transponder in the lock and a mobile control unit such as badge or card.

AUTO Lock

Like RFID Lock, opens and locks automatically however; can also be time-dependent.
